

# Copilot Readiness Assessment

prepare for a seamless integration of Microsoft Copilot

Copilot Readiness Assessment

# Prepare for a Smooth and Successful Copilot Integration

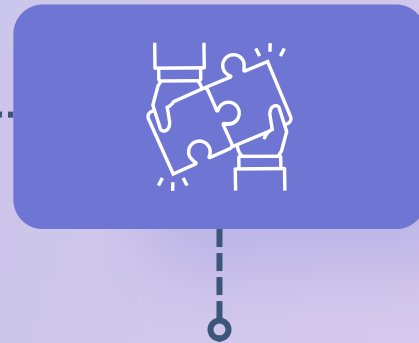

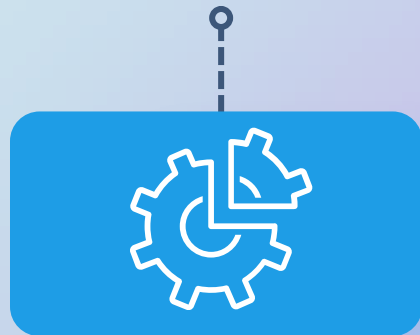

# Our Solution

A comprehensive evaluation of your current systems, licensing, and data infrastructure

## Comprehensive System Review

We conduct a thorough analysis of your IT infrastructure, verifying compatibility with Microsoft Copilot's technical requirements.

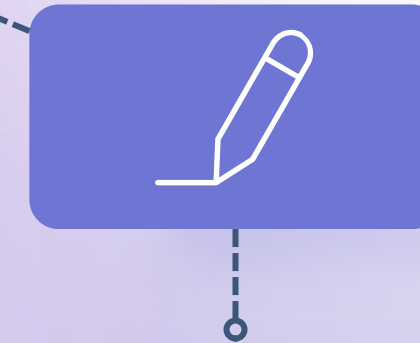

## System and Application Requirements

We outline any system updates or application configurations needed to support Copilot's functionality, including software versions, language preferences, and user access protocols.

## Customized Readiness Report

Receive a detailed report summarizing all findings and recommended next steps, so your team can address any potential issues before the deployment phase.

## License Evaluation

Our experts assess your current Microsoft 365 licensing to ensure optimal configuration and access, helping you manage and maximize your Copilot licenses effectively.

## Data Security and Compliance Check

We evaluate your data storage and security policies to align with Microsoft's standards, ensuring a secure Copilot deployment.
