intranet.ai

DO YOU KNOW WHAT YOUR COLLEAGUES NEED?

Get help from analytics to understand workers' daily needs

Search monitoring

Understand what is searched in everyday work life and with what terms.

Behavioral analysis

Keep track of the content that is most used, according to the various business functions.

Integrated with Teams

Monitor the use of your SharePoint Online intranet, which is also friable through Teams

WHY INTRANET.AI ANALYTICS?

IMPROVES THE QUALITY OF WORK AND THE EFFICIENCY OF EMPLOYEES

- The intranet usage monitoring solution allows you to understand the daily needs of the people who work in the company and the way in which people look for things that are useful for their work;

- Thanks to intranet.ai and its guided search functions, it is possible to fill the gap found during the monitoring phase, with new targeted contents, with a general saving of time for everyone.

ALLOWS AN ANALYSIS, FOR USER FAMILIES

- Unique users, devices used, most viewed pages, most downloaded documents, searches carried out: these are all data that you can size for:

- Site

- Type of content

- User family

INTEGRATED WITH MICROSOFT TEAMS AND INTRANET ALREADY IN USE

- intranet.ai analytics integrates with any SharePoint Online site, with the ability to track customized events based on the features already present within the company portal.

- It also allows monitoring of the intranet used by Teams

MORE INFO

We have been operating for many years in the Digital Workplace field with Microsoft certified resources and references from local and international realities.
