dbForge Studio for SQL Server

Premium all-in-one SQL Server GUI tool

Develop SQL | Manage databases | Analyze data | Collaborate easily | Embrace DevOps

About us

We are one of the leading developers of innovative database software embraced by 40,000 companies and 500,000 professionals from more than 140 countries. Our goal is to make their daily work easier with our solutions and provide an exceptional quality of advice and support.

Founded in 1997

For more than 25 years, Devart has been developing and delivering software products that perfectly address the needs of companies and individual users alike.

The Focus

We create and continuously evolve database tools, ALM solutions, data providers, data integration and backup solutions, as well as web and cloud services.

200+ Experts

More than two hundred professionals of the highest caliber contribute their knowledge and expertise to ensure the quality and completeness of our products and services.
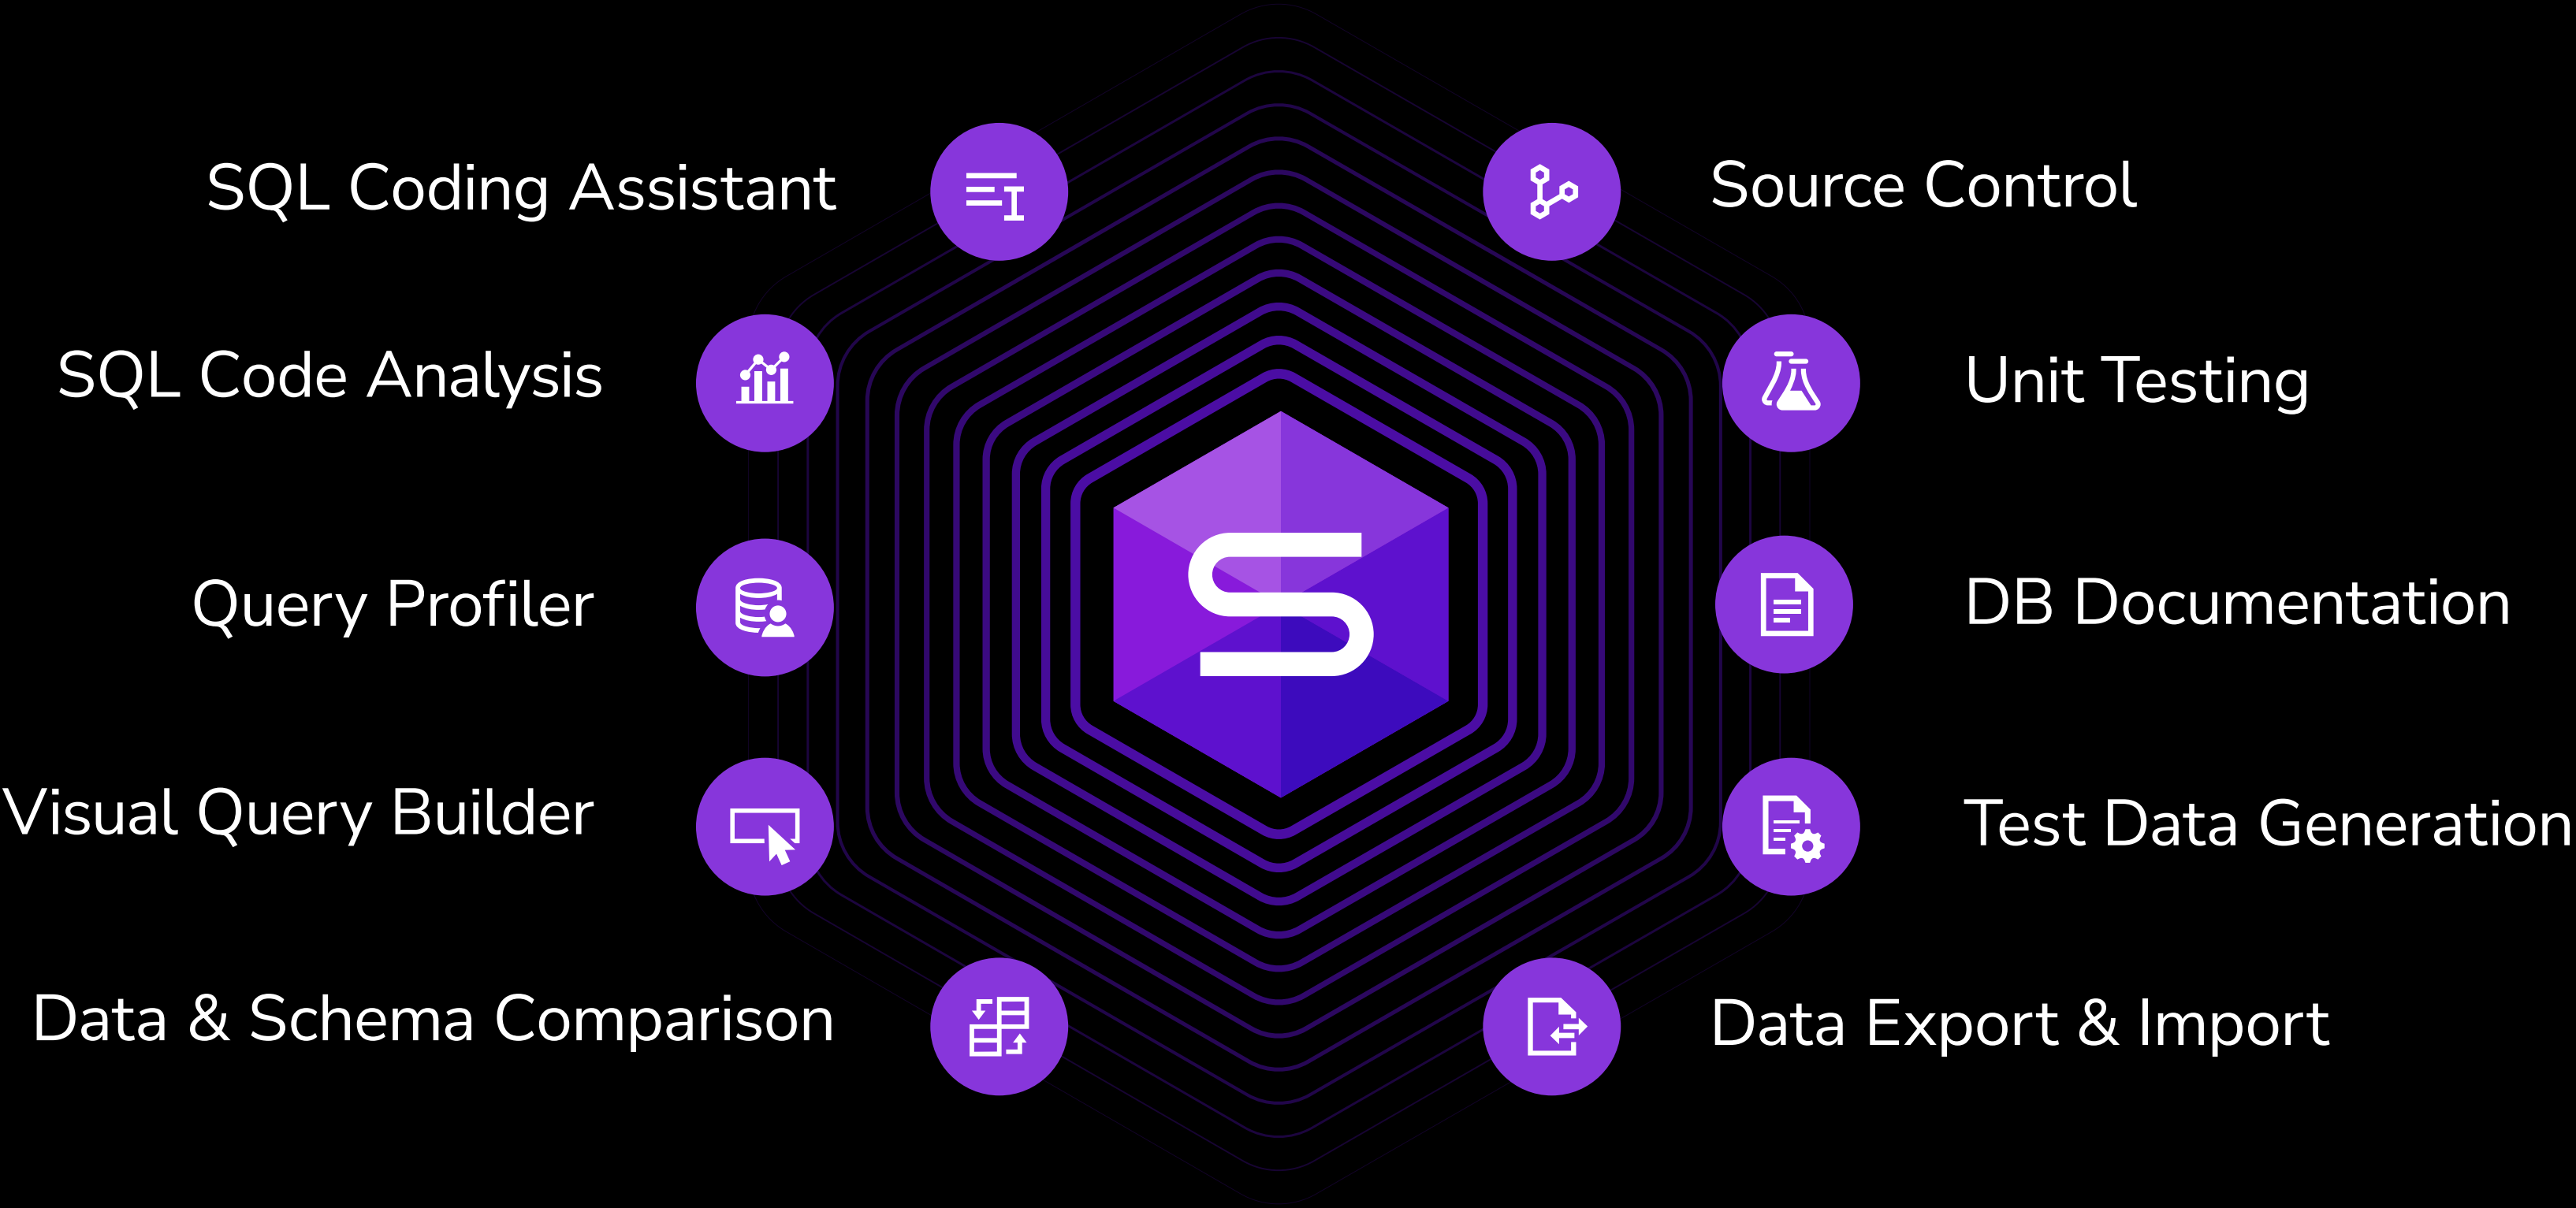

Our offices

Devart's offices are located in the Czech Republic, Slovakia, Ukraine, and Hong Kong.

Awards

Users love dbForge Studio, and it's their appreciation that helps it earn awards on top software reviewing platforms.

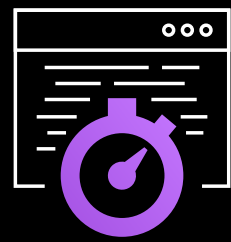

Fortune 500 customers

dbForge Studio for SQL Server is favored by the world's leading companies from a variety of industries.

devart

# Why dbForge Studio for SQL Server is a good choice

Faster coding
Write cleaner code with context-aware code completion and a rich collection of code snippets.

Quick database diffs
Compare SQL Server database schemas and data, analyze the diffs and safely deploy the changes.

Easy data migrations
Transfer data between different servers even heterogeneous ones with a rich set of supported import and export formats.
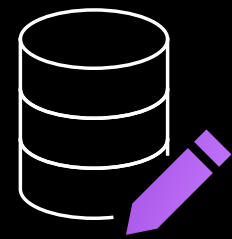

★ ★ ★ ★ ★

"... I tried your product and it has increased the speed of development by 10 fold. In fact there is no way I would have been able to finish a project with Azure for a 250,000 product ecommerce site if I hadn't been using your tool. I am definitely buying your product and getting a license for everyone on my team."

— **Jason Kelley,** Lead Developer at Symdigital Tehnology Solutions

# Why dbForge Studio for SQL Server is a good choice

Intelligent database designer
Use an advanced ER diagram tool to visualize a database structure and create any relationships between tables in a few clicks

Continuous Integration
Embrace database DevOps automation approaches and take conventional database development, testing, and deployment to a whole new level

Instant Code Formatter
Beautify the T-SQL routines code to make it more readable and implement SQL coding standards within a team or the entire organization

★ ★ ★ ★ ★

"The formatting feature makes reading SQL a lot easier. The hoover over items and popup of details about that object a REAL help. The intellisense is a great time saver. The whole program is a HUGE time saver and joy to use."

— **Lorenzo Statie,** sr. Software Developer at Vibrant Software

devart

How dbForge Studio can help your business

Technology industry

2X LEVEL UP QUERY CODING
With Smart Completion

Code faster with context-sensitive auto-completion, quick object information, instant code formatting, and smart refactoring

25% TEAM PRODUCTIVITY
With Source Control

Examine database changes, resolve conflicts, and update the dev database with the latest changes in no time

2X BETTER THAN SSMS
Multi-featured solution

dbForge Studio for SQL Server has excellent satisfaction ratings. Users report it to be a much more flexible tool with a wider set of features than SQL Server Management Studio

★ ★ ★ ★ ★

"It is a replacement on steroids for SQL Server Management Studio — more user-oriented, far productive tool than we have used before. We are still in awe, every day we discover new features, we still did not find after 2 something years a feature missing."

— Catalin Gheorghiu, Founder, CTO and Lead Solution Architect at Computer Solutions

How dbForge Studio can help your business

Technology industry

2X SPEED UP OF DATA RETRIEVAL

With Index Analysis

Gather SQL Server indexes statistics, detect indexes that require optimization, and reorganize them in visual mode to improve performance

25% ACCELERATE DEPLOYMENT SPEED

With Schema and Data Compare

Quickly compare databases, get a full insight into the diffs, select changes to apply, and run the deployment script – all in a few clicks

400% LESS TIME DOCUMENTING

With Database Documenter

Get an overview of the database schema, view and inspect inter-object dependencies, automate documentation creation from the Command Line

★ ★ ★ ★ ★

"I use dbForge Studio for everything, from one-off data edits to stored procedure or function creation, query profiling, report building, and source control. It really is my go-to platform on a day-to-day basis."

— **Logan Laux,** Software Development Manager

What do customers think about dbForge Studio?

The value you get with the Studio can be perfectly illustrated with the excerpts from the success stories kindly provided by our customers.

"After discovering how much better of an IDE dbForge is than SSMS I now do most of my database development work in dbForge."

Geoff Armstrong
President of Dispatcho

"Testing database changes has improved by 50%. Due to the mapping features in dbForge Studio, importing data is consistent each time, resulting in faster testing. I would say a 25% improvement. dbForge Studio is all about workflow efficiency and effective use of resources."

HH **Harry Hellerschmid**
CEO at Web Corp Inc.

Read Full Story

"It allows me to have all the resources in purposeful folders for quick access, GUI for very fast table creation, and data explorer to quickly edit small portions and troubleshoot potential issues... It is an essential tool for development. It's no longer an optional choice."

VK **Vladimir Kocic**
Lead Data Analytics Specialist

Read Full Story

"I use Studio for everything from one-off simple queries to digging deeper into issues ... as well as for investigating databases we inherited to extract data we need and organize it in a meaningful manner for CFO, GM, and our board members."

CC **Craig Cramer**
Manager of Information Systems
