# dbForge SQL Tools

dbForge SQL Tools is a bundle of cutting-edge standalone tools and SSMS add-ins covering nearly every aspect of SQL database development, management, analysis, testing, and deployment

# About us

We are one of the leading developers of innovative database software embraced by 40,000 companies and 500,000 professionals from more than 140 countries. Our goal is to make their daily work easier with our solutions and provide an exceptional quality of advice and support.

### Founded in 1997

For more than 25 years, Devart has been developing and delivering software products that perfectly address the needs of companies and individual users alike.

### The Focus

We create and continuously evolve database tools, ALM solutions, data providers, data integration and backup solutions, as well as web and cloud services.

### 200+ Experts

More than two hundred professionals of the highest caliber contribute their knowledge and expertise to ensure the quality and completeness of our products and services.
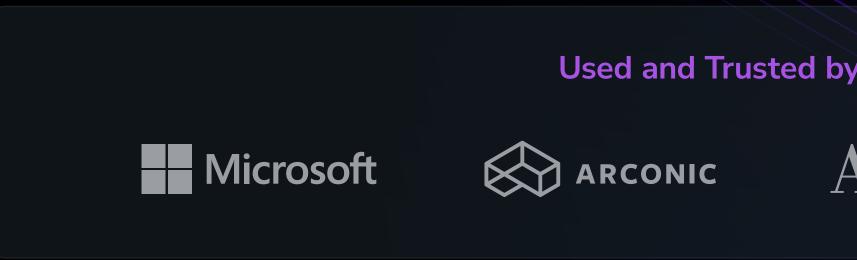

### Our offices

Devart's offices are located in the Czech Republic, Slovakia, Ukraine, and Hong Kong.

# dbForge SQL Tools

Use your existing skills and full capabilities of dbForge tools for SQL Server
to build a reliable infrastructure that is tailored to your applications and services

Increase developer's productivity

Apply database DevOps approach

Favorable pricing

Extend SSMS functionality

**Used and Trusted by Enterprises Around the World**

Microsoft   ARCONIC   Anthem.   POLARIS   Hewlett Packard Enterprise

# How dbForge SQL Tools help you work with SQL Server and Azure SQL

devart

## Database Development

**SQL Complete**
SQL Autocompletion, Formatting, Refactotring, and Analysis

**Query Builder**
Create and Manage SQL Queries Visually

**Search**
Quick Search for SQL Objects and Table Data

**Documenter**
Generate Documentation for SQL Server quickly and easily

**SQL Decryptor**
Decrypt SQL Server Database Objects

## Database Deployment

**Data Compare**
Compare and Sync SQL Server Data

**Schema Compare**
Compare and Sync SQL Server Schemas

**Source Control**
Link your SQL Database to Version Control

**Data Pump**
Accelerate Data Migration Between Databases

## DevOps Automation

**DevOps Automation**
Reduce Overall Database Release Costs

## Administration

**Index Manager**
Analyze and Fix SQL Index Fragmentation

**Monitor**
Monitor and Analyze SQL Server Performance

**Event Profiler**
Collect and Analyze SQL Server Trace Data

## Testing

**Data Generator**
Generate Realistic Test Data for Databases

**Unit Test**
Write SQL Unit Tests Directly in SSMS

# What do customers think about SQL Tools?

The value you get with the Studio can be perfectly illustrated with the excerpts from the success stories kindly provided by our customers.

"We use SQL Complete every day, probably, every hour. From formatting to snippets that help build INSERT scripts for our complex reference table additions, to the simplest of snippets that speed up query writing"

**Greg Rhind**
Development Lead
at Coyote Software Corporation

**Read Full Story**

"Fewer spelling errors, correct JOINs, formatting as desired, and the SQL Query History ... It all makes my daily work easier"

**Svend Dyhr Hansen**
Software Developer
at BookingStudio A/S

**Read Full Story**

"It does the comparison with the click of a button... We have had NO bugs released to production as a result of an incorrect schema"

**James Spruill**
Owner at Millennial Information Systems LLC

**Read Full Story**

"SQL Complete is like SSMS IntelliSense on steroids, plus so many other features including join statement completion, tab coloring, wildcard expansion, and refactoring. It also gives you lots of extra data at a glance, including column data types and row counts..."

**Keith Richardson**
Principal Software Architect
at Broughton Software

**Read Full Story**
