About Us

DevOps Enabler & Co. is an ISO 27001:2013 certified organisation that provides software delivery automation to enable organisations to increase business growth.

We work with many of the start-ups and large enterprises to line up their Operations and Developments to achieve higher efficiency, speed up and improve the quality of the software.
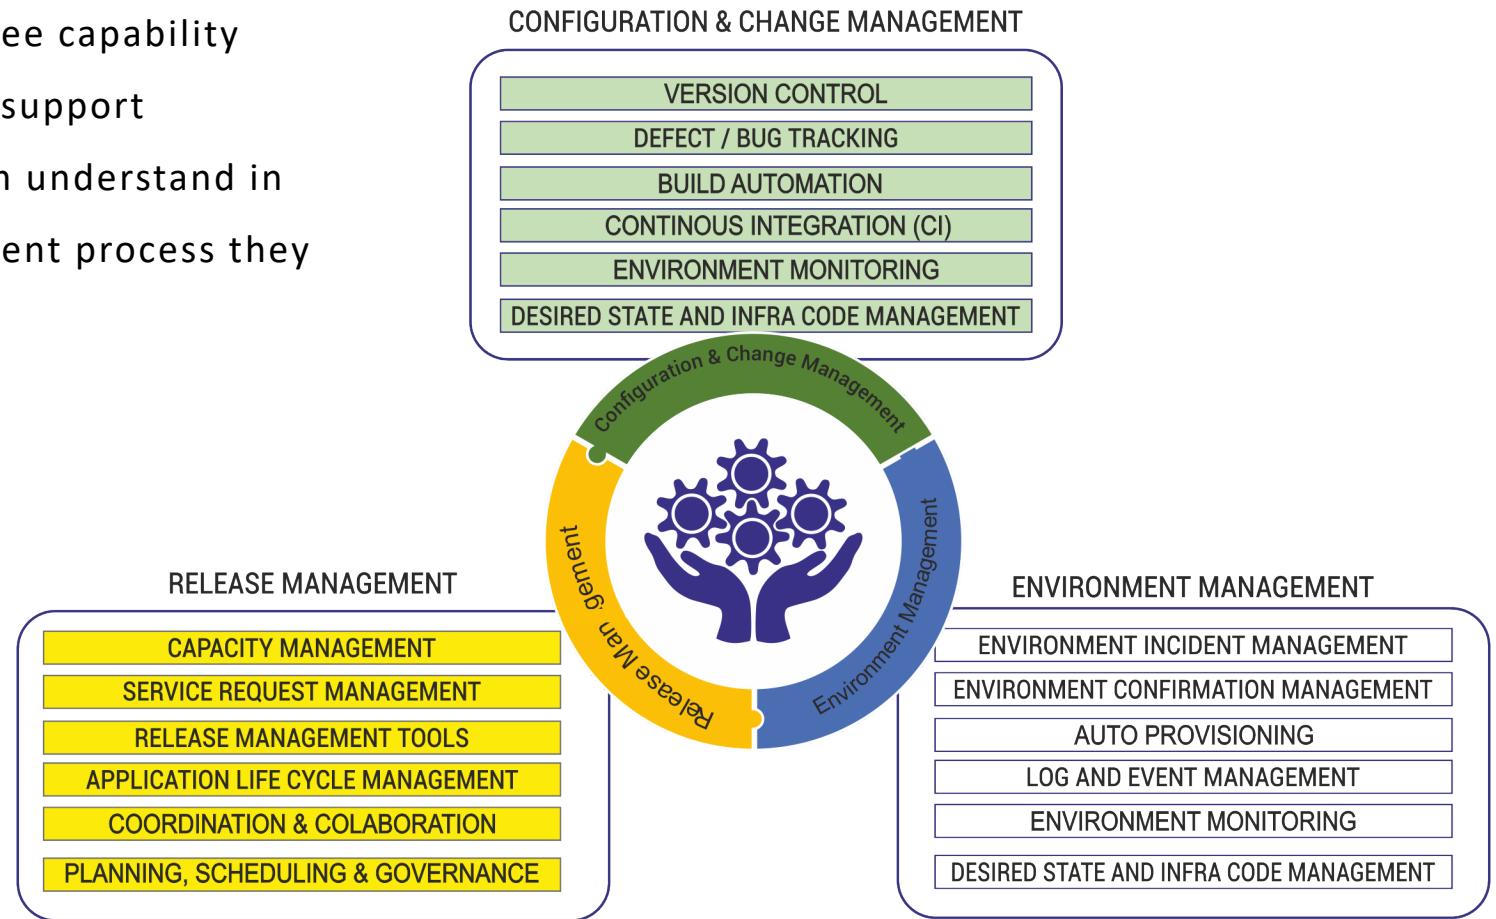

Our Clients

Scaling DevOps Across Enterprise

❖ DevOps Enabler focuses on a framework of three capability areas in which most DevOps gaps are found. We support organizations improve efficiency by helping them understand in which of these areas of their software development process they have gaps.

❖ With expert experience, the capability areas are further structured into respective functions; they clearly define the scope and are focused to help measure value delivered for the business.

❖ A streamlined DevOps workflow results in increased efficiency and higher quality through reduced downtime and lower production risk. Organization implementing these capabilities can see Significant Cost reduction, Faster delivery and Improved High Quality with collaboration across teams.
