Power BI Dashboard In A Day

Workshop | 1.500€*

One-day practical workshop for business analysts, covering the full range of Power BI functions.

This Workshop is a **one-day instructor led, hands-on tutorial** to accelerate under-standing how to use Power BI **to gather and transform data, create visualizations to gain insights** culminating in creating and sharing Power BI dashboards.

With Power BI, Microsoft offers a business analytics service through which the integrity of companies can be monitored with the help of live dashboards and rich interactive reports can be created. Mobile devices also provide access to this data regardless of location. Dashboard in a Day is a one-day workshop held in collaboration with the Devoteam M Cloud-Team.

This one-day practical workshop is aimed at business analysts and covers the entire range of functions in Power BI.

What do you get?

- Connecting, importing and transforming data from different sources
- Defining business rules and KPIs.
- Analyzing the data with powerful visualization tools
- Creating appealing reports
- Sharing dashboards with a team and business partners and publishing the reports on the web
