# Devoteam Cloud Foundation

Creative tech for Better Change

## Cloud Foundation – Creating cloud ready environments with Azure landing zones

- Azure landing zones are Azure environments that consider scale, security, governance, network, and identity. The concept of the Azure landing zones enables application migrations and greenfield developments on an enterprise scale in Azure. In addition, it also serves as a basis for verifying existing deployments regarding best practices and, if necessary, adapting them.
- Cloud Foundation represents the collection of Devoteam in building secure & scalable Azure landing zones based on Microsoft Cloud Adaption Framework. With Cloud Foundation Devoteam provides the collection of Azure Landing Zone architectures and best practices from many successfully implemented projects.

# What you get

## Cloud Foundation

### Organizational Structure & Networking

- Tenant setup and onboarding
- Management group and subscription design
- Naming convention
- Hub-Spoke network architecture
- Connectivity

### Landing Zones & Automation

- Secure, scalable and modular
- Multi-stage deployments
- Infrastructure as Code
- Azure DevOps and/or GitHub

### Security & Compliance

- Azure Policies
- Custom Policies
- Azure Security Center integration
- Access/Identity Management
- Governance as Code

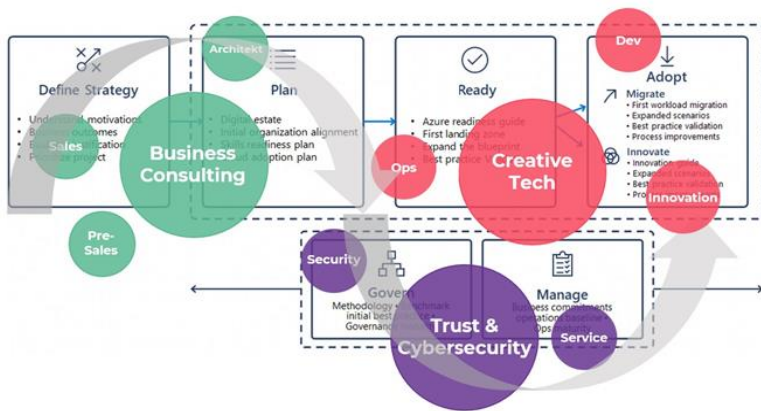

### Logging & Monitoring

- Azure Monitoring
- AI-assists
- Configuration of Azure Cost Management
- Coverage across all services

Creative tech for Better Change

# Value for Customers

- Central platform and management hub
- Pay as you go, complete package or full managed service
- Cloud environment from a secure and sustainable foundation
- Fast migration to the cloud with Best Practices
- Fast cloud enablement – start from where you are
- Efficiency & Scalability through automation by Infrastructure as Code
- Agile and fast deployment or adjustment
- Achieves operational excellence
- Build-in security & controls

# Implementation Path

- 2-Day Workshop: Learn about CAF and Devoteam Cloud Foundation & Tenant setup for deployment
- Deliverable: Workshop documentation and decision log

Initialization  
Workshop

Deployment

- Infrastructure as Code (IaC)
- Sustainable Compliance by Governance as Code

- Hands-on Session, Walk-Through, Fine Tuning
- Deliverable: Prod. environment

Handover  
Cloud Foundation

Managed Services

- Define responsibilities
- Define scope
- SLA & support

# Pricing Options

## Hosted Setup Deployment & Managed Service

List price: 20.000 €\* initial  
+2.500 €\* (per month)  
Customization: T&M

- Deployed from DVT DevOps organization
- Foundation will be delivered to customer's tenant
- Configuration changes are done by DVT DevOps organization following the industry best practices
- Functional updates are provided quarterly/semi-annual

**Creative tech for Better Change**

## One-Time Deployment

List price: 45.000 €\*  
Customization: T&M

- Deployed from DVT DevOps organization
- Foundation will be delivered to customer's tenant
- Further configuration changes are done by customer
- Project space provisioner operated by customer
- Functional updates to foundation will require a re-purchase

\* Price subject to change and errors excepted – plus VAT.
