

Design Thinking Innovation Factory Service

Workshops depending on your needs

Design Thinking Workshop – Part of our Innovation Factory Offer – Get an overview:

With our Innovation Factory Service Offer, we guide our customers on their way to the cloud or support them in their ongoing cloud adoption with the design and development of cloud-native applications. As expert consultants, we are not only able to deliver excellent solution architectures, but also support our customers from requirement gathering to process optimization.

Our team follows best practices such as human centered design thinking and the lean product approach to set the course for a successful agile implementation already in the early phase of requirements definition.

Our DevOps teams are able to run and develop applications in the cloud for the long-term using a managed DevOps service. In this way, we ensure continuous improvement.

What do you get?

S - Package

Within agile development loops, customer feedback is systematically analyzed and evaluated. The goal of the Design Thinking S package represents the continuous improvement and innovation of a solution or product.

Price: 2.800 - 3.400 €*

M - Package

In cooperation with our client, we explore the innovation and digitization potential of your company. The Goal of the Design Thinking M package represents the scoping of the possible innovation and digitization areas. In doing so, we work according to the high-level concept.

Price: 7.500 - 10.000 €*

L - Package

Together with our client, we specify a possible idea to be realized. We start with the elaboration of user stories and user journeys, which are implemented and explored in a second step with the help of an MVP. The goal of the Design Thinking L-Package is an agile and collaborative product design.

Price: 12.500 - 15.600 €*
