# The POWER BI Adoption Journey

6 Weeks | 43.500€*

Bridge the gap between data & decision making!

Microsoft Power BI is a complete suite of business intelligence for reporting, analytics & key data visualization. Create and share interactive data visualizations across global datacenters, including national clouds to meet your compliance and regulation needs.

«Power BI transforms your company's data into rich visuals for you to collect and organize so you can focus on what matters to you.»

Microsoft Power BI helps you with powerful visual reports, data analytics & predictive analysis that enable you to make instant smarter decisions.

What do you get?*

Envisioning & Onboarding

- Power BI Envisioning
- Dashboard in a Day
- Admin in a Day
- Integration into Office 365
- Security

Advanced Workshops

- Translations
- Secure your Data
- BI Strategy
- Paginated Report in a Day
- AI with Power BI

Proof of Concept

- Power BI Proof of Concept
- Power BI Embedded Proof of Concept

*Please note that the pricing & timeframe is only a rough estimate and will vary depending on the services you choose, the size of the implementation and other circumstances in your specific target scenario.

The POWER BI Adoption Journey

Our Step-by-Step Approach

Step 1:	**Envisioning**
Participants:	Key Stakeholder (CIO, CISO, Data Protection Officer, Data Analysts, IT Staff)
Content:	This Workshop will help you to understand the Power BI technology, the challenges, the benefits. It's a way of discovering what's available, what's feasible, what's possible!

Step 2:	**On Boarding**
Participants:	Data Analysts, IT Administration
Content:	The On Boarding is split in four separate "in a Day" Workshops. Those are hands-on Workshops to gain first experience and Power BI Platform knowledge.

Step 3:	**Advanced Workshops**
Participants:	Data Analysts, IT Administration
Content:	These five advanced Workshops will provide a deep dive in the Power BI Platform, based on the knowledge you have gained in the On Boarding. We will also analyse the requirements and needs of your company for the Proof of Concept.
Outcome:	Concept for a PoC in your environment

Step 4:	**Proof of Concept**
Participants:	Data Analysts, IT Administration
Content:	The aligned PoC Concept will be implemented. We support your teams or implement the necessary steps with our colleagues.
Outcome:	Implementation of the Power BI or a Power BI embedded PoC, or both. After implementing the PoC we will plan all necessary next steps with you.
