

SAP on Microsoft Azure

4 Weeks Assessment | 12.000€*

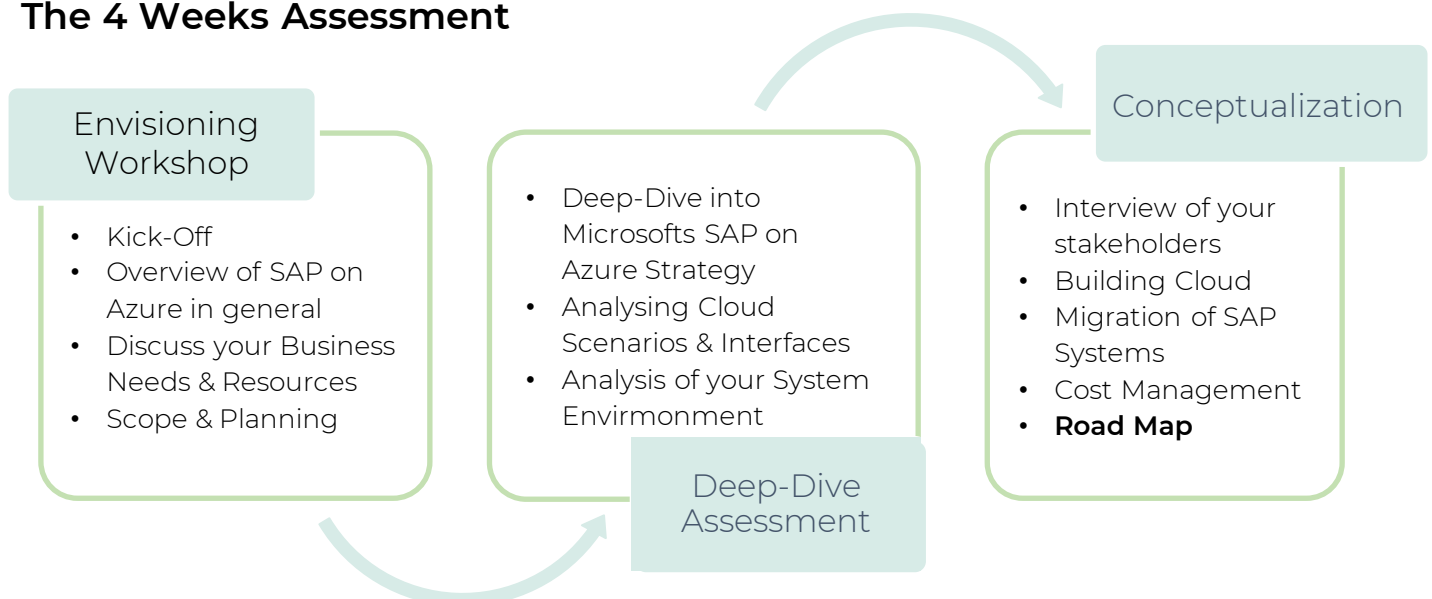

Microsoft Azure is the best platform for business-critical systems including SAP. Azure offers scalability, fast time to deployment, a broad set of tools and services to enable your initiatives, and a pay-for-use model that only charges you for the processes you run. This reliable, high-capacity public cloud platform offers extensive analytics capabilities and the unique ability to provide true same-platform support for public and private cloud using Active Directory to seamlessly manage access to both. All with Microsoft's top-notch security and unparalleled global enterprise support.

Our offer:

- Microsoft Azure Well-Architected Framework
- An interface analysis based on your infrastructure
- SAP Cloud Concepts
- Cloud strategies based on the interfaces and new developments
- Complete process analysis and representation in the cloud

The 4 Weeks Assessment

*Please note that the pricing & timeframe is only a rough estimate and will vary depending on the services you choose, the size of the implementation and other circumstances in your specific target scenario.

SAP on Microsoft Azure

Our Step-by-Step Approach

Step 1: **Envisioning Workshop**

Participants: Key Stakeholder (CIO, SAP Leader, IT Staff)

Content: This Workshop will help you understand SAP on Azure technologies, the challenges, the benefits. It's a way of discovering what's available, what's feasible, what's possible!

Step 2: **Deep Dive Assessment**

Participants: Key Stakeholder (CIO, SAP Leader, IT Staff)

Content: The Assessment will analyse on a high-level basis the requirements and needs of your company. We will discuss the scope and the overall project plan.

Outcome: We will build the relevant teams to move forward. Plan for your SAP on Azure Journey and recommendations for the next steps.

Step 3: **Conceptualization**

In this step you will get a concept on building cloud and SAP migration. We will provide the necessary steps with your colleagues.

Step 3.1: **Building Cloud**

We will provide an overall infrastructure strategy for your company. This includes Azure Landing Zones, Security & Compliance and Cost Management.

Step 3.2: **Migration of SAP systems**

- Lift & Shift
- Brownfield
- Greenfield
- Optimization

Step 4: **Road Map**

In the last step there will be a complete road map for your company. Briefly the outcome is a full journey including:

- Azure infrastructure
- SAP migration
- Managed Cloud Services
