

Azure Migration Services

2021

Creative tech for Better Change

M Cloud

Agenda

- Context
- Our offers
- Why and How ?
- What ?
- Our team

Background – We will make your migration a success !

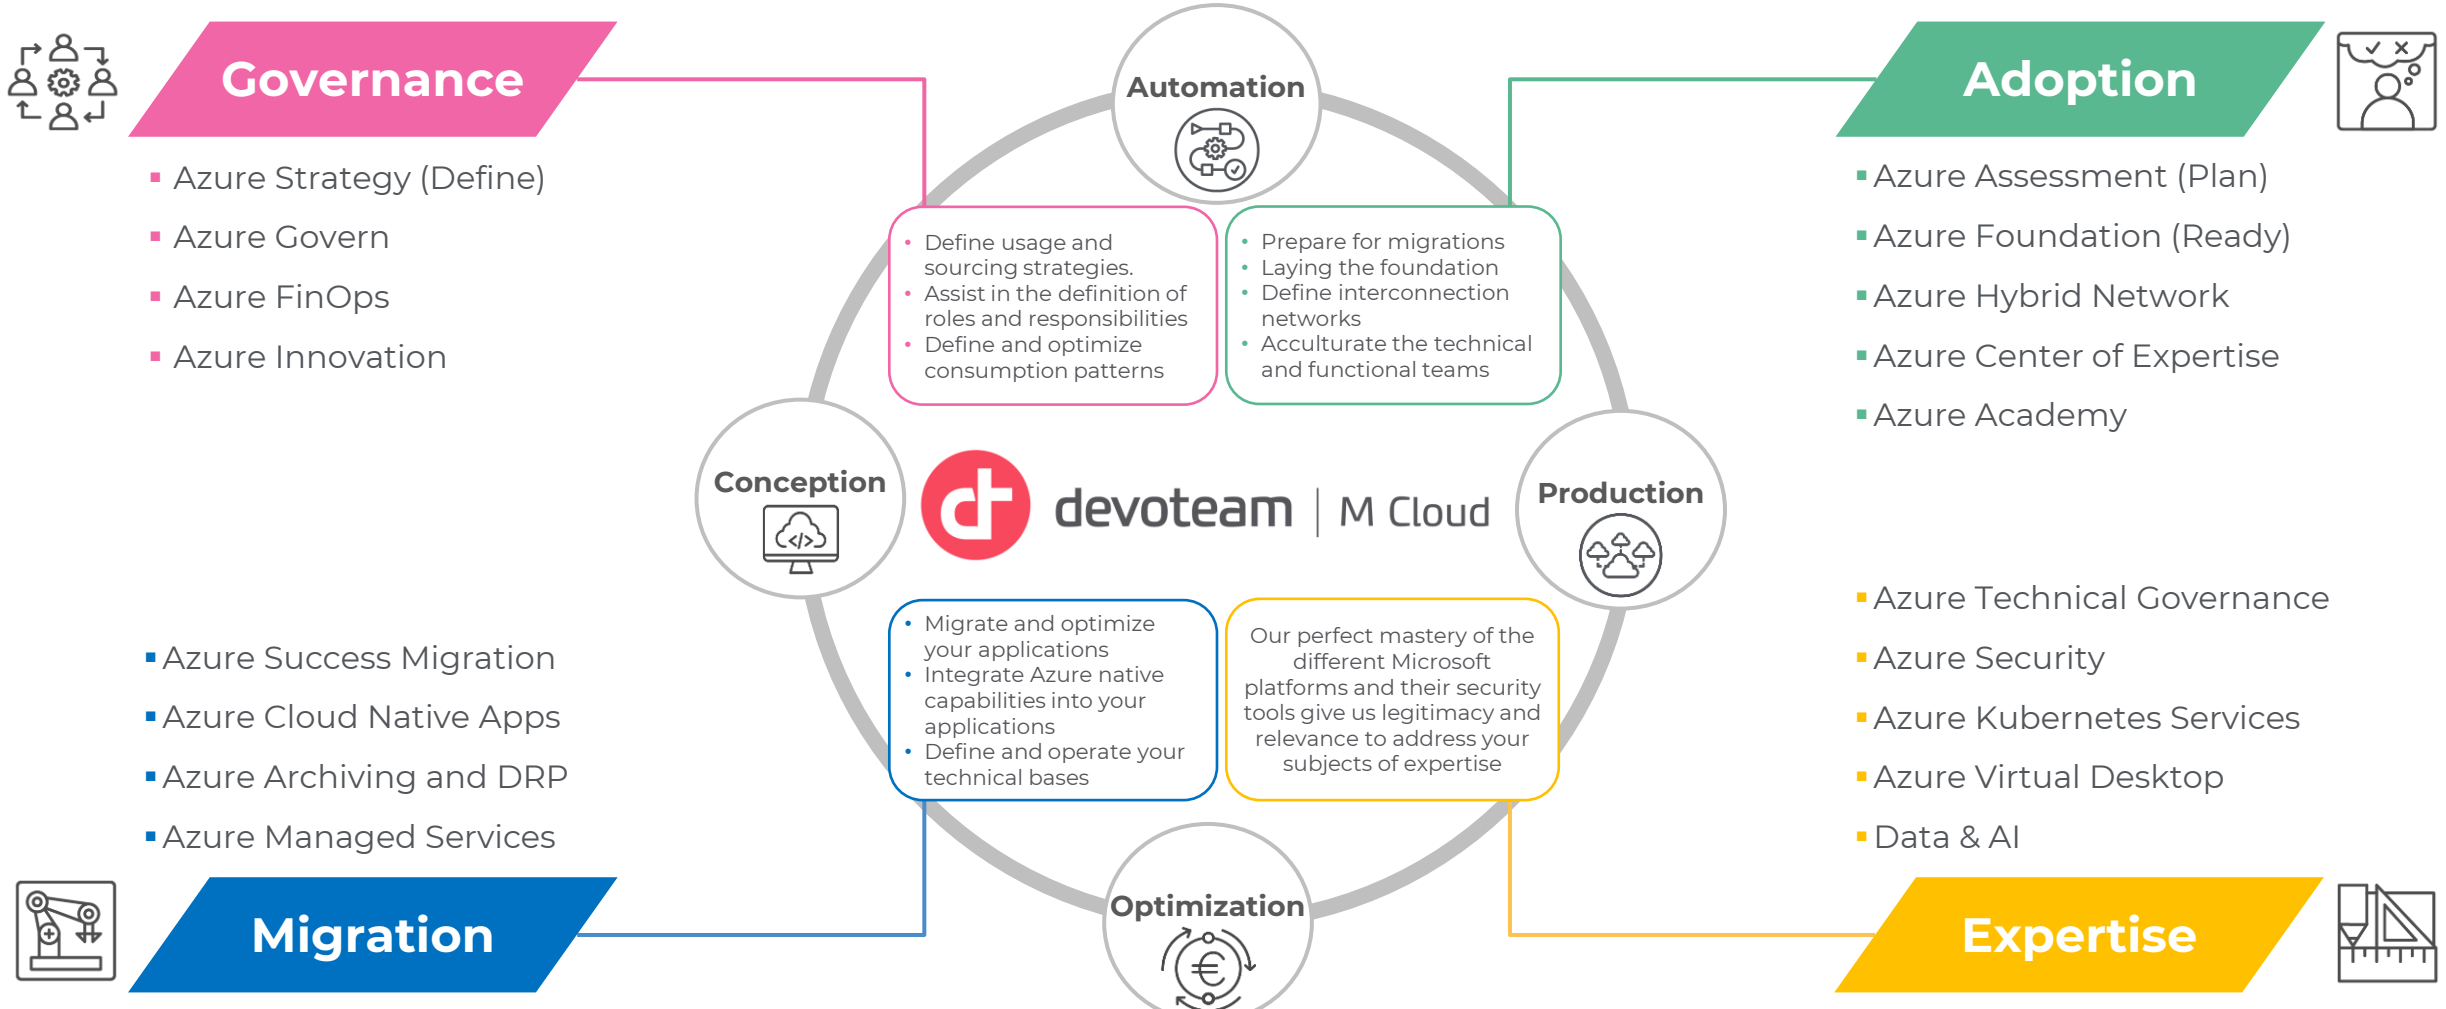

Your challenges

- Free up or optimize your Datacenter hosting
- Secure your infrastructures and applications
- Successfully execute the transformation program and drive change with employees from the analysis phase

Your constraints

- Be accompanied by a recognized service provider, reliable and able to train you
- Define a migration plan in compliance with all your constraints (business, security, regulatory, authorizations, standards)
- Your business continuity implies maintaining and managing your current "legacy" environment during your Cloud transition

4 complete catalogs to cover all your Azure Cloud needs

Why and how – our Azure Migration offer aims to ensure your transformation

Azure Migration Offer

Objective of the offer

Define a migration plan: Migrate eligible servers, services and applications to Microsoft Azure, while respecting business, regulatory and on-premises constraints

Value chain

More than technical, Cloud transformation is a business project requiring to control the organizational impact: this is our specialty!

Our goal: that you are Cloud ready !

Why and how – How do we do it ?

plan.

Subdividing applications by functional, technical and criticality scope

Review of applications and service levels, definition of the target service catalog (IAAS, PAAS), application architecture model, definition of economic models, eligibility rules for target solutions (lift & shift, rehost, replatforming), batch planning and team load plans. Determine the first migration candidates (applications) / Subscription management / Tool selection

mobilize.

Mobilize teams to make transformation a success

Train and support your teams to be actors of migration at our side. Set up Migration teams by type of target solutions, supported by teams of transversal technical and functional experts.
Establishment of Governance and Risk Management

build.

Frame and define the target architecture with your Teams

Region and Availability Zones, Landing Zone, Network Topology / Authentication & Key Management / Bastion & RBAC Strategy / Logs & Monitoring / Quota & Charge Back / Dashboards / CI/CD integration / Auto Scale / Naming convention & Tags

experiment.

Test & learn, quickly switch applications to Azure

Validate target architectures, migration processes and teams, adjust where needed

industrialize.

Industrialize and accelerate azure service migrations

Industrialization through deployment and service automation / Cleaning Strategy of Azure resources / Azure Policies & Azure Initiatives / Azure Blueprint & IAC / Execution of the migration by the migration teams based on the priority of the applications according to your business requirements

Why and how - We give you the essential deliverables

Collect

- **Migration plan:** Integrating eligibility rules, application subdivision, migration paths, governance, escalation and incident processes

Architecture

- **Tooling:** Choice of migration tools according to your constraints
- **Architecture Overview:** Integrating the different architecture choices like regions, AZ, networks, security, authentication, naming, tagging, monitoring, alerting, secret management ...
- **Landing Zone:** Delivery of the Initial Landing Zone according to the priority needs defined in the HLD

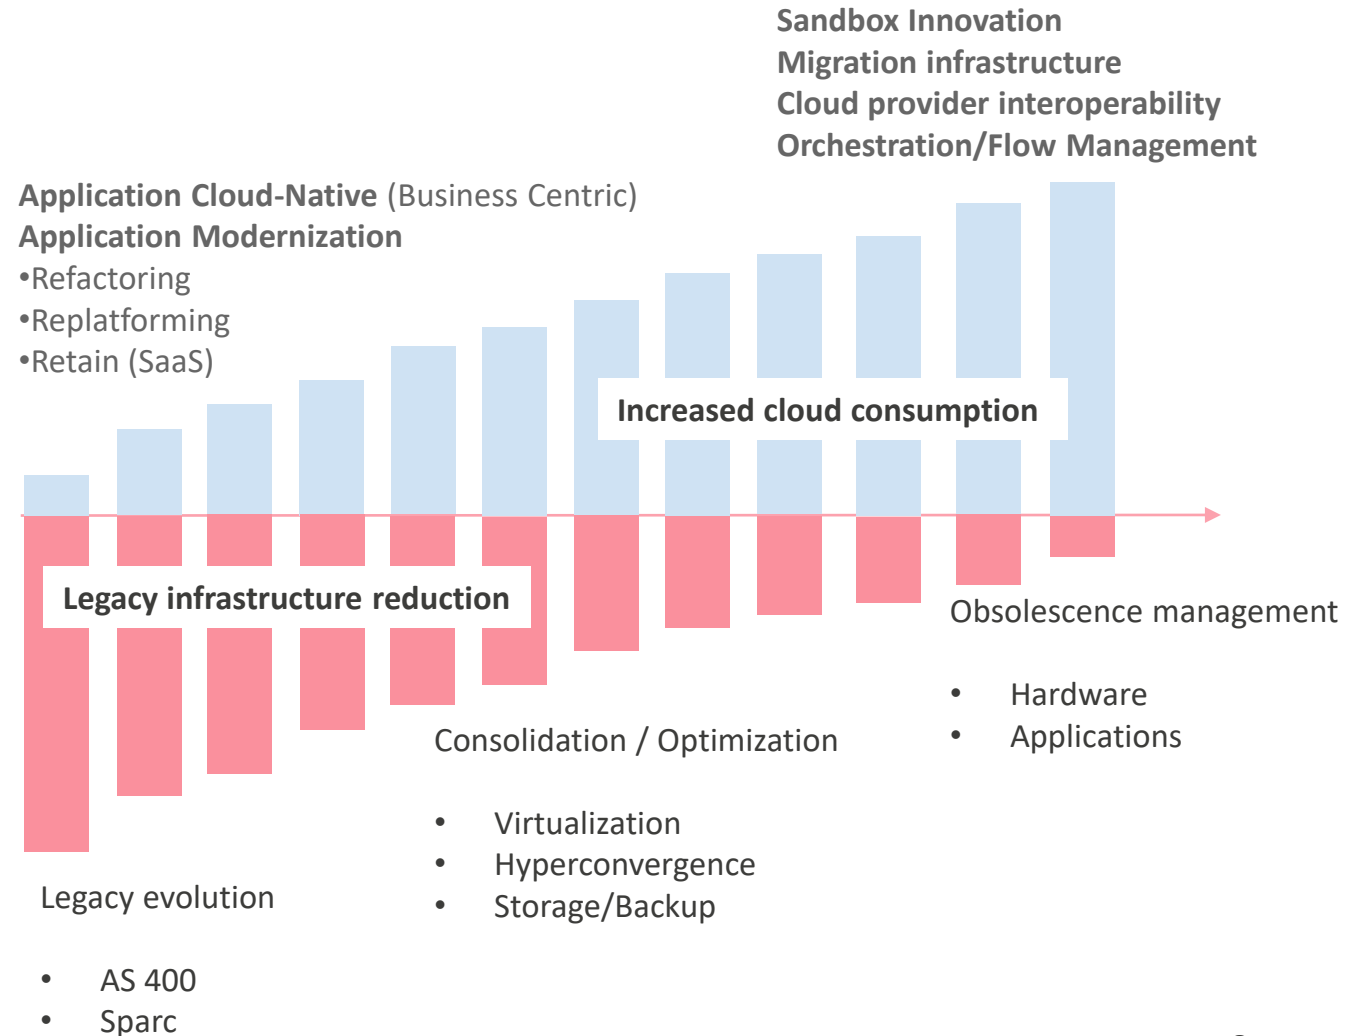

Learn

- **Onboarding plan:** Personalized onboarding plan for your teams, integrating training courses and their distribution in migration teams
- **Migration Pilot:** Validate migration principles
- **Pilot phase assessment:** Integrate lessons learned for the final deployment phase

Maintain

- **Scripts:** Deployment Automation Scripts (Terraform)
- **Handover to Operations:** Validate all applications are functioning properly

What? - We are at your side to transform your I.T. efficiently

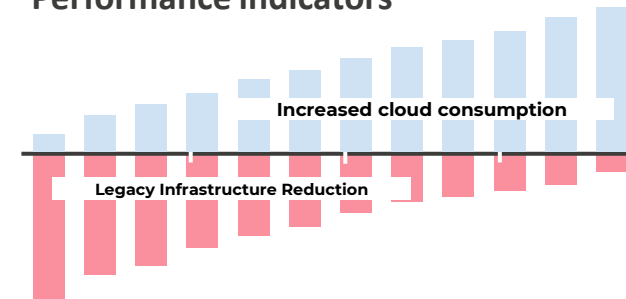

Vision of the target solution

Your applications, services, and servers, operational, and highly available in Azure

Success

Improvement and Continuity of Service qualify this migration and its outcome. You appreciate having easy access to your systems in Azure.

Performance indicators

Continuity

Support you to leverage Azure's value-added services: Kubernetes, IoT, Datalake, Big Data, AI

Creative tech for Better Change

A new brand dedicated to the Microsoft partnership.

Helping you to adopt cloud enterprise-wide and explore its untapped value.

As a go-to Microsoft portfolio partner with over 1100 certifications, you can trust us to reach the highest heights of Azure performance, enterprise-wide, in a secure way. Embrace the value of working with a Microsoft Gold Partner with 16 gold competencies and 3 Advanced Specializations:

- Modernization of Web Applications to Microsoft Azure
- Windows Server and SQL Server Migration to Microsoft Azure
- Adoption and Change management

Our 800+ Microsoft experts will guide you through unleashing the Cloud's untapped potential.
