# Microsoft Defender for Endpoint

## Take the next steps to protect you workforce.

Endpoint devices are the weakest link in every business's network, where most breaches find their origin. With remote working being the new normal, this reality is amplified.
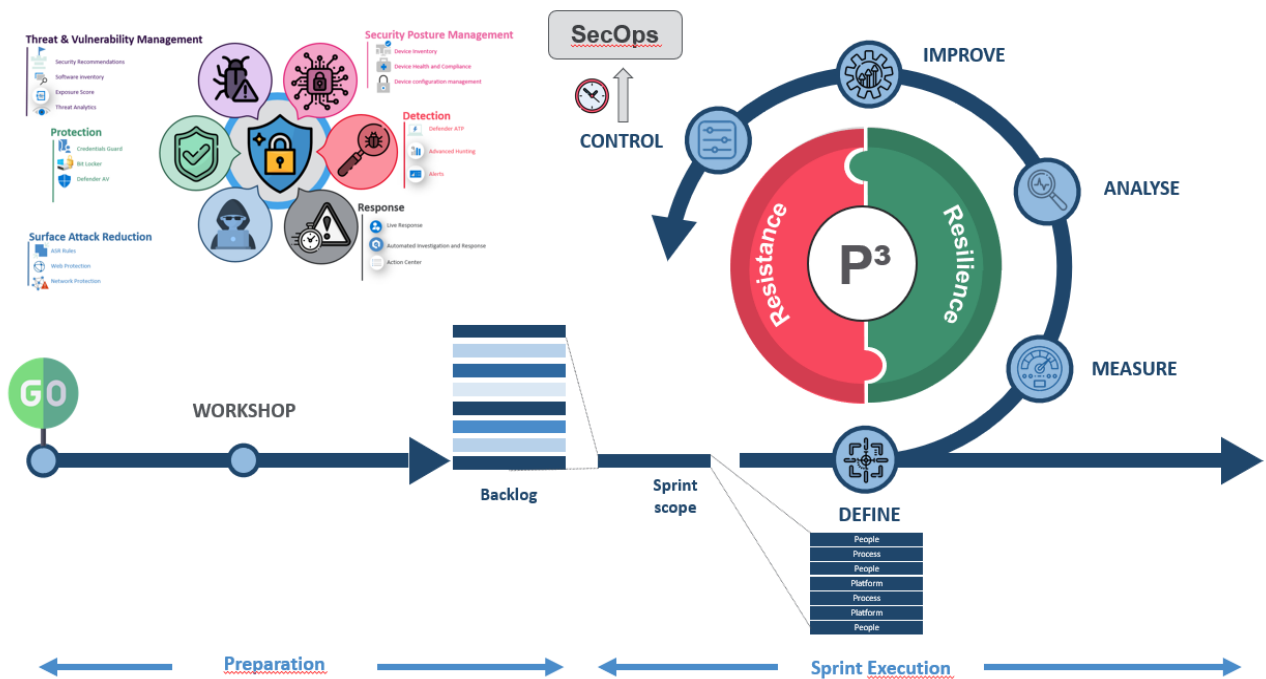

Are you comfortable with your current endpoint security? Do you have a view on the significant vulnerabilities in your environment? Are you able to respond quickly to an outbreak?

If you have licensed Microsoft Defender for Endpoint (or plan to), then you are ready for the next steps, and we can guide you on this journey.

### Our approach

- An **agile and iterative** process to improve the security posture of your endpoints
- End-to-end solution covering **people**, **process**, and **platform**.
- A pragmatic and systematic **result-driven** approach.
- **Together with you**, each step of the way.

## What we offer

- **Warranty** of improving your security posture.
- Possibility of a **managed service** to continuously improve the security posture of your endpoints.
