

Azure VMWare Solution

Case study

French public establishment in charge of the delivery of works and development operations for national events

Our Offer

Azure VMWare Solution - AVS

OBJECTIVES / NEEDS

This customer currently has a VMware On-Premise cluster.

Three challenges:

- Securing their VMWare infrastructure
- Setting up a DRP/CPD
- Rely on cloud solutions for simplicity.

TACTICS

Implementation of an Express Route.

Deployment of the AVS infrastructure.

Implementation of the VMs replication.

RESULTS

Provisioning of a "PCA" service that secures the infrastructure and allows for service continuity.

Freedom from hardware constraints (Hypervisor, network infrastructure).

Data is permanently replicated in the cloud.
