

Your KPIs and scorecards wherever you are

Companies have a hard time assessing their business performance. Data is usually scattered, and metrics are not measured up against common goals. PowerBI Scorecards gets all performance indicators in one place, making management easier than ever.

What is PowerBI Scorecards?

PowerBI Scorecards is a centralized scorecards and key performance indicators system that uses Power BI as a tool for data analysis.

Why customers use PowerBI Scorecards

- Manage KPIs in a centralized platform
- Set up individual and global KPIs
- Sync organizational data with Power BI
- Importing their current scorecards from Excel files
- Exporting their new scorecards to Excel or Power BI

Problem: assessing business and employee performance

- Nobody likes to fill scorecards
- Everyone uses their own method
- Data is scattered everywhere

Solution: consolidate your KPIs and scorecards

- Set individual and global KPIs
- Manage everything from one place
- Analyze data clearly thanks to Power BI

And there's more:

- Import data automatically from a SQL database or Excel
- Export data to Excel
- Automate the scorecard process

Things should be run from one place

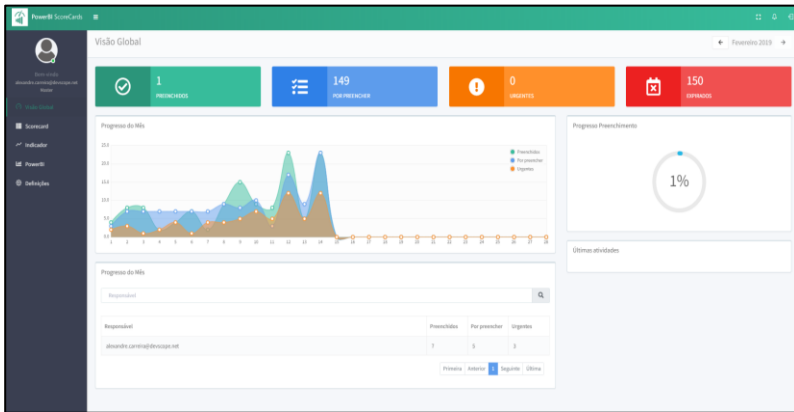

Measure how your business is doing

Do more from a single platform

"An excellent platform that helps our organization set up internal scorecards and KPIs."

Save time and effort gathering, managing and reporting performance information from your organization by setting up a scorecard system with Key Performance Indicators (KPIs) for different teams and individual employees.

Automate the scorecard process by connecting **PowerBI ScoreCards** to a **SQL** database or **DAX** query and save employees the unreliable, tedious and time-consuming task of manually reporting KPIs. This also means saving the organization many hours each month, since most data can be automatically fetched and added to the scorecard, and employees notified to timely fill in any necessary manual information input.

PowerBI Scorecards Customers

With PowerBI Scorecards, you'll be able to:

- Manage all your company's scorecards and KPIs from a single platform
- Set KPIs with weight, measure units, and performance formulas
- Get a clear picture of how your employees and business are doing thanks to Power BI
