The smart way to process your data

A single platform to extract and process your data

SmartDocumentor Cloud takes away the trouble of manually extracting data from business invoices, bills, expenses, written documents or even audio and video files.

Powered by Microsoft Azure Cognitive Services, SmartDocumentor Cloud uses AI to pre-validate and process data from multiple sources and integrates it into your company's system via API, becoming part of your inbound and outbound process, reducing operational costs and cutting time spent on these tasks by up to 99%.

Invoices & Receipts

Stop manually inputting data from invoices and receipts and automate the process with highly accurate AI-powered data extraction.

Custom Templates

Train SmartDocumentor Cloud's dedicated AI engine to extract data from any document layout you use.

Audio and video to text

Extract text from audio and video files with SmartDocumentor Cloud's AI engine and reduce the time spent transcribing by over 99%.
