Sample DevSecOps Platform

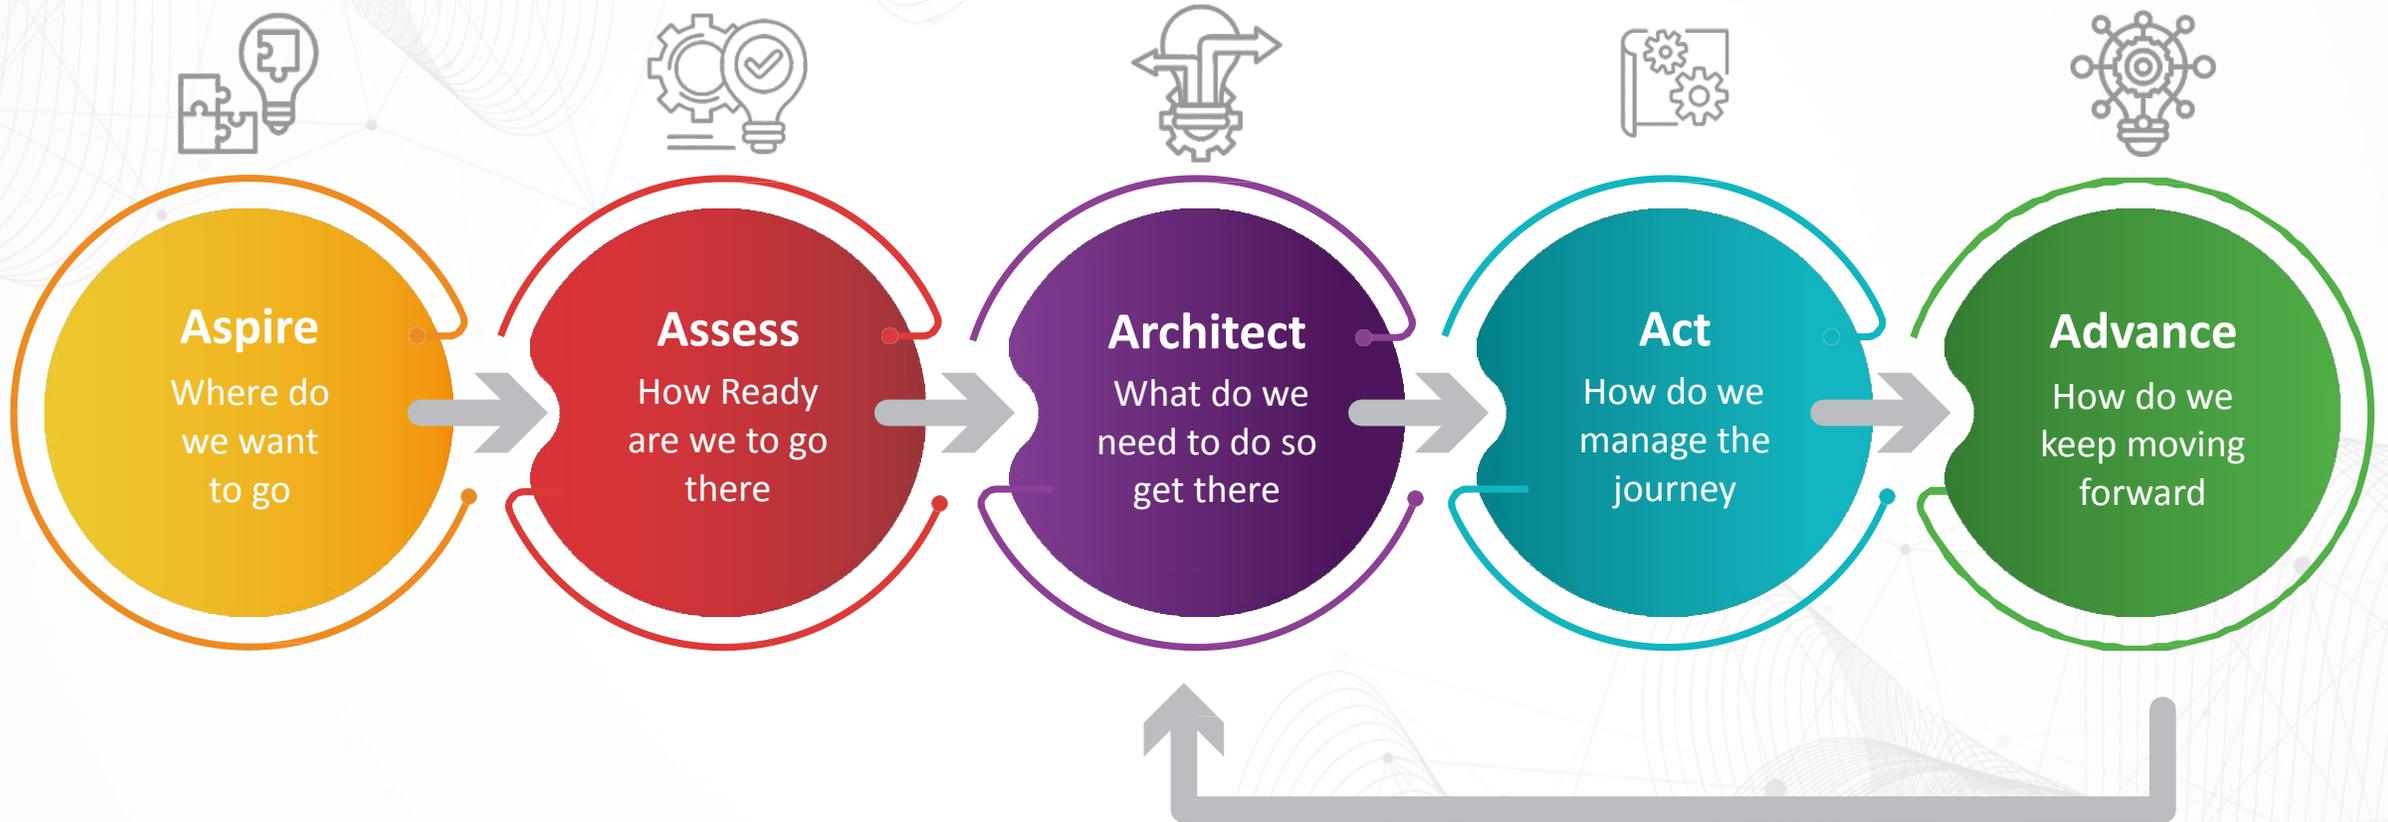

Helping customers in streamlining, automating, adopting the "best solution of choice" to improve their operational effectiveness thereby improving Software / IT teams performance

Life Sciences Solu on Provider had an IT team has 11 employees who are responsible for IT maintenance and troubleshooting at five office loca ons, servicing nearly 1200 employees. Before adop ng Jira Service Management, the team communicated with users via email or phone, or in person. But tracking progress and assessing workloads was a big challenge.

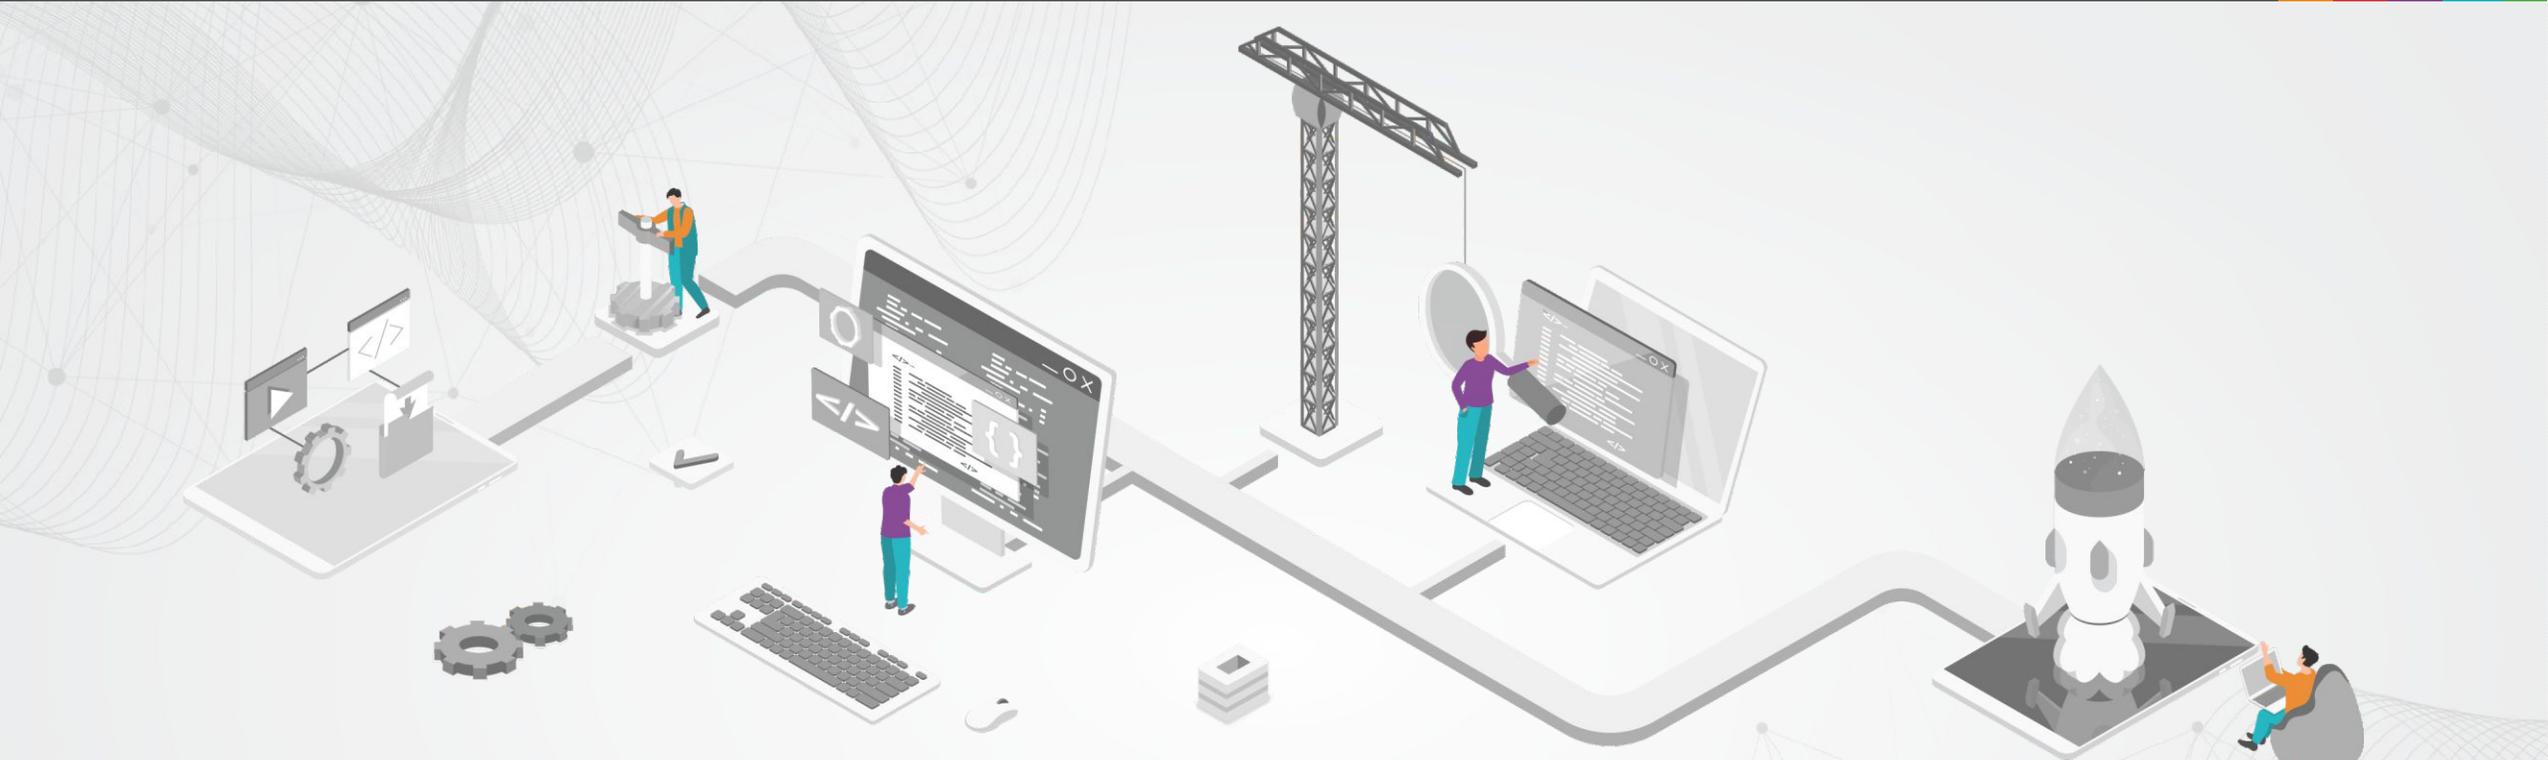

DevTools team had carried out Gap Analysis & an approach for migra on of 200+ repositories. GitHub as the largest open source pla orm caught their a en on & made a quick decision to adopt GitHub enterprise as the pla orm of choice. Our team helped with migra ng the repositories over to GitHub along with DevOps Prac ces

Leading global technology company providing enterprise resource management solu ons, consul ng, and data analy cs services to a mari time industry where business meets technology. Team was supporting Shipping Enterprise Resource Planning (ERP) solu ons to mul ple Liner Shipping and Ship Management companies.

DevTools team proposed JFrog Ar factory as solu on to leverage the tool and take advantage of every feature that Ar factory offers along with Xray to take care of their supply chain in the code. We helped with Implementa on of tool, integra on with other DevSecOps tools and best prac ces
