

LIFT & SHIFT FEASIBILITY ASSESSMENT

CREATING A CLEAR PATHWAY

Assessing and planning your move to the cloud isn't always easy. Based on our experience moving companies into a cloud world we've build a framework that creates a clear pathway. With this assessment you'll be able to correctly plan a cloud migration and start delivering the cloud value to your business.

MIGRATION SCENARIOS

- Level 1: Lift and shift**
 - Fast move your virtual machines to the cloud
 - Benefit directly from cloud flexibility

- Level 2: Re-platform**
 - Use platform possibilities of the cloud
 - Your workloads can take advantage of cloud capabilities
 - Optimizing cost

- Level 3: Re-factor**
 - Re-architect / re-code application
 - Full usage of cloud capability
 - Lowest cost

RUNNING THE ASSESSMENT

The DexMach lift and shift feasibility assessment is done in 2 distinct phases:

1. We ingest as much information from the current environment as possible. Based on this delivered information we can build up our custom analysis.
2. The analysis information is discussed during lift and shift workshops. Business requirements and technical inputs will be brought together to create 3 main deliverables:
 - a. A documented Lift & Shift flowchart
 - b. Categorization of existing application for the move
 - c. High-level planning on how the move can be executed
 - d. Delivering small cookbooks to facilitate the move

During the assessment workshops we continuously re-evaluate based on feedback and optimize where needed.
