

## AZURE FIREWALL AND DDOS PILOT (10-DAY)

### AZURE FIREWALL & DDOS WORKSHOP (3-DAY)

The goal of these workshops is to firstly identify which topics are valuable to you and secondly engage with your stakeholders in these specific topics surrounding Azure Firewall & DDOS protection. This can go from integrating Azure Firewall into a pre-existing environment to enabling transparent DDOS protection with end-to-end monitoring. During these workshops we will further zoom in on your security posture, ambition & possibilities on Azure.

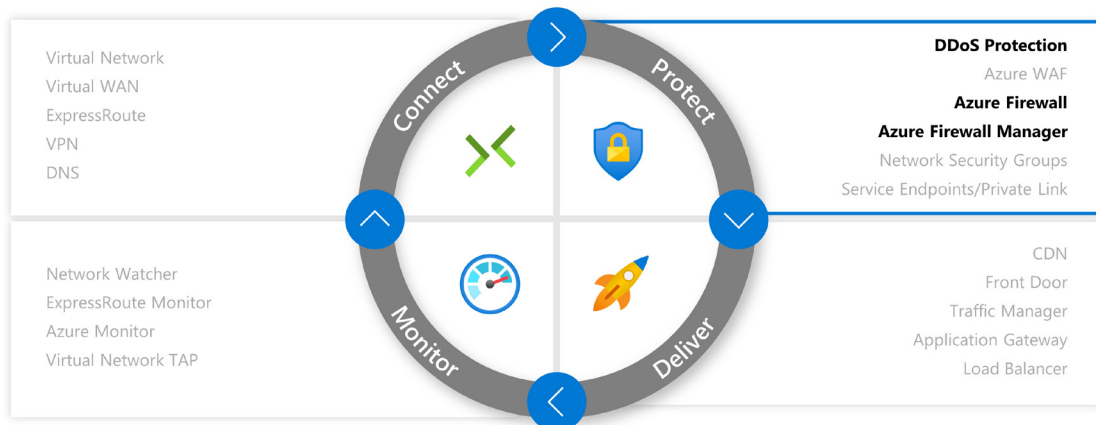

#### ACTIVITIES

##### - Discovery Workshop

- o Capture the today's security concerns as input for the tailored network security & resiliency workshop.
- o Understand Azure Security capabilities, like Azure Firewall Standard & Premium, Virtual Networks, Azure DDoS Protection & more.

##### - Tailored Network Security & Resiliency Workshop

##### - Scoping workshop for POC use cases

### PILOT IMPLEMENTATION (7-DAY)

Engage in a pilot to build a solution that directly impacts the security posture of the your cloud environment. For example, you want to build a secure network in Azure and extend it to your on-premise environment.

#### ACTIVITIES

- Build your secure network in Azure and extend it to your OnPrem environment: protect your cloud resources with Azure Firewall & DDoS protection.
- Assess and understand how built-in cloud security improves your organization's security posture.
- Learn about tools and services that can mitigate risks.
- Explore recommendations and next steps based on pilot outcomes (security roadmap).
- POC Wrap-up & handover

Deliverables: pilot use case implemented with technical documentation.
