

Digia
Analytics Fast Track
Module 10 day package

Trusted operator
in making sense
of data

- Over 70 experts
 - AI, Machine Learning, Data Science
 - BI ja Business Consulting
 - Data Engineering
- Consulting/projects/continuous services
- Technology independent

- Over 30 experts in Power BI in DDS alone
- Stack also includes Tableau, Alteryx, Grafana, Qlik etc

Key stages in leading with knowledge

Understand business and
user needs

Define the business
objectives and user
needs

Provide information
to match the need

Use modern tools that
visualize and provide
information easily

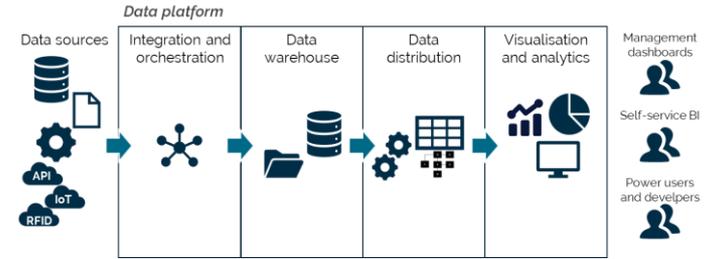

Measure and follow the
right matters

Measure the impact &
develop continuously

Digia solution

Analytics Fast Track Development

Need: New insight for decision making

Data-driven businesses today require more comprehensive information and analyses for supporting data insights. Analytics is foundation for everyday decision making. Advanced analytics offer new insight which enables development of customer experience, automating of complex processes and management systems in successful organizations.

Digia Fast Track consulting provides a presentation of key aspects and supporting materials defining business requirements for Analytics development and needs prioritized. Key data sources are also review during consulting work. Architecture guidelines and technology recommendations are also given.

1. Get started with Analytics Fast Track consulting package

Analytics Fast Track implementation with results in 10 days

- Identification of requirements (business, IT), targets and prioritization set for Analytics solution development.
- Analytics and data architecture planning and development road map visualization.

Provides a foundation for Data Platform and first data pipeline(s) implemented as well as proof of business value created by the data and analytics.

2. Proceed with MVP/Pilot phase with Analytics accelerator

Analytics Pilot implementation in 8 weeks.

- Accelerator helps implementing AI (MVP) solution with first data sets validated with Power BI visualizations.
- Implementation is based on Azure templates and AI-accelerator for fast results and enabling further implementations.

Iterative implementation model with use case scoping and prioritization, new data content recognition, preparation, integration and visualizations

Digia solution

Analytics Fast Track

Get started with Fast Track approach
