

BUSINESS INSIGHTS-SIMPLIFIED

**FACT
WEAVERS**

Why FactWeavers?

Addressing the data disconnect

Limited Access for Business Users

Business Users often lack the access to interpret and extract insights from data. This leads to lost opportunities due to lack of data and insights to base business decisions on.

Tech-Business Misalignment

Technology Teams lack the domain expertise needed to interpret it effectively. This results in a misalignment between what's delivered technically and what's needed for business insights.

Siloed Data Across Fragmented Systems

Domains & Business Functions are fragmented across disconnected systems and tools creating data silos. Insights are therefore distributed, and business questions are tough to find answers to.

No Unified Data Model

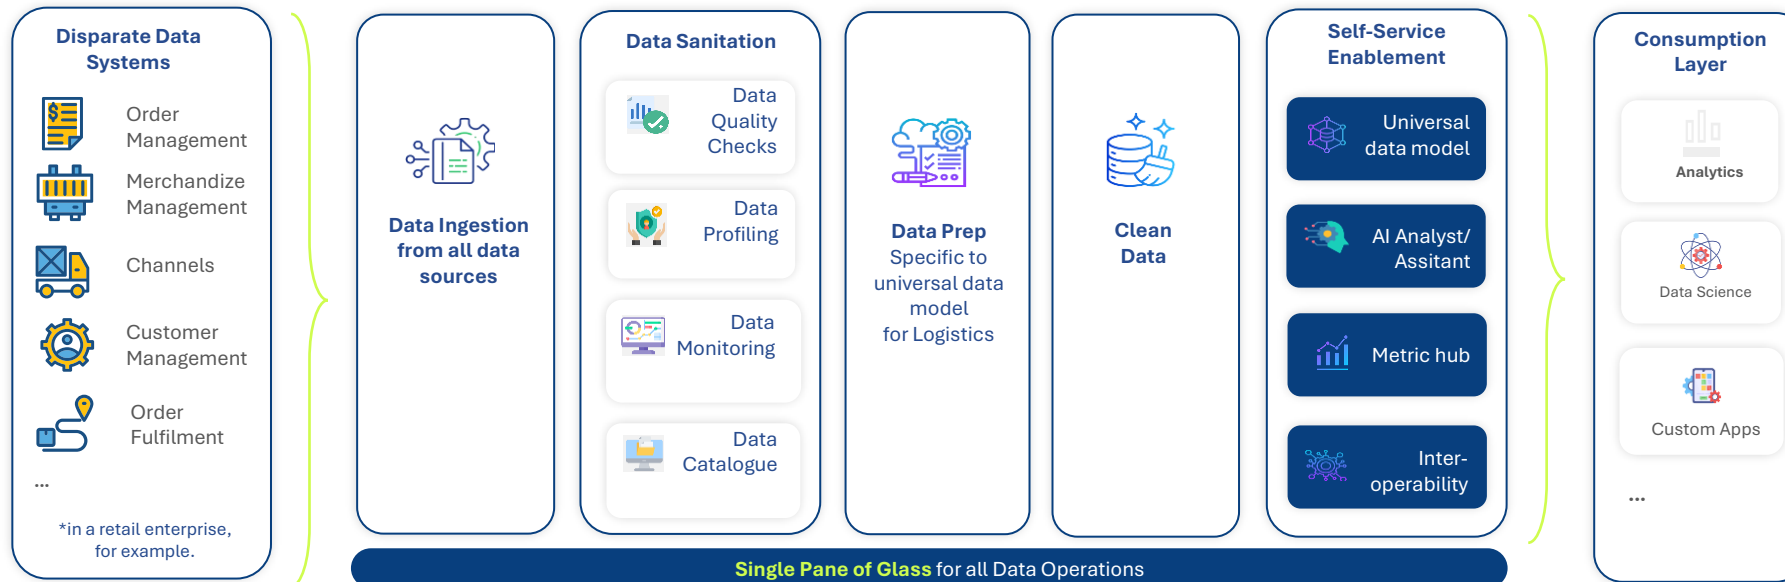

Lack of single source of truth and a common language of data. This lack of a unified data model leads to inconsistent reporting, confusion in communication, and ultimately, misinformed decisions.

FactWeavers | OnTap Data & Analytics

FactWeavers is a low-code/ no-code self-service AI Data platform to,

- **Unify data** from multiple data silos, **prepare data** for consumption
- **Discover, explore** and **analyze** data – **Business users** have **direct access** to data
