

Objective

To comprehensively understand the client's existing data environment and to delineate the prospective advantages of transitioning to Microsoft Fabric.

Duration

2 -3 hours

Agenda

1. Introduction (15 minutes)

- Welcome and introductions
- Objective of the session
- Overview of the client's organization and background

2. Current Systems Analysis (30-40 minutes)

- Overview of current on-premises and big data platforms
- Understanding the existing technical architecture and configurations
- Identifying the strengths and weaknesses of the current setup

3. Azure Benefits Overview (30-40 minutes)

- Brief introduction to Microsoft Fabric and its offerings
- Highlighting the potential benefits of transitioning to Fabric, including:
 - Scalability and flexibility
 - Enhanced security features
 - Cost-efficiency
 - Advanced big data and analytics capabilities

4. Interactive Q&A and Discussions (20-30 minutes)

- Addressing queries related to Fabric and the transition process
- Gathering initial reactions and feedback from the client
- Discussing potential concerns and how they can be mitigated

Deliverables

- **Analysis Report:** A report highlighting the analysis of the current systems and an overview of potential Azure benefits tailored to the client's setup.
- **Next Steps Document:** A document outlining the recommended next steps in the transition process, setting the stage for the detailed planning phase.
