

HR Analytics Packaged Solution for Workforce Diversity Management

Are you looking to enhance your HR team's capabilities in managing workforce diversity, optimizing hiring processes, and improving employee retention? Look no further! DSI is proud to introduce our HR Analytics Packaged Solution, available now on the Azure Marketplace.

- 1) **Best Practice Data Model:** Our solution provides a comprehensive data model designed to capture the entire employee journey, from recruitment to off-boarding. This data model is based on industry best practices, ensuring that you have a solid foundation for your HR analytics initiatives.

- 2) **Data Pipelines:** We've included all the necessary data pipelines to efficiently and securely engineer data from your source systems. This ensures that your HR data is consistently updated, clean, and readily available for analysis.

- 3) **Best Practice Reports:** To help you make data-driven decisions at every stage of the employee journey, our package includes one best practice report for each stage. These reports are designed to provide actionable insights and facilitate informed HR strategies.

Employee Profile (as of 2023-Aug)

Why Choose DSI's HR Analytics Packaged Solution:

- ✓ **Expertise:** Benefit from the expertise of DSI's experienced professionals who have a deep understanding of HR analytics and diversity management.
- ✓ **Scalability:** Our solution is scalable to meet the needs of organizations of all sizes, from startups to large enterprises.
- ✓ **Support:** We offer dedicated support and training to ensure your HR team can maximize the value of this solution.
