INTRODUCTION

Productivity enhancement via digital transformation has shown its prowess to lower costs and improve margins. The Maritime industry is embarking on this wave slowly but steadily. To stay competitive, you need to constantly finetune processes and stay innovative. Automation is the key to your success – and it’s easier than you think.

Introducing Supply Logic 365[®], a full suite of software solutions specifically designed and developed for the Ship Supply Industry. With an embedded AI / ML engine and seamlessly integrated function modules, Supply Logic 365[®] automates your processes from end to end. On average, our satisfied customers reported a 25% improvement in sale orders success rate and 100% quality consistency in global RFQ.

Core Capabilities of Supply Logic 365[®]

Built on SL Auto Bot[®], our AI / ML Translator Automation Middleware

- Automate RFQ Sales Processes
- Vessel Schedules and Officers Assignments
- Operation Management
- Owner's Stock Logistics
- Smart Warehouse Management System
- Smart Inventory Management

Supply Logic 365[®] is easy to deploy and operational-ready. Highly scalable and fast to roll out, Supply Logic 365[®] makes positive impacts on business success metrics that are quick to measure and transparent to evaluate.

WHY SUPPLY LOGIC 365

“
WE HELP TO RAMP
UP YOUR MARITIME
SUPPLY CHAIN TO
FACE THE NEW ERA
CHALLENGES

A GAME CHANGER

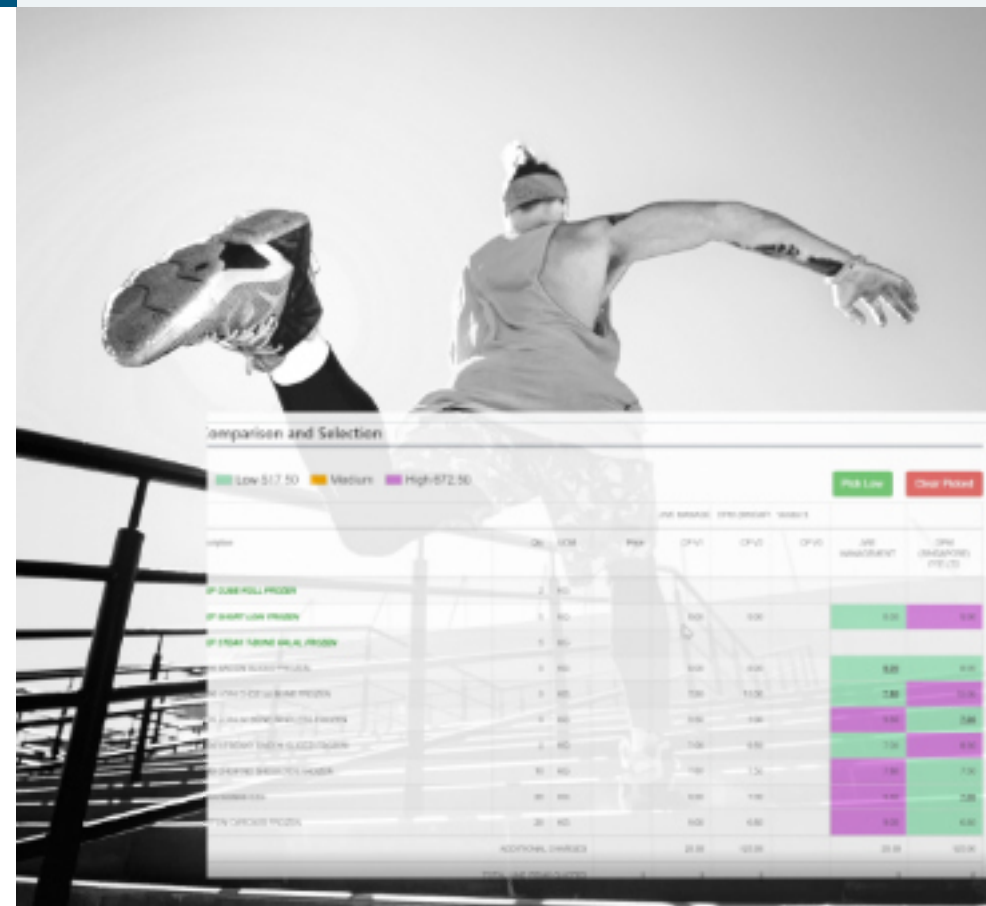

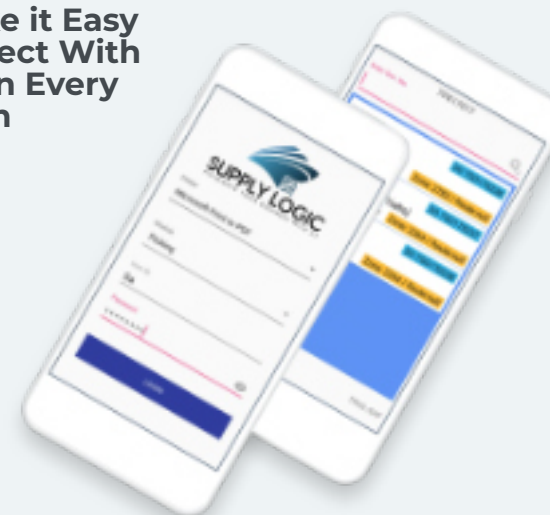

Supply Logic helps you to streamline workflow from end to end, integrate data and suggest the best course of action in every process. No more missed sales due to delayed response, no more hiccups due to error in pricing!

Supply Logic brings clarity and transparency throughout RFQ, vendor selection, stock and warehouse management processes, giving you insights to enable business growth, ensuring profit maximisation.

BECAUSE WE KNOW YOUR BUSINESS

Our belief is that our ship supply software solution is the most efficient and automated in the market. With a highly dedicated team with solution architects, business process analysts, developers, data-scientists to warehouse and financial consultants – we together co-developed Supply Logic 365, an AI & Machine-driven ship supplier solution that allows you to operate 365 days with great ease.

We Make it Easy
to Connect With
Users On Every
Platform

“
IN SHIP SUPPLY
BUSINESS, SPEED
AND ACCURACY ARE
THE ESSENCE TO
SUCCESS

HOW SUPPLY LOGIC CAN HELP

In fact, you can spend 40% of your working hours on tasks that do not generate income.

While founders and CEOs work hard to keep ahead of the growing complexity, they face constant interruptions from technical distractions, leading to a loss of focus: they de-prioritise customer acquisition and retention, and lose market share to competitors as product innovation takes a back seat.

LET COMPUTING WORKFLOW HANDLE YOUR RFQ

SUPPLY LOGIC 365 offers solutions across a wide range of areas:

With our Supply Logic Auto Bot module, Supply Logic 365 can auto grab all the RFQs from sources and translate into useful data and back to Supply Logic 365 – our Ship Supplier Solution.

With our Automated Sales Quotation modules, Supply Logic 365 can auto suggest and generate pricing based on a fixed price agreement or a policy rule.

With our Vendor Comparison feature, Supply Logic 365 allows you to compare all your suppliers submitted pricing at one glance.

With our Smart Warehouse module, Supply Logic 365 gives you instant visibility across warehouse zone/bin to monitor stock inventory level and easily locating items' whereabouts.

FACT'S IN NUMBER

On average, our satisfied customers reported a 25% improvement in sale orders success rate, 100% quality consistency in global RFQ and 20 times faster in RFQ processing as compared to competitors.

20 TIMES FASTER
RFQ PROCESSING

FIRST OF THE KIND
FOR SHIP SUPPLIER

24X7 SUPPORT

SINGLE INTEGRATED
SOLUTION

we build sophisticated digital solutions that open the purchase path and align our goals from sales, to order fulfilment to warehouse and boarding management for ship suppliers

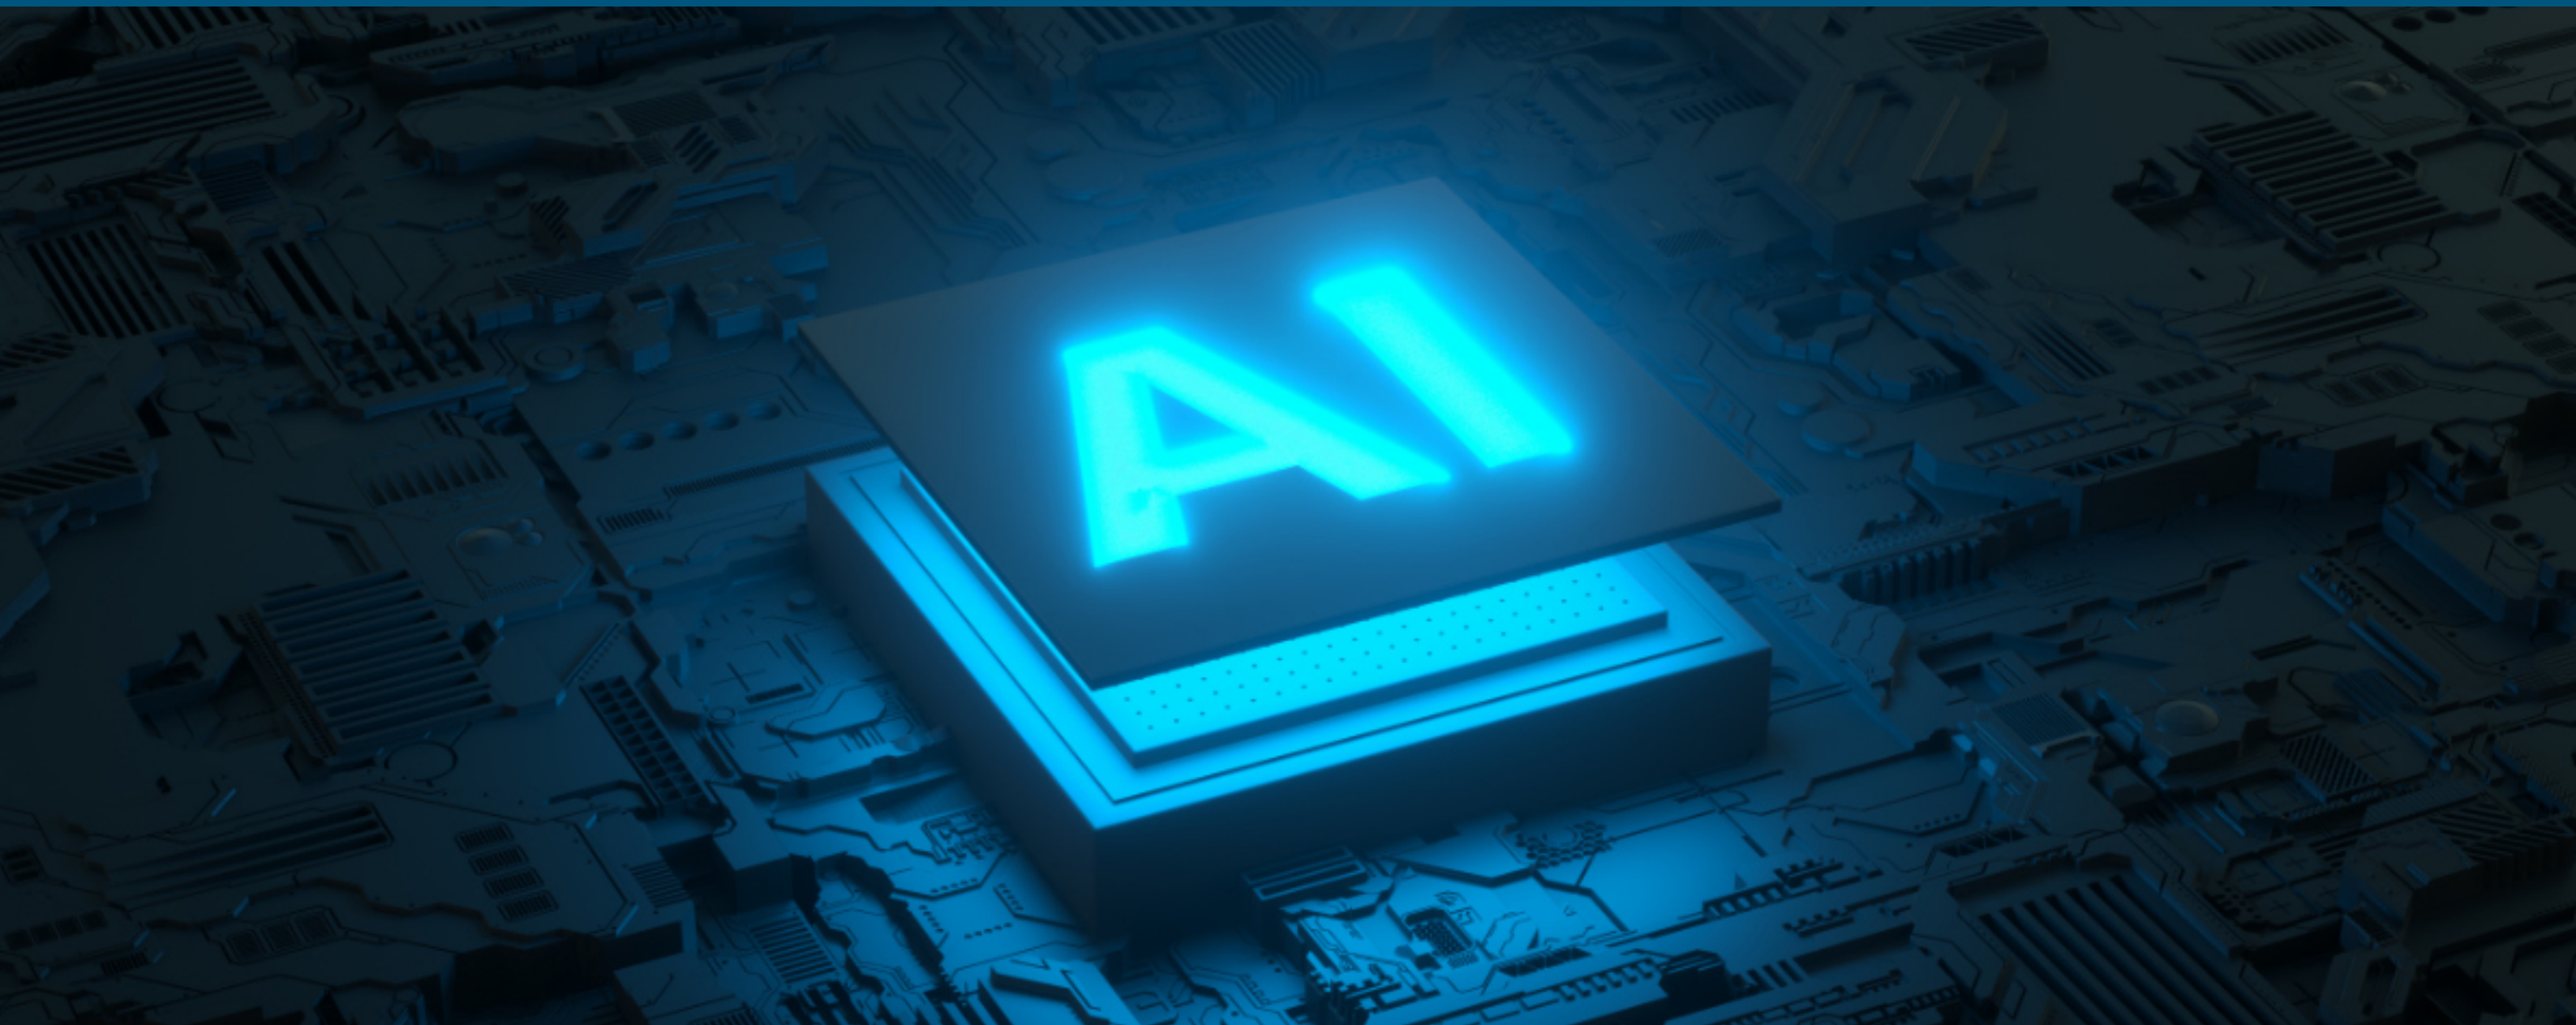

Super Charge Your RFQ Processing, Categorizing, Calculation and Analysis, Documentation, Order Fulfilment and Onboarding Arrangements With Our AI & ML Capabilities

TECHNOLOGIES

It took the team almost 2 years to fully map out ship supplier's challenges and requirements and design onto Microsoft business application coupled with AI and Machine automated RFQ solving capability.

CHALLENGES

It's not a secret that Artificial Intelligence (AI) and Machine Learning (ML) are some of the latest technologies that are bringing the most change to the world today especially when they're applied to Supply Chain. Artificial intelligence is the process of transforming raw data into actionable intelligence used by businesses to be more efficient, optimize performance and to find new opportunities which in turn increase your revenue stream. In these times of growing complexity in the maritime industry, it is essential to know that your supply chain initiatives need to be accelerated with the right business intelligence to bolster your Ship Supply business.

SOLUTIONS WE PROVIDE

Automated Sales RFQ Management

- Integrated SL Auto Bot Engine
- Automated Receiving of RFQ
- Integrated flow between RFQ and Sales Quote
- Assign/Create and Auto-detection of Marking Number
