

PRATUS – PREPARE, PREDICT, COMMUNICATE, & DECIDE

Crisis Support Technology for Before, During, and After Any Event

OUR MISSION

Our mission: save lives, protect the environment, and build resilient communities through our decision-support technologies.

PROBLEM

Gaining real-time and accurate information during crises poses a challenge for crisis managers. Fragmented data sources from social media, news reports, internal systems, and field reports make compiling and sifting through information difficult. When crises hit, the flood of data can overwhelm, making it even harder to sift through the noise and find the crucial information needed for timely decisions. Given the rapid and unpredictable nature of crises, keeping up-to-date with information becomes more complex, complicating responses.

SOLUTION

Built by practitioners, for practitioners, PRATUS is an all-in-one crisis management software that drives smarter decision-making. PRATUS provides a unified communication channel for rapid communication across organizations, leveraging AI-powered features within Microsoft Teams to predict, prepare, and decide for any event.

PRATUS EXERCISE WORKSPACE

- Centralizes readiness exercise planning and reporting.
- Facilitates comprehensive planning, execution, and post-exercise analysis.
- Supports collaborative decision-making from initial planning to detailed after-action reports.

PRATUS INCIDENT WORKSPACE

- Promotes secure collaboration and communication among stakeholders.
- Integrated with Teams-SharePoint for secure document management on One Pane of Glass®.
- Improves collaboration with file sharing, co-authoring, and real-time meetings.

RAPID SITUATIONAL AWARENESS

- Enables data-driven response to challenges through automated alerts and notifications.
- Delivers timely updates on event statuses and team actions.
- Maximizes operational effectiveness and minimizes impact.

PRATUS FOR MICROSOFT TEAMS

- Keep your response team focused and productive during the incident in the familiar Microsoft Teams environment.
- Instantly create dedicated Incident Workspace Team Sites using PRATUS, customized to your specific templates and incident types.
- Automatically synchronize rosters and invite external stakeholders, facilitating seamless cross-organizational communication.
- Improve situational awareness with PRATUS alerts, keeping teams updated on event statuses and actions.
