# ProSolutions Saves $3 Million Using Cameyo

Overview

ProSolutions Software is a leading provider of all-inclusive spa & salon management software, with over 1,800 establishments relying on their solution each day.

"Our initial testing went incredibly smoothly. We needed our customers to be able to use the application just as if it were installed locally, and that's exactly the experience they have now with Cameyo."

Deal Size – 1800 stores; ~5,000 users

Win Date – June 2018

Vertical – Independent Software Vendor

Location – United States

Win Results

App Redevelopment Not a Real Option

Estimated cost to redevelop the application was $3–5M, would take 18 months to complete and would only have 70% parity with the current app.

VDI and AWS Could Not Deliver

VDI was too complex and did not live up to the high standards for user experience customers had been used to. AWS required an entire technical service team to deploy and run.

Cameyo Delivers at a Fraction of the Cost

ProSolutions turned to Cameyo. In a week, customers were able to access the full version of the app from the browser on any device. The solution requires next to no management and saved ProSolutions more than $3M.
