

Discover data use cases and AI opportunities at your company

STRATEGIC DATA WORKSHOP WITH DMLAB

We are friendly data scientists. We believe in the power of data. We like working together with our customers to build data driven solutions for them. Our offer is an acceleration package towards digital transformation.

See what customers are saying:

"It was a revelation to work together with the Dmlab team. They wanted to understand our business logic and answering their questions we had to face our own data issues. The data-based solutions Dmlab finally implemented at CET proved that more digital means more profitable."

—Dr Bence Banka, CEO, CET Energy Trading

WHAT WE OFFER

Assessment of current data culture and data competency in your organization.

Mapping your company's data flow: sources, pipelines, structure and dashboards.

Discover business cases to make use of digital transformation.

Input to a future data strategy that should be incorporated in business and IT strategies..

In the workshop we work together with the company's business executives and data experts to adjust data solutions to business focuses.

Outcome of the program

- An assessment and a report of digitalization and AI use cases at your company.
- An expert recommendation for the first data science pilots implemented on an Azure Data Platform to verify ROI of use cases for the business.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
