

# What's New in Docker Business

Accelerating enterprise innovation with a robust containerized development solution

Docker Business is tailored for medium- and large-sized enterprises, addressing their unique needs for security, management, and scalability without added complexity. Now, the updated Docker Business plan is packed with more features, increased usage limits, and simplified pricing. Docker Business provides access to the full suite of Docker's products and services including:

## **docker.desktop**

All of the Docker Desktop features you enjoy today, built for developer and business velocity. In the past year, we've achieved [SOC 2 Type 2 compliance](#) and ISO 27001 certification, as well as introduced many new features including Builds View, Build Checks, and enhanced security features including role-based access control.

## **docker.hub**

Docker Business includes Hub essentials such as private and public repositories, plus **uncapped pull rate limits and a 1 million Hub pull count per month**. To ensure that Docker Hub remains sustainable and continues to grow as the world's largest container registry, we're introducing consumption-based plans for image pulls and storage. This update also includes enhanced usage monitoring tools, making it easier for customers to understand and manage usage.

## **buildcloud**

**We've removed the per-seat licenses for Build Cloud and increased the included build minutes to 1500 per month** — enabling faster, more efficient builds across projects using cloud-based builders, shared cache, and native multi-platform builders.

## **Testcontainers Cloud** by docker

Testcontainers Cloud helps customers streamline testing workflows, saving time and resources. We've **removed the per-seat licenses for Testcontainers Cloud** under the new plans and **included 1500 cloud runtime minutes per month** for Docker Business, available to use for Docker Desktop or in CI workflows.

## **scout**

Docker Business offers continuous vulnerability analysis for an **unlimited number** of Scout-enabled repositories. Docker Scout's [health scores](#) help you maintain security and compliance with ease.

### Capacity Increase

**Purchase additional** Hub pulls, Hub storage, Build Cloud minutes, and Testcontainers Cloud minutes as your needs grow.

## More Value in Docker Business

	Docker Business (before Nov. 15, 2024)	Docker Business (after Nov. 15, 2024)
Containerization essentials including Docker Desktop	same	same
🔒 Hardened Docker Desktop	yes	yes
🔒 Single sign-on (SSO) & SCIM	yes	yes
🔒 VDI support	yes	yes
🔒 Image and Registry Access Management	yes	yes
🔒 24-hour support response	yes	yes
Docker Hub public repos	unlimited	unlimited
Docker Hub private repos	unlimited	unlimited
Docker Hub image pull rate limit	200 pulls per 6-hour period	uncapped
Docker Hub image pull count	Up to 5000 pulls per user per day	1M image pulls per subscription per month
Docker Scout enabled repos	3	unlimited
Docker Build Cloud minutes	800/mo	1500/mo
Docker Build Cloud users	\$5/user	All Docker Business users are included
Testcontainers Cloud minutes	n/a	1500
Testcontainers Cloud for Desktop users	\$35/user	All Docker Business users are included

🔒 Only available in Docker Business.

Commercial use of Docker Desktop at a company of more than **250 employees** or more than **\$10 million** in annual revenue requires a paid subscription.
