# A new cloud-native global platform for the future of insurance

DOCOsoft Vew is a next-generation SaaS claims management system designed from the ground up to meet the current and future needs of (re)insurers around the world.

Unprecedented insight and oversight

DOCOsoft Vew's market-leading data analytics capabilities generate real-time insights to improve claims processing and decision-making. Continually updated to deliver the latest available functionality, DOCOsoft Vew empowers (re)insurers to thrive in a rapidly digitalising P&C market, with a data-first approach that harnesses the benefits of AI and machine learning. DOCOsoft Vew delivers comprehensive oversight across the entire claims journey - significantly enhancing your ability to focus adjusters' expertise where it really counts.

Our Cloud Ecosystem

Optimised customer experience, real-time visibility, digitisation efficiencies

Cloud-Native
A fully cloud-native CMS built on a microservices architecture, seamlessly deployed on a fully managed Kubernetes based application platform.

Connectivity and integration

API-First
An API-first methodology ensures seamless integration with all the resources you need to operate optimally.

Flexible and fast-moving

Accelerating Innovation
Agile DevOps for faster, more collaborative and customer-centric development and delivery.

Powered by AI and ML

Advanced Analytics
Powered by AI and machine learning, DOCOsoft Vew's advanced analytics drive improved efficiency and decision-making.

Strategic insights

The future of claims is here right now

DOCOsoft Vew is an agile cloud-native CMS, ready to support you as you move confidently forward to the future of P&C (re)insurance claims. Designed to be ready for Blueprint Two - and to support ACORD EBOT and ECOT messaging - DOCOsoft Vew joins the dots between London market and international market systems.

Your next-generation cloud-based platform

DOCOsoft Vew's next-generation system architecture and functionality create new opportunities to gather global insights. Its AI-enhanced data analytics and reporting support optimal decision making.

Exceptional flexibility and functionality

Customisable dashboards allow users to create multiple different data fields, making light work of tailored reporting. Adaptable claims trends can easily be incorporated to enrich your team's collective knowledge base, benchmarking and forecasting - while role-based permissions give you full control at every stage in the process.

Third-party API integrations enable your internal systems to consume real-time claims data, helping IT leaders run a future-oriented setup alongside legacy systems.

Market-leading security

DOCOsoft Vew is hosted through Microsoft Azure to deliver the full benefits of a resilient cloud-based SaaS solution, backed by an exceptional level of security.
