

# Document Automation in Microsoft 365

[www.kameleon.app](https://www.kameleon.app)

**A 100 person business unit spends  
over 20,000 hours a year creating,  
editing, reviewing and management  
oversight of documents.**

**This costs the business at least  
€700,000\* per year.**

*\* Assuming a labor cost of €35 per hour*

**Every document represents a promise,  
for which the company is responsible.**

83%

of respondents say  
they create (and recreate)  
agreements, proposals,  
contracts and other documents from  
scratch because they can't find the original  
official content.

How do you manage the information in your documents

How do you update changes to users – do the contents change?

How do you guide the storage of documents / manage their lifecycle?

# **TIME WASTED AND CONTENT CHAOS?**

**Kameleon**

**One Solution for Knowledge  
Management and Document  
Automation**

**Do what you already do, better.**
