ACTIVE DIRECTORY PRO

Streamline Your Active Directory Migration Project

Active Directory Pro lets you merge, consolidate, or restructure your Active Directory environment. It securely migrates objects, settings, and properties. You can use it to automate your migration while keeping your migrated and un-migrated users, devices, and applications in sync. Active Directory Pro lets you migrate during normal business hours—without interrupting your users. It's simple to deploy with an intuitive user interface. It also helps shorten your project timeline and reduces error by auto mating complex tasks. And because you can customize it, Active Directory Pro efficiently migrates organizations of all sizes.

Active Directory Pro facilitates consolidation and merging Active Directory environments in a powerful, customizable solution.

MIGRATE
Migration and Consolidation

〉 Migrate objects, settings and properties within and between forests – even on isolated or disconnected networks
〉 Customize to fit even the most complex scenarios – even including global or remote users
〉 Migrate or consolidate without trust requirements
〉 Includes Directory Sync Pro

PLAN
Schedule for Convenience

〉 Schedule your migration for when it fits your schedule – even during business hours
〉 Users keep working during the migration, avoiding disruptions
〉 Avoid stressful late night or weekend migration projects
〉 Reverse changes made at key steps in the process for peace of mind

TRUST
Security and Insight

〉 Zero open inbound ports into the network firewall
〉 Avoids RPC and remote registry access for added security
〉 Built in reports and charts for complete visibility
〉 Real-time data for every step
