DIRECTORY SYNC PRO

Efficiently Sync Your Business with a Shared Directory

During a merger, it's critical for your users to find each other for collaboration. Directory Sync Pro sets up and maintains a sync between multiple systems. It can sync Active Directory forests or Active Directory and Domino Directory. Now, users in merging organizations can find each other in a shared address book. It is flexible enough to adapt to any environment, from the simple to the complex, meeting unique needs for any organization. With Directory Sync Pro, you can efficiently sync all mail-enabled objects, including users, contacts, mail groups, distribution lists, databases, shared mailboxes, rooms, and resources. You also can do a "dry run" to test the synchronization, first. You can fully automate the process, to be confident your data syncs correctly.

Directory Sync Pro establishes organizational collaboration in a powerful sync solution.

SYNC
Gain a Unified Directory

〉 Sync mail-enabled objects between environments for better collaboration and productivity
〉 Sync between Domino Directory and Active Directory or between Active Directory forests
〉 Gain a unified address book
〉 Test the sync in a dry run

MANAGE
Resolve Issues Quickly

〉 Resolve conflicts easily – even during the sync
〉 Skip, rename or update targets for objects, or even merge source members into target lists
〉 Consolidate data about multiple directories into one source for detailed analytics and powerful insights

CONFIGURE
Adapt to Any Organization

〉 Designed to handle even the most complex scenarios
〉 Adapt to meet custom requirements
〉 Easy to use to fit organizations of all sizes
〉 Choose the objects you want to sync between environments
