WHY OUTSOURCE?

No staff commitments

You don't need to employ a development team in-house.

No lengthy recruitment process

No need to go through the time intensive recruitment process.

Immediate engagement

Very short lead times to get projects kicked off quickly.

Access to multiple skills and technologies

Comprehensive offering covering web, mobile and server technologies.

Ability to stop/start the project

Flexibility to roll resources on and off the project easily.

Minimal investment and risk

Staggered booking and payments.

Professional project approach

Comprehensive online project management system backed up by rigorous methodical processes.

UK Based Company

Although the work is provided by our fellow employees at the Development Centers in India, we are a UK registered and based company with all usual advantages.

Family run business

Dotsquares has always been and will always remain a family run business

Intellectual Property Rights (IPR)

All existing and new technologies, patents and process developed during the agreement belong exclusively to you.

Rights to the Code

All the code both on the server and on the site are assigned to you.

Non Disclosure Agreements (NDA)

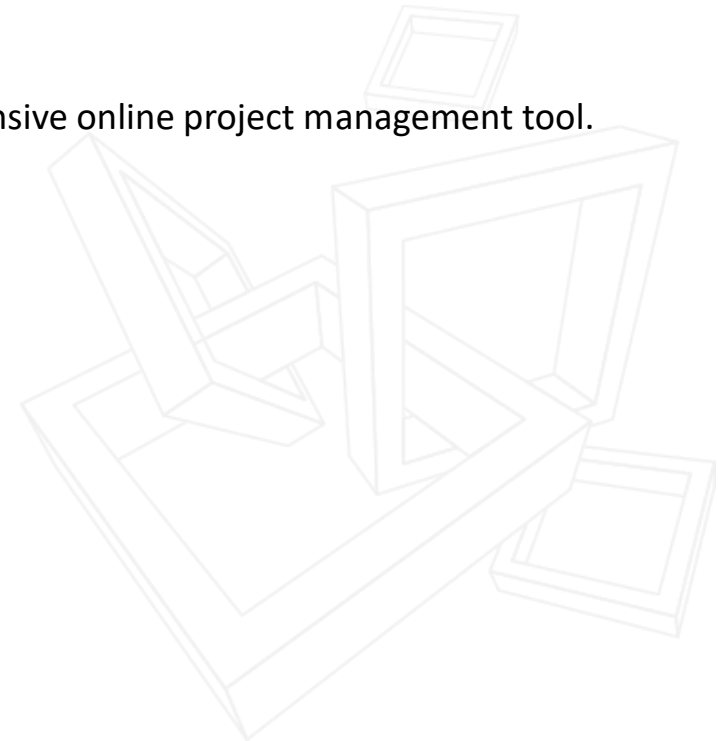

We not only have NDAs in place with our clients, but our staff too – ensuring you complete confidentiality.

Security

We have a system of checks and balances in place to ensure the utmost security.

Communicating with an offshore partner

All our employees have superior written and verbal English and clients are invited to join our comprehensive online project management tool.

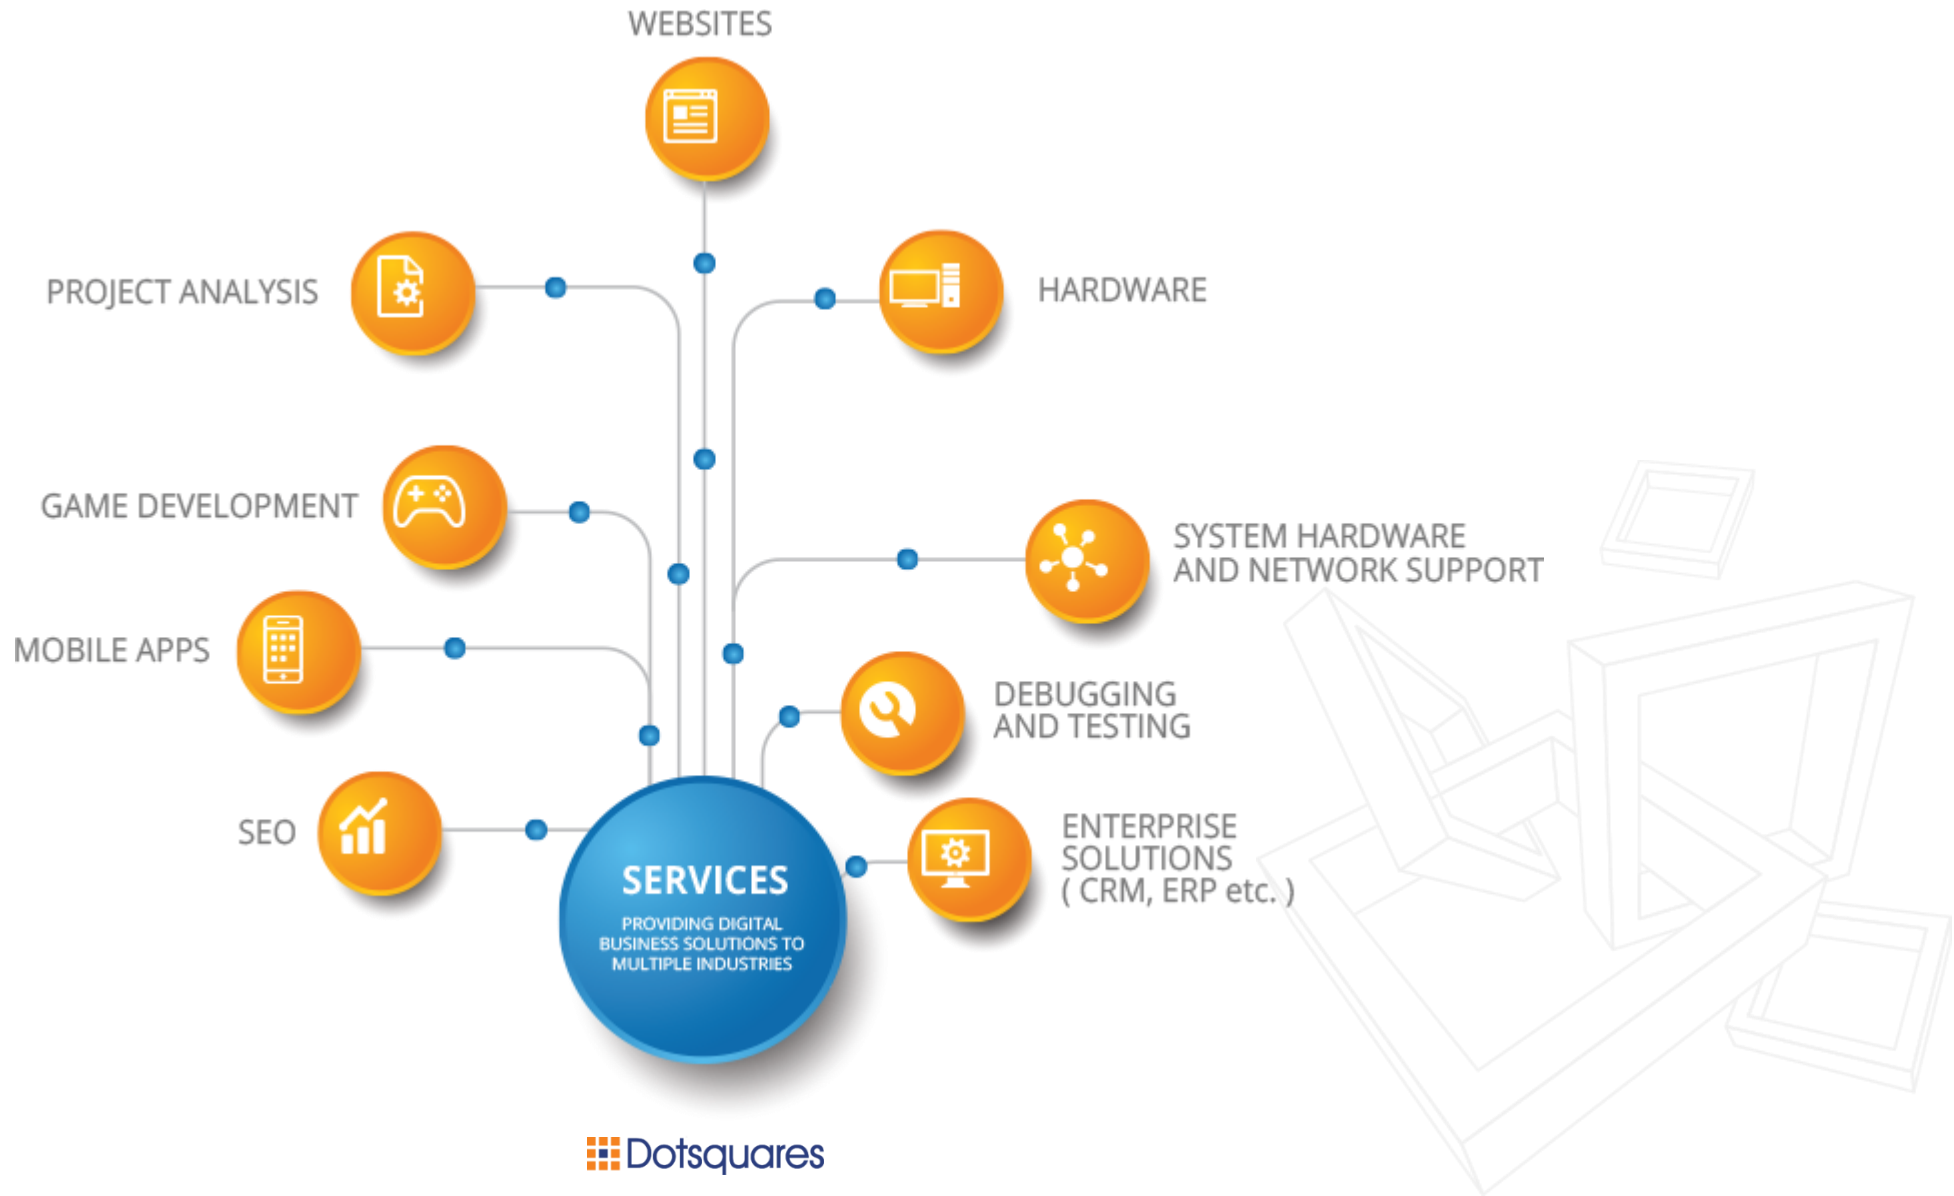

Automotive Communication Services
Aviation Education Financial Services
Consumer Packed Goods Healthcare FMCG
Hi-Tech Industry & Manufacturing
Logistics & Distribution
Media & Entertainment Publishing
Retail Tour & Travel

SERVICES OFFERED

SECTORS

PMS

With our own project management system as a starting point we can utilize those skills in developing a viable and easy to use product.

FinTech

Extensive experience around latest solutions integrating APIs, Feeds around different Financial Systems viz Payroll, Payment Gateway etc

LMS

Learning Management Systems are one of our niche areas. Either off the shelf configurations or a custom built from scratch.

ECOM

We are building eCommerce sites every day, either using Magento CMS or built from scratch using PHP or ASP.Net technology.

CRM

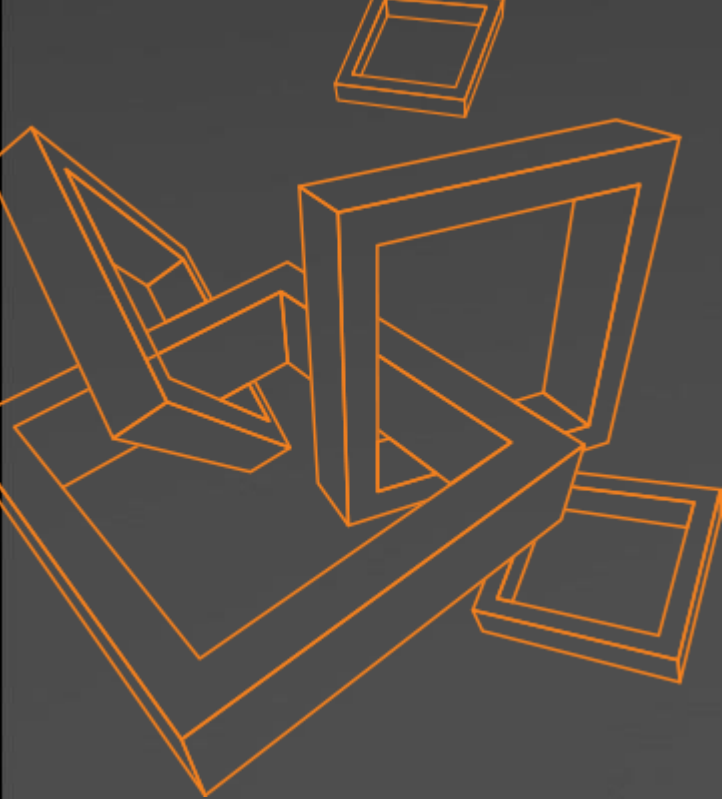

With over ten years experience and knowledge to draw upon we can implement and customize an off the shelf solution or build from scratch and assign full IPR.

CMS

Unrivalled knowledge of the technologies behind the popular Content Management Systems we can improve and extend their functionalities and features.

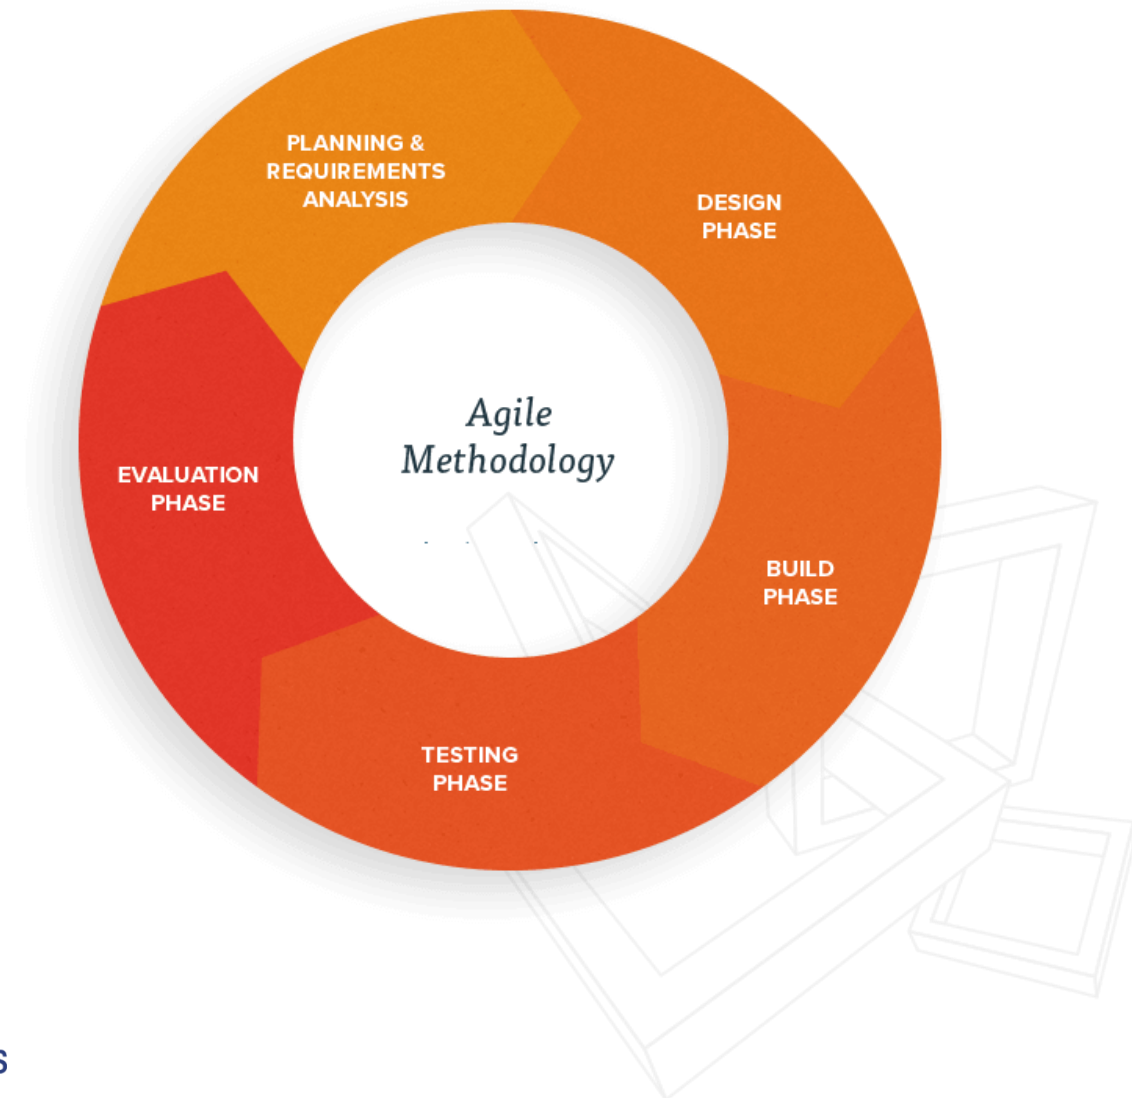

PROJECT METHODOLOGY

Agile

The Agile Manifesto of Software Development put forth a groundbreaking mindset on delivering value and collaborating with customers.

Agile's four main values are expressed as:

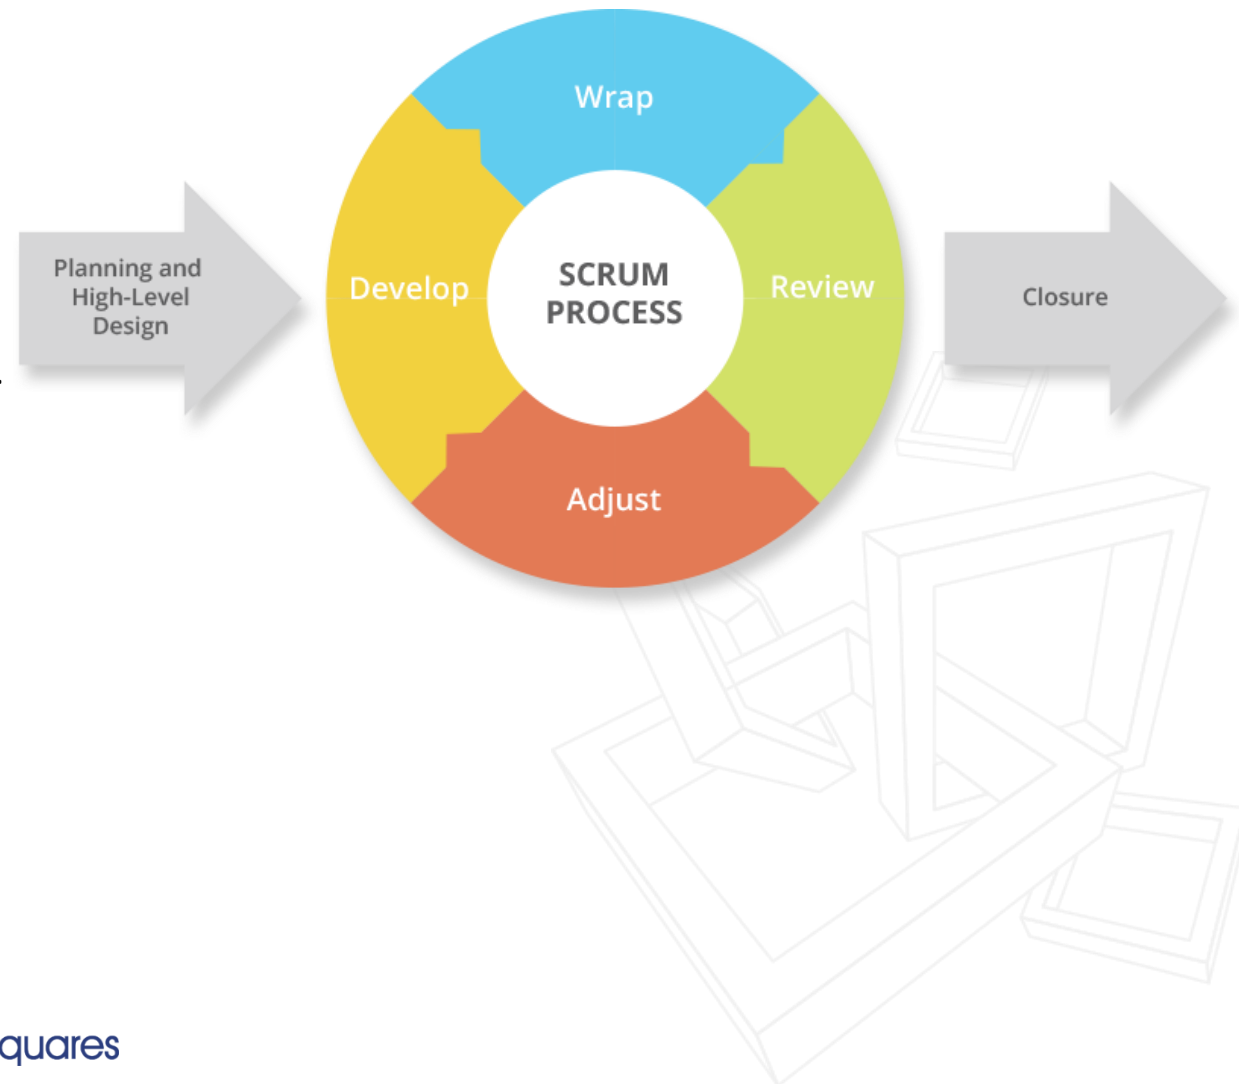

- Individuals and interactions over processes and tools
- Working software over comprehensive documentation
- Customer collaboration over contract negotiation
- Responding to change over following a plan
- Phases of Agile Methodology includes:
 1. Design
 2. Build
 3. Testing
 4. Evaluation
 5. Planning and Requirements Analysis

Scrum Agile

Scrum is the most popular Agile development framework because it is relatively simple to implement. It also solves a lot of problems that software developers have struggled with in the past, such as convoluted development cycles, inflexible project plans and delayed production.

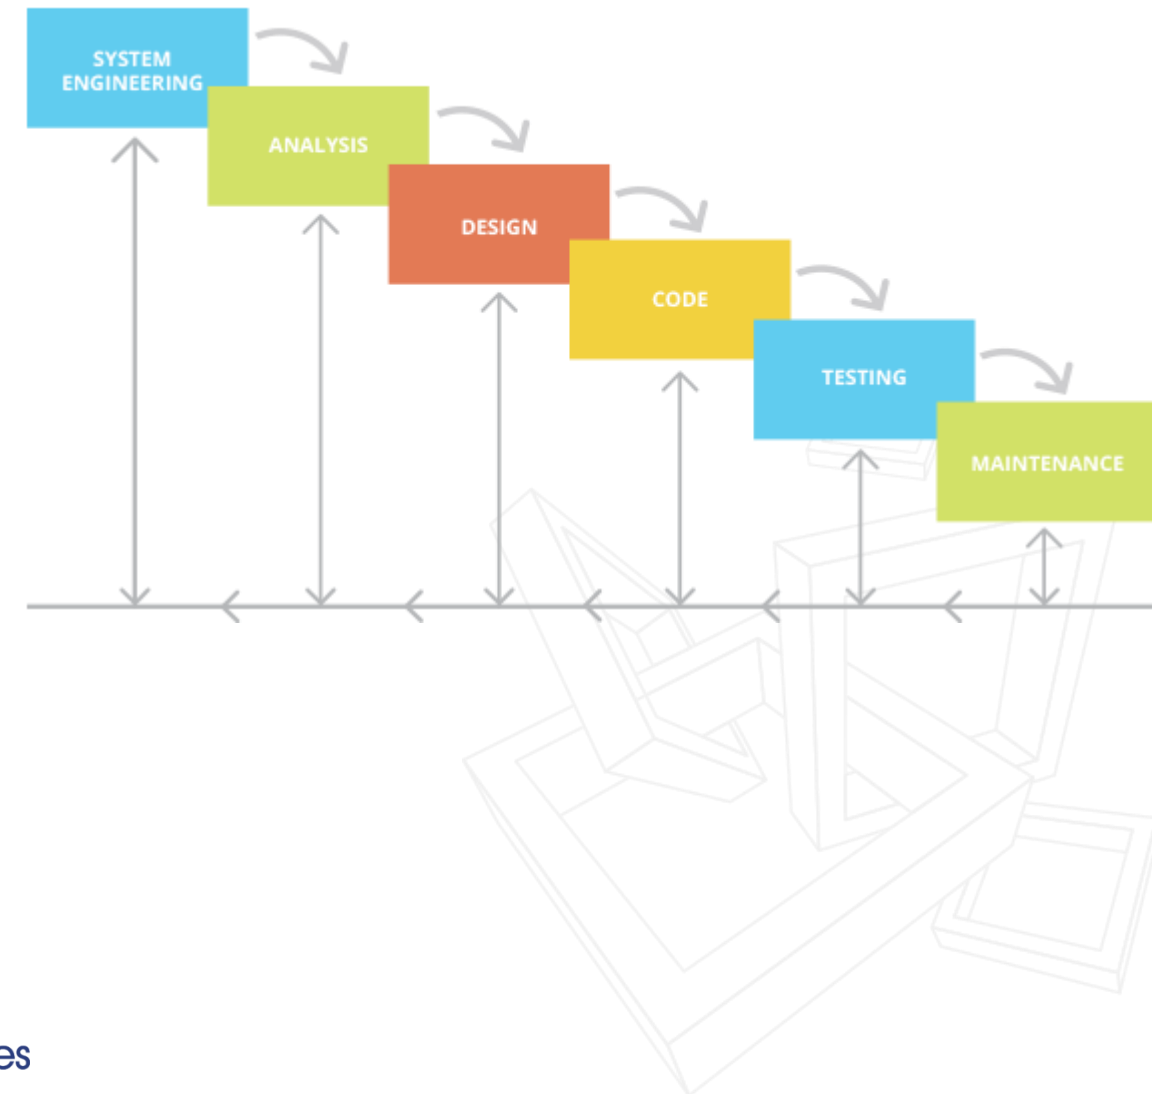

- Scrum is a sub group of Agile.
- Scrum process consists of Planning, Sprint cycle and Closure.
- Scrum is based on the principles and values of The Agile Manifesto.
- Scrum has three roles:
 1. Product Owner
 2. Scrum Master
 3. Team

Waterfall

- The Waterfall model is a sequential (non-iterative) design process.
- Used in software development processes, in which progress is seen as flowing steadily downwards (like a waterfall).
- The phases of the Waterfall model includes:
 1. System Engineering
 2. Analysis
 3. Design
 4. Coding or Development
 5. Testing
 6. Production/implementation
 7. Maintenance
- The waterfall model maintains that one should move to a phase only when its preceding phase is reviewed and verified.
- The waterfall development model originates in the manufacturing and construction industries: highly structured physical environments in which after-the-fact changes are prohibitively costly.

Waterfall Process

What our CMMI Maturity Level rating means for you:

Improved Quality:

- Smart supplier management ensures quality results
- Strategic people management empowers Team Members to develop skills that will help the organisation

Decreased Costs and Enhanced Productivity:

- Streamlined processes allow Teams to integrate and collaborate more efficiently
- Standardised project management practices reduce redundancy and waste
- Identifying skill gaps helps break down any workflow bottlenecks

Higher Customer Satisfaction

- Service delivery strategies strengthen weak customer touch points
- Effective product development instils customer confidence
- Project management practices help teams meet and manage customer expectations

Improved On-Time Delivery

- Field-tested project management standards keep work on schedule
- Transparent development processes reduce scope creep and deadline extensions
- Careful vendor management mitigates supplier delays

...I really believe Dotsquares is **up there with the best”****

- Robert Williams, MD, Gardencentreonline.com, UK

BEST SERVICES
with intelligent approach

better experience

**“Intelligent approach to problems...
...much **better** experience than **UK development companies”****

- Christine, Music Teacher Support Ltd, UK

**“Went beyond the requirements...
...working with them is a **winning formula”****

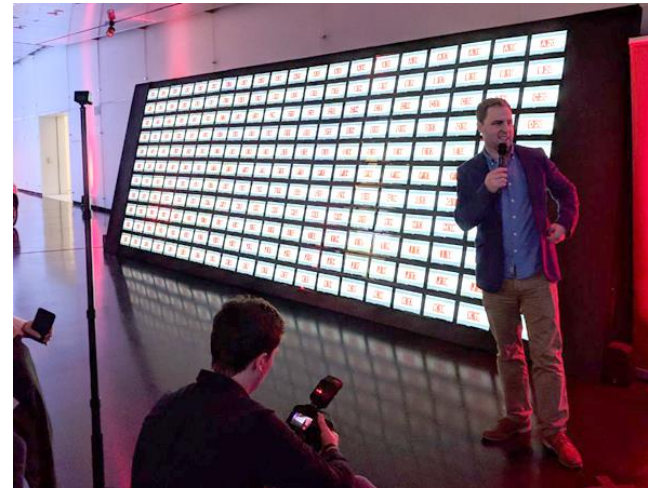

- Brian Riback, New York Daily News, USA

Goes beyond requirements
WINNING FORMULA

SPEAK TO THE RECORD BREAKERS!

Use your app to set records....

Like Fujitsu who recently ran a single video simultaneously across 220 tablets, which collectively would form one screen like a mosaic – and this many had never been tried before...!

“Recommended Digital Commerce Vendor”

As a leading digital commerce vendor, we consider it our responsibility to empower businesses with high-end technologies. We work with businesses of all scales and niches, with the single aim of enhancing their capabilities in serving their customer with improved efficiency. This aim has made us the early adopter of all the latest technologies including IoT, Blockchain, Machine Learning, and Big Data Analytics. Our services in web, mobile and cloud development help us in keeping our clients ahead of the curve.

THANK YOU
