Projects

# ABOUT THE COMPANY

- ❑ Dotsquares is providing best DevOps consulting services to your business and specialized in optimizing technological development cycles on Microsoft Azure. We aim to provide the customers with the expertise and capabilities.
- ❑ By leveraging our expertise, Dotsquares helps customers to accelerate their projects and simplify their development processes, resulting in more frequent and higher quality deliveries. This can ultimately help businesses to better respond to market needs and stay ahead of their competition.
- ❑ We use both Integrated Security (DevSecOps) and Data-driven DevOps (DataOps) methodologies for software development. By embracing these approaches, we offer more secure and efficient software and reduce risks. DevSecOps incorporates security practices and principles throughout the software development lifecycle. By this way, businesses can reduce the likelihood of security vulnerabilities and ensure the software security.
- ❑ DataOps focuses on using data and analytics to optimize the software development lifecycle. By collecting and analyzing data on project operations and repositories, businesses can gain insights into how the team is performing, identify areas for improvement, and make data-driven decisions and increase in improving efficiency and productivity.

# How DevOps Works

# Pillars of our DevOps Consulting Service

## Culture

The culture pillar involves improving integration, communication, and collaboration between technology teams by continuous cycle of learning and improvement. We also focus on ensuring the adherence and perpetuity of the agile culture within organizations.

## Tactics

We focus on improving collaboration and coordination between teams, with the goal of delivering products faster, more reliably, and with better quality. This involves optimizing interactions between people, processes, and technologies, to build a more efficient and effective development process.

## Automation

Automation pillar involves reducing human dependency on workflows by automating repetitive tasks and several steps in the test loop, integration, and continuous deployment (CI/CD) process.

## Governance

We incorporate strict version control and code quality processes throughout the development, approval, and production stages, which can help reduce the incidence of errors and improve team efficiency.

# Benefits your business can leverage...

Higher revenue  
and market share

Robust Security

Reliable domain  
collaboration

Shorter release  
cycle

Maintain system  
reliability

Higher customer  
satisfaction

Greater market  
adaptability

Greater stability in  
system

# What we offer?

We are providing DevOps consulting services tailored to your specific project requirements. Our offerings include:

- Identifying and analyzing the need for application lifecycle management.
- Conducting a cloud native assessment to assess the customer's level of maturity in various areas such as DevOps, infrastructure, agile application architecture, test automation and security.
- Training and supporting the development and implementation process, which includes training.
- Executing the implementation of either all or part of the Cloud Native Applications using DevOps as a primary approach.

Your business will gain following advantages:

- Accelerating the implementation of new business-related features.
- Shortening the time needed to launch new products to remain competitive and avoid losing customers to other companies
- Providing superior service quality compared to your other competitors
- Shifting towards a project monitoring system that incorporates metrics for ongoing enhancements.

Goes beyond requirements  
WINNING FORMULA

# SPEAK TO THE RECORD

## Use your app to set records... BREAKERS!

Like Fujitsu who recently ran a single video simultaneously across 220 tablets, which collectively would form one screen like a mosaic – and this many had never been tried before...!

**thank you**
