ABOUT THE COMPANY

Introduction to Dotpay

DotsMarket is a next-generation NFT marketplace that is designed to leverage the power of the Binance network to provide users with a seamless and secure buying and selling experience. NFTs, or non-fungible tokens, are unique digital assets that can be used to represent anything from artwork and music to virtual real estate and collectibles. With DotsMarket, users can easily create and trade both batch and single NFTs, with a variety of features such as buy and sell options, as well as auctions.

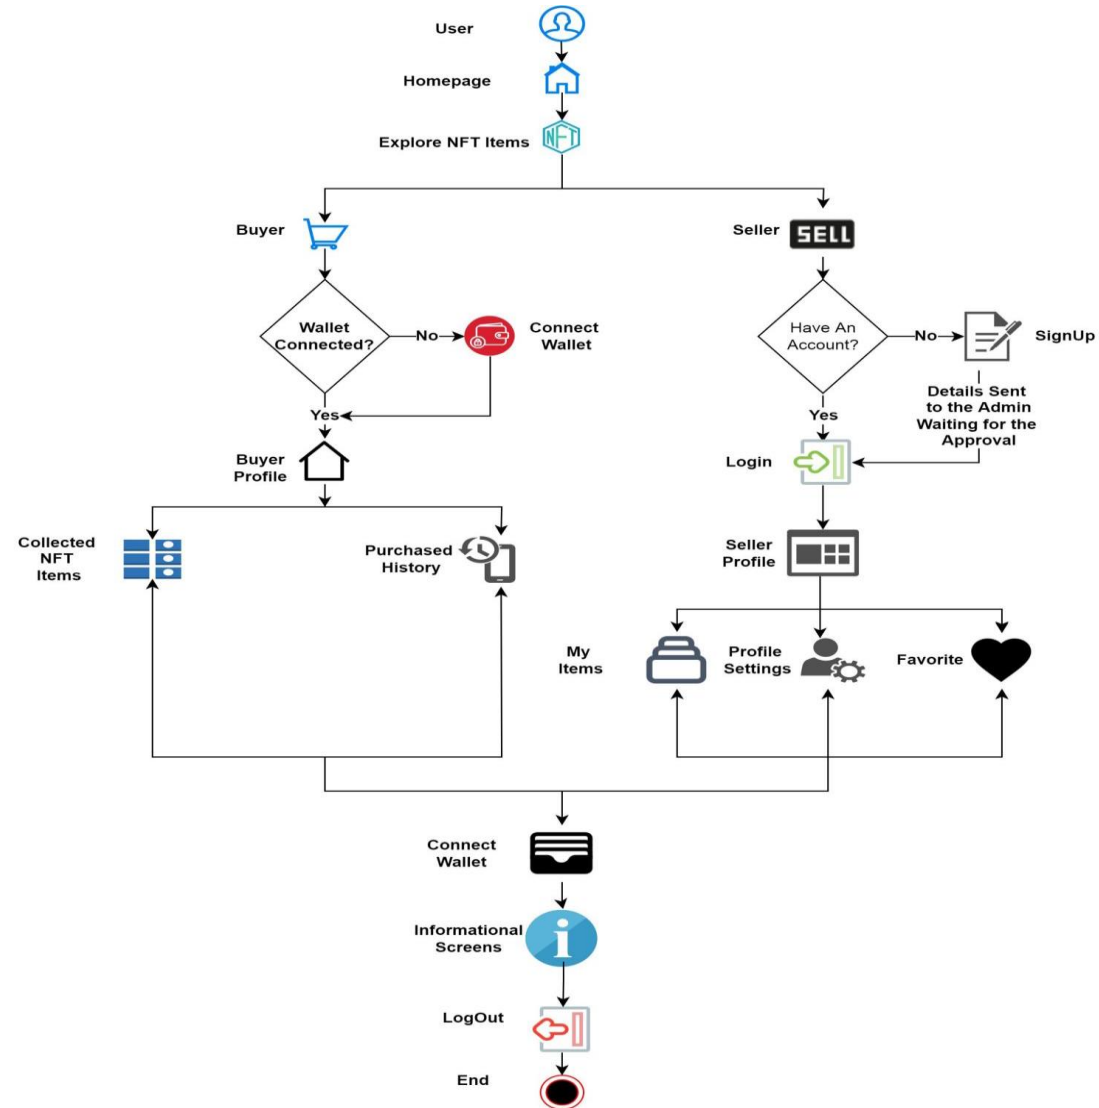

The marketplace is built using Node as a server and React in the front end, ensuring that users can easily navigate and interact with the platform. Node is a popular backend JavaScript framework that is used to build scalable web applications, while React is a popular front-end library that is used to build user interfaces. By using these technologies, DotsMarket is able to provide users with a fast and responsive experience, whether they are browsing the marketplace, creating NFTs, or managing their transactions.

In addition to Node and React, DotsMarket also uses Pinata as its IPFS service. Pinata is a decentralized storage platform that allows users to store and retrieve files in a secure and decentralized way. This means that all NFT assets are stored in a reliable and decentralized manner, ensuring that they are accessible to users at all times. Pinata also provides users with a simple and easy-to-use interface for uploading and managing their NFT assets.

Finally, DotsMarket uses MongoDB as its database. MongoDB is a popular NoSQL database that is designed to store large volumes of data in a flexible and scalable way. By using MongoDB, DotsMarket is able to store all transactions and data securely, ensuring that user data is always protected.

Overall, DotsMarket is a user-friendly and secure platform that is designed to provide users with a seamless and reliable NFT trading experience. Whether you're an artist, a collector, or just looking to explore the world of NFTs, DotsMarket is the perfect platform for all your NFT trading needs. With its user-friendly interface, reliable storage solutions, and secure database, DotsMarket is the ideal marketplace for anyone looking to buy or sell NFTs. If you have any questions or feedback, please don't hesitate to get in touch with us.

Goes beyond requirements
WINNING FORMULA

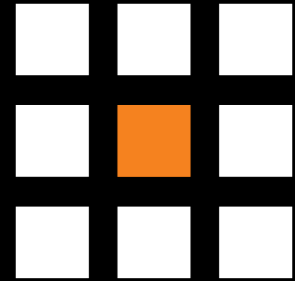

SPEAK TO THE RECORD BREAKERS!

Use your app to set records....

Like Fujitsu who recently ran a single video simultaneously across 220 tablets, which collectively would form one screen like a mosaic – and this many had never been tried before...!

thank you
