Two-Factor Authentication (2FA): Additional security for user accounts.

Integrated Tax Calculation: Automatic tax calculation based on location.

Gift Certificates: Issue and manage store credit and gift certificates.

Mobile-Optimized Design: Responsive design for a seamless mobile experience.

BENEFITS

Improved Local Presence with Store Locator: Help customers find physical stores, bridging the gap between online and offline sales.

Centralized Customer Data Management: Keep customer data organized and up-to-date, allowing for better customer service and targeted marketing.

Enhanced Order Transparency: Customers can view their order history, improving the post-purchase experience and encouraging repeat purchases.

Flexible Support for B2B and B2C: CyberStore's support for both B2B and B2C customers increases flexibility and expands business opportunities.

Optimized Checkout Flow: Customizable checkout processes reduce friction and improve conversion rates.

Multiple Payment Methods: Offering various payment options makes it easier for customers to complete their purchase, reducing cart abandonment.

Invoice Payments Simplified: Allowing customers to pay invoices via credit card or ACH ensures fast and secure payments, improving cash flow.

Customer Convenience with Payment Profiles: Saved payment profiles enable faster checkout for returning customers, increasing repeat business.

Encourage Bulk Purchases: Volume-based tiered pricing incentivizes customers to buy more, driving higher order values.

Easy Integration: API access enables seamless integration with third-party tools, enhancing the functionality of the ecommerce store.

Automated Notifications: Keep customers informed of order status, returns, and payments, improving customer satisfaction.

Efficient Troubleshooting: Event logging helps quickly identify and resolve issues, minimizing downtime and improving operational efficiency.

Expand Global Sales: Multi-currency support allows businesses to expand internationally by accepting payments in different currencies.

Customized Product Displays: Tailor product listings to meet customer preferences, improving the shopping experience and increasing conversions.
