

DYNA AI STUDIO

*AI for Business Central: ready, fast,
simple and affordable*

AI-native applications that are immediately operational, direct integration with your systems and maximum data security. Not just a simple tool, but a real engine of innovation to connect people, processes and information.

Dyna AI Studio is a modular, flexible and ready-to-use platform. You decide how to evolve your business. Expand, connect, automate: the future of AI is already here.

FEATURES

READY TO USE

Launch AI-native applications in seconds thanks to a library of ready-made plugins that connect you to external actions, third-party services and business tools. No complex configuration, no technical barriers.

NATIVE MULTI-LLM

Easily integrate LLM models such as OpenAI or choose from a list of other models, breaking vendor lock-in with the ability to use private models and seamlessly manage the transition between different technologies.

EXPAND THE POTENTIAL OF YOUR SYSTEMS

Dyna AI Studio does more than just answer questions: it easily connects data, systems and business processes with the outside world, enhancing interoperability and automation in every area of the enterprise.

MODULAR AND COMPOSABLE ARCHITECTURE

Design tailor-made solutions using a flexible framework: you can combine agents, tasks and workflows via a graphical interface or API. Compatible with the MCP (Model Context Protocol) and fully configurable for custom actions.

PRIVATE AI AND FLEXIBLE DEPLOYMENT

Dyna AI Studio is designed to meet the most stringent security and privacy requirements: it supports Private AI with on-premise, private cloud or hybrid environments, ensuring full control over data and models.
