dSiilo

Turn your contracts and spend data into a cost savings, productivity and compliance engine.

Who is dSiilo?

dSiilo is a deep learning AI company focused on reducing costs and improving contract and spend performance and compliance.

dSiilo's ProcureGPT™ platform automatically extracts contextual data from invoices, contracts etc. and enables automatic reconciliations and other actions from extracted data.

Benefits

Reduce Cost and Optimize Spend

Improve Productivity and Business Impact

Increase Compliance and Reduce Risk

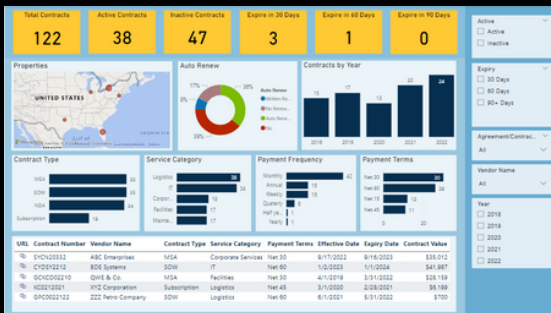

ProcureGPT™ Solutions

Contract Intelligence

- Drive operational performance through visibility to all your clauses and pricing terms.
- Strengthen existing compliance management processes – identify key compliance and Third-party risk opportunities.
- Improve supplier management and negotiations by leveraging contract and performance insights.

Spend Intelligence

- Actionable insights on all spend leakage for example due to non-compliance to contracted pricing, or buying off contract.
- Automatic categorization and classification of line level data for net price variance analysis by supplier, by location and by date.
- Ability to analyze in detail any ancillary charges such as customs duty, fees, freight, service charges and identify savings opportunities.
