- Happier and more engaged employees.

Technological Approach & Integrations

- Seamless integration with Microsoft ecosystem
- Intelligent Natural Language Processing (NLP)
- Customizable to HR-Specific workflows
- Automated HR processes
- Data-Driven insights and reporting

Integrated Directly with Microsoft Teams

D Tech Cloud HR Assistant is seamlessly integrated into your **Microsoft Teams** environment, ensuring smooth, uninterrupted workflows for employees.

With this powerful integration, HR processes like leave requests, document management, and employee queries are handled directly within Teams, boosting productivity across your organization.
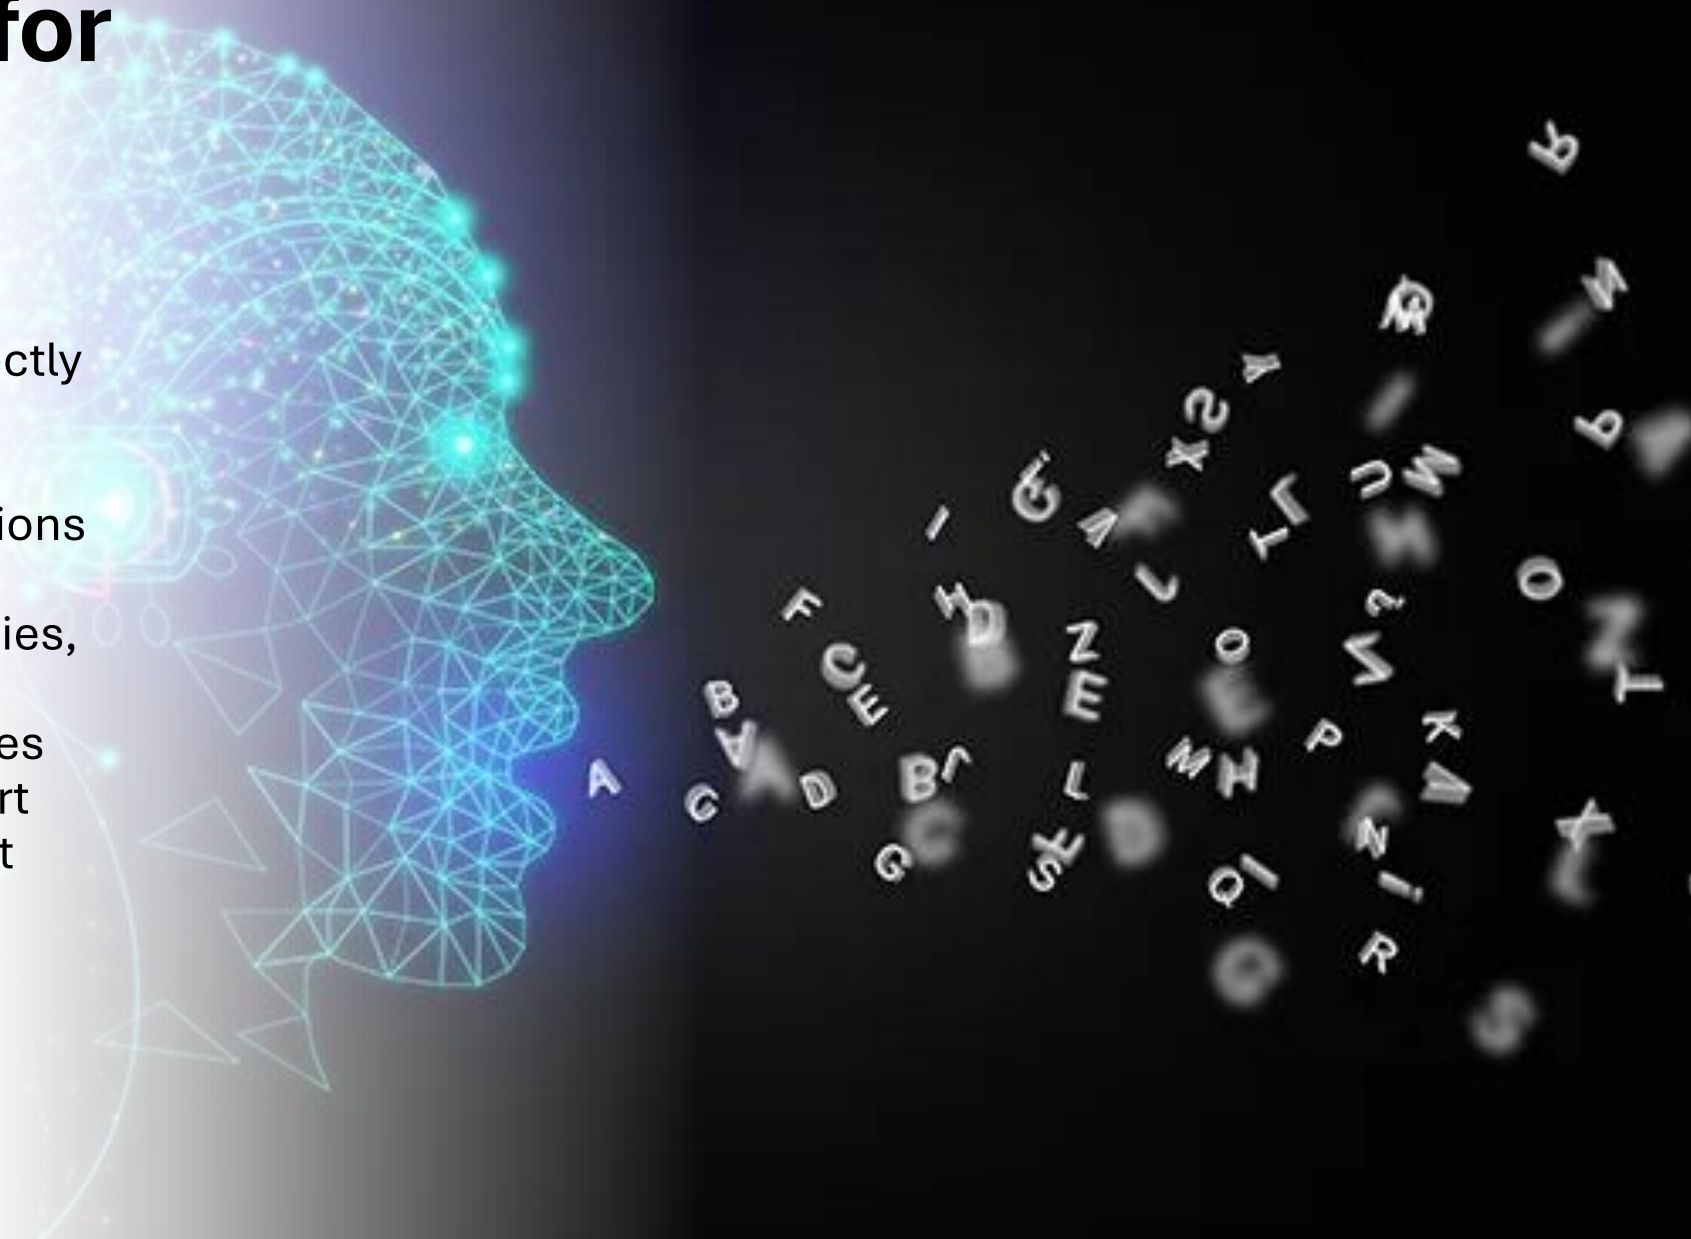

Generative AI for HR

Our **Generative AI** is built directly into the HR Assistant, offering intelligent, context-aware responses to employee questions and requests. Whether it's providing information on policies, handling FAQs, or processing routine HR tasks, the AI ensures that employees get the support they need in real-time, without disrupting their workflow.

Prompt Management System

To ensure an optimal response quality, our **Prompt Management System** allows you to customize the tone and personality of your HR Assistant. Tailor responses to match your company culture, and easily manage prompt settings through an intuitive interface, complete with multilingual support for global teams.

Thank You!
