

COGNAiO[®]

Cloud Extract

ABOUT

COGNAiO[®] Cloud Extract is a SaaS solution by DTI designed to optimize business processes and transform enterprise AI abilities for document understanding and information extraction.

HOW?

COGNAiO[®] Cloud Extract leverages large-language-model (LLM) technology to extract data from documents of any type, structure, complexity, or language.

IN THE CLOUD

The system is built on a cloud-native architecture using Microsoft Azure services but can also be adapted to align with the customers existing DevOps ecosystem.

APPLICABLE COMPANY-WIDE

No prior training, coding, scripting or defining rules required, making it suitable for enterprise-scale applications.

SYSTEM INTEGRATION AVAILABLE

COGNAiO[®] Cloud Extract can be easily integrated via API into any system that requires extraction services, including the COGNAiO[®] Enterprise Platform.

DATA PROTECTION ASSURED

It ensures data privacy and exclusivity, keeping customer data confidential and not sharing it with other customers or third parties.
