

Power BI Adoption & Governance

Power BI Implementations without the right controls and culture can result in low engagement. Are you ready to regain control of your platform and unlock the true value of your insight?

Delivered within 4 weeks

You need this if these problems sound all too familiar:

Low ROI on Power BI Investment

End users seem disengaged or frustrated, resorting to legacy reporting. Data teams don't feel the benefit of their spend.

Low Reporting Accuracy

Inconsistencies or inaccurate reporting leads to users not being on the same page and mistrusting their insight.

Throttled Capacity

As your data and user base grow, non-optimised reports can struggle to scale, limiting your ability to adapt to future business needs. Your capacity may be over-utilised and you aren't sure where to start.

BI Backlog is a Mountain

You find your BI teams are firefighting through bug fixes, maintenance or change requests when you want them innovating new solutions.

It can be easy to blame the tech, but Dufrain's Power BI Adoption Framework helps you overcome these challenges, enabling faster insights, improved user satisfaction, and unlocks the true value of your data.

Our Delivery...

Stage 1

We quickly assess your Power BI Health Score and understand how we should tailor our framework to suit your organisation.

Stage 2

We lay the foundations to set your people up for success with a platform clean-up and enablement of key features like our Monitoring Tool.

Stage 3

It's time to launch your new centre of excellence, and our bespoke Power BI training to embed your new Power BI culture.

**Our Power BI Adoption Framework
can be delivered in as little as 4 weeks**

**From £22,000
4 Weeks**

Our Approach > Improve ROI with Best Practice Power BI

Clearer

Delivering one version of the truth

A combination of cleaning up your environment, introducing version control and development standards alongside delivery of training will give your users the confidence to use Power BI in their daily decision making.

Safer

Ensuring your data stays your data

We'll help you navigate critical security pitfalls with a tenant setting & security review. Our Power BI monitoring tool will highlight where Power BI is being used effectively and areas where engagement is outside of expectations, allowing you to introduce mitigation and support strategies.

Cheaper

Saving your team time and effort

By identifying key areas of technical debt and redundancy on your platform, introduction of best practice development standards, and our advanced training workshops, we'll set you on a path to streamlined overheads. Free your team up to innovate and stop firefighting issues.

Better

Fully Engaging data driven minds

Let's engage your people, with a supported launch of your new Power BI Centre of Excellence. We'll help you get to the root of what users need, and support them with consumer and explorer training sessions.

Deliverables

- > Deployment of our monitoring tool giving full sight of your Power BI activity
- > Implementation of Version Control
- > Review of Tenant settings
- > Platform clean-up
- > Training Workshops
- > Launch of Power BI Centre of Excellence

Our Experience

After working with Dufrain, organisations saw their BI adoption health scores improve by an average of 40%.

Improved Adoption

Dufrain's approach boosted collaboration and knowledge-sharing, fostering a stronger internal data culture. By engaging wider audiences in Power BI, it empowered teams to make more informed and impactful day-to-day decisions.

Security and Cost Optimisation

Our security, tenant setting and capacity reviews have helped our clients minimise downtime and enhance trust in the reliability and scalability of their analytics platform.

Platform Optimisation

Our workspace clean-up, asset rationalisation and access management reviews reset your platform back to a streamlined environment, empowering your team to work efficiently and maintain moving forward.

"Dufrain as a partner are flexible, responsive and delivery focussed and have helped us deliver our vision of enabling Atlanta to become more data driven."

Philip Liu, Director of Data at Atlanta Group
