

Power BI Optimisation Assessment

Are you struggling to scale key reports in your organisation?
Are your teams fire-fighting through a mountain of technical debt?

Delivered within 3 days

You need this if these problems sound all too familiar:

Low User Adoption

Poor performance and unreliable reports frustrate users, leading to decreased engagement and lack of trust in the platform.

Scalability Challenges

As your data and user base grow, non-optimised reports can struggle to scale, limiting your ability to adapt to future business needs.

Increased Costs

Inefficient reports consume more resources, driving up infrastructure and maintenance costs across your organisation, never mind frustrating your BI teams.

Slow Decision-Making

Long load times and delayed updates make it harder to access real-time insights, slowing down key business decisions.

Dufrain's Power BI Optimisation Assessment helps you overcome these challenges, enabling faster insights, improved user satisfaction, and more efficient business operations.

Our Delivery...

Front End

Assessment of report design and calculation performance.

Modelling

Review of data modelling and transformations

Platform

Examination of Power BI service and capacity settings

Output

Recommended optimisations documented for consideration, providing your team a backlog of items to improve performance

Outcome

Upon delivery of our suggested optimisation steps, your report will run efficiently and be ready to scale as your data grows.

**Our Power BI Optimisation Assessment
can be delivered in as little as 3 days**

**From £4,500
3 days**

Our Approach > Increasing performance to drive value from your data

Diagnose

Testing performance of key reports to identify issues

Our Power BI experts will conduct a holistic end-to-end assessment of your assets. We test reports for slow queries, inefficient data models, overly complex DAX formulas, inefficient report layouts and underlying data problems to identify the changes that need to be made.

Recommend

Share findings and recommendations for further improvements

We will document optimisation opportunities with recommendations, defining your team's course for correction. We'll play this back to your team in a workshop, along with observations that can be applied to your wider suite of reports.

Fix

Application of quick fixes for instant impact

Following our assessment your team can implement the backlog of items and restore your reports performance, or we can discuss how Dufrain can support with this.

Deliverables

- > Full diagnostic tests across all facets of report performance including:
 - Report Design
 - DAX calculations
 - Power Query
 - Data Modelling
 - Power BI service and capacity settings
- > Clear documentation of beneficial optimisation actions to take.
- > 2 Hour coaching workshop with your team to empower them to act on our recommendations.

Our Experience

After working with Dufrain, organisations saw their Power BI processes optimised, reducing user frustration, delivering faster insights and wider strategic benefits on healthier capacities.

One organisation saw an average reduction of 70% in CU usage per report, and up to 52% report rendering time reduction.

Scalability

As a result of our BI optimisation, we enabled an organisation to future-proof their BI offerings by enhancing and remodelling their BI data models. With increased confidence in their BI capability, the team were empowered to handle growing data volumes, seamlessly onboard additional users and support more complex analytical scenarios without compromising performance or reliability.

Cost Efficiency

By adopting and implementing our optimisation techniques, we've seen significant cost improvements, with the biggest case negating the need for an additional fabric capacity. These efficiencies encourage buy-in from senior stakeholders, seeing a better return on investment from an infrastructure perspective.

Next steps... Your journey starts here

Get in touch with us today to schedule an introductory call to discuss how these offerings can unlock new opportunities and insights for your organisation.
