

Mixed Reality in-a-Day

Transform business processes with mixed reality

According to an IDC report, 74% of companies surveyed indicated mixed reality is a key part of their digital transformation strategy. Now is the time to explore the opportunities you can unlock with computing power at the edge that blends the physical and digital worlds to deliver new experiences.

Why do a Mixed Reality in-a-Day:

Explore how you can transform your organization with Microsoft's mixed reality business apps that empower your frontline workers to collaborate seamlessly, access critical information while in the flow of work and get support from remote experts anywhere in real-time.

Activity outcomes

Explore

Understand how mixed reality can address your business challenges, and learn about the capabilities of Dynamics 365 Remote Assist and Guides.

Demo

Define objectives, prioritize use cases and explore potential return on investment. Engage in a demo specific to your priority use case scenarios.

Plan

Develop a plan for implementing the scenario within your organization to digitally transform with mixed reality.

Explore the benefits of Dynamics 365 Remote Assist and Guides

Create, collaborate, learn in new ways

Boost collaboration across cross-functional teams. Upskill employees with hands-free instructions and easy access to remote experts.

Suntory Whisky employees reduced time to upskill by 70%

Increase efficiency and quality

Improve yield with easy access to critical information and data needed in the physical context of their work.

L'Oréal reduced diagnosis and issue resolution by 50%

Empower all employees

Bring innovative technology to frontline workers, an audience traditionally underserved by technology.

The U.K. National Health Service reduced task time by 30%
