Benefits

DXC Solutions for Microsoft Dynamics 365 allows businesses to connect their enterprise and harness the power of information to delight their customers, improve operational performance and productivity and re-imagine their industries

Customer engagement

Capture a complete view of your customers to build long term relationships and provide them with personalized, deeply contextual experiences across all channels

Optimize operations

Automate workflows, flexibly adjust business processes and gain a complete view of the business from manufacturing to sales to service to accelerate the speed of doing business

Increase revenue

Innovate and respond to changes in the competitive landscape by rapidly deploying new products and services

Lower costs

Replace CAPEX with OPEX and pay for only the services you use

Gain intelligence

Use analytics to predict trends, to gain insights across the entire customer life cycle and to monitor the performance of operational processes to enable continuous optimization of the business

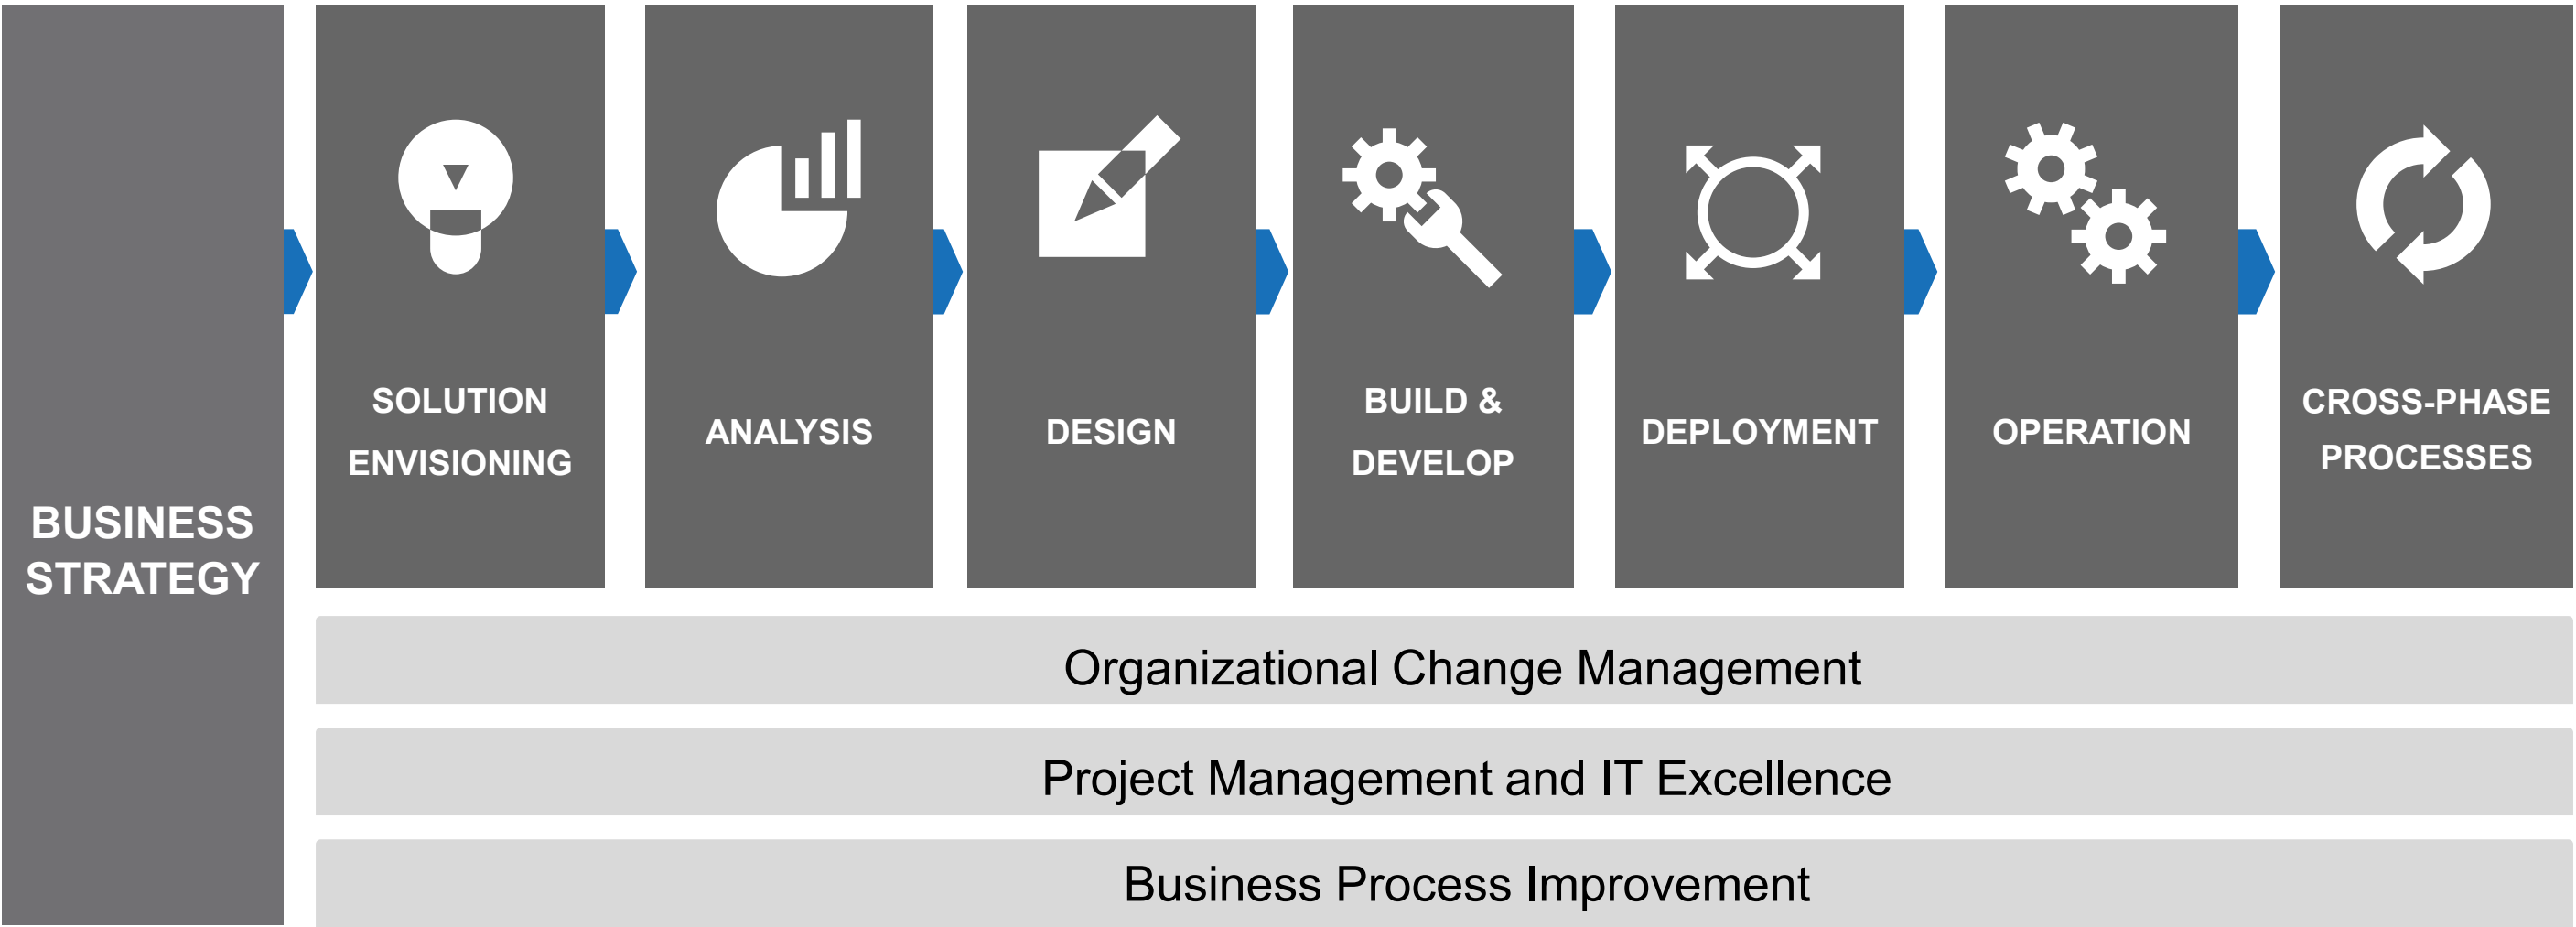

Empower employees

Improve productivity by providing your employees with familiar tools, guided processes, access to the information they need when they need it and the ability to easily collaborate with others

Delivery Methodology

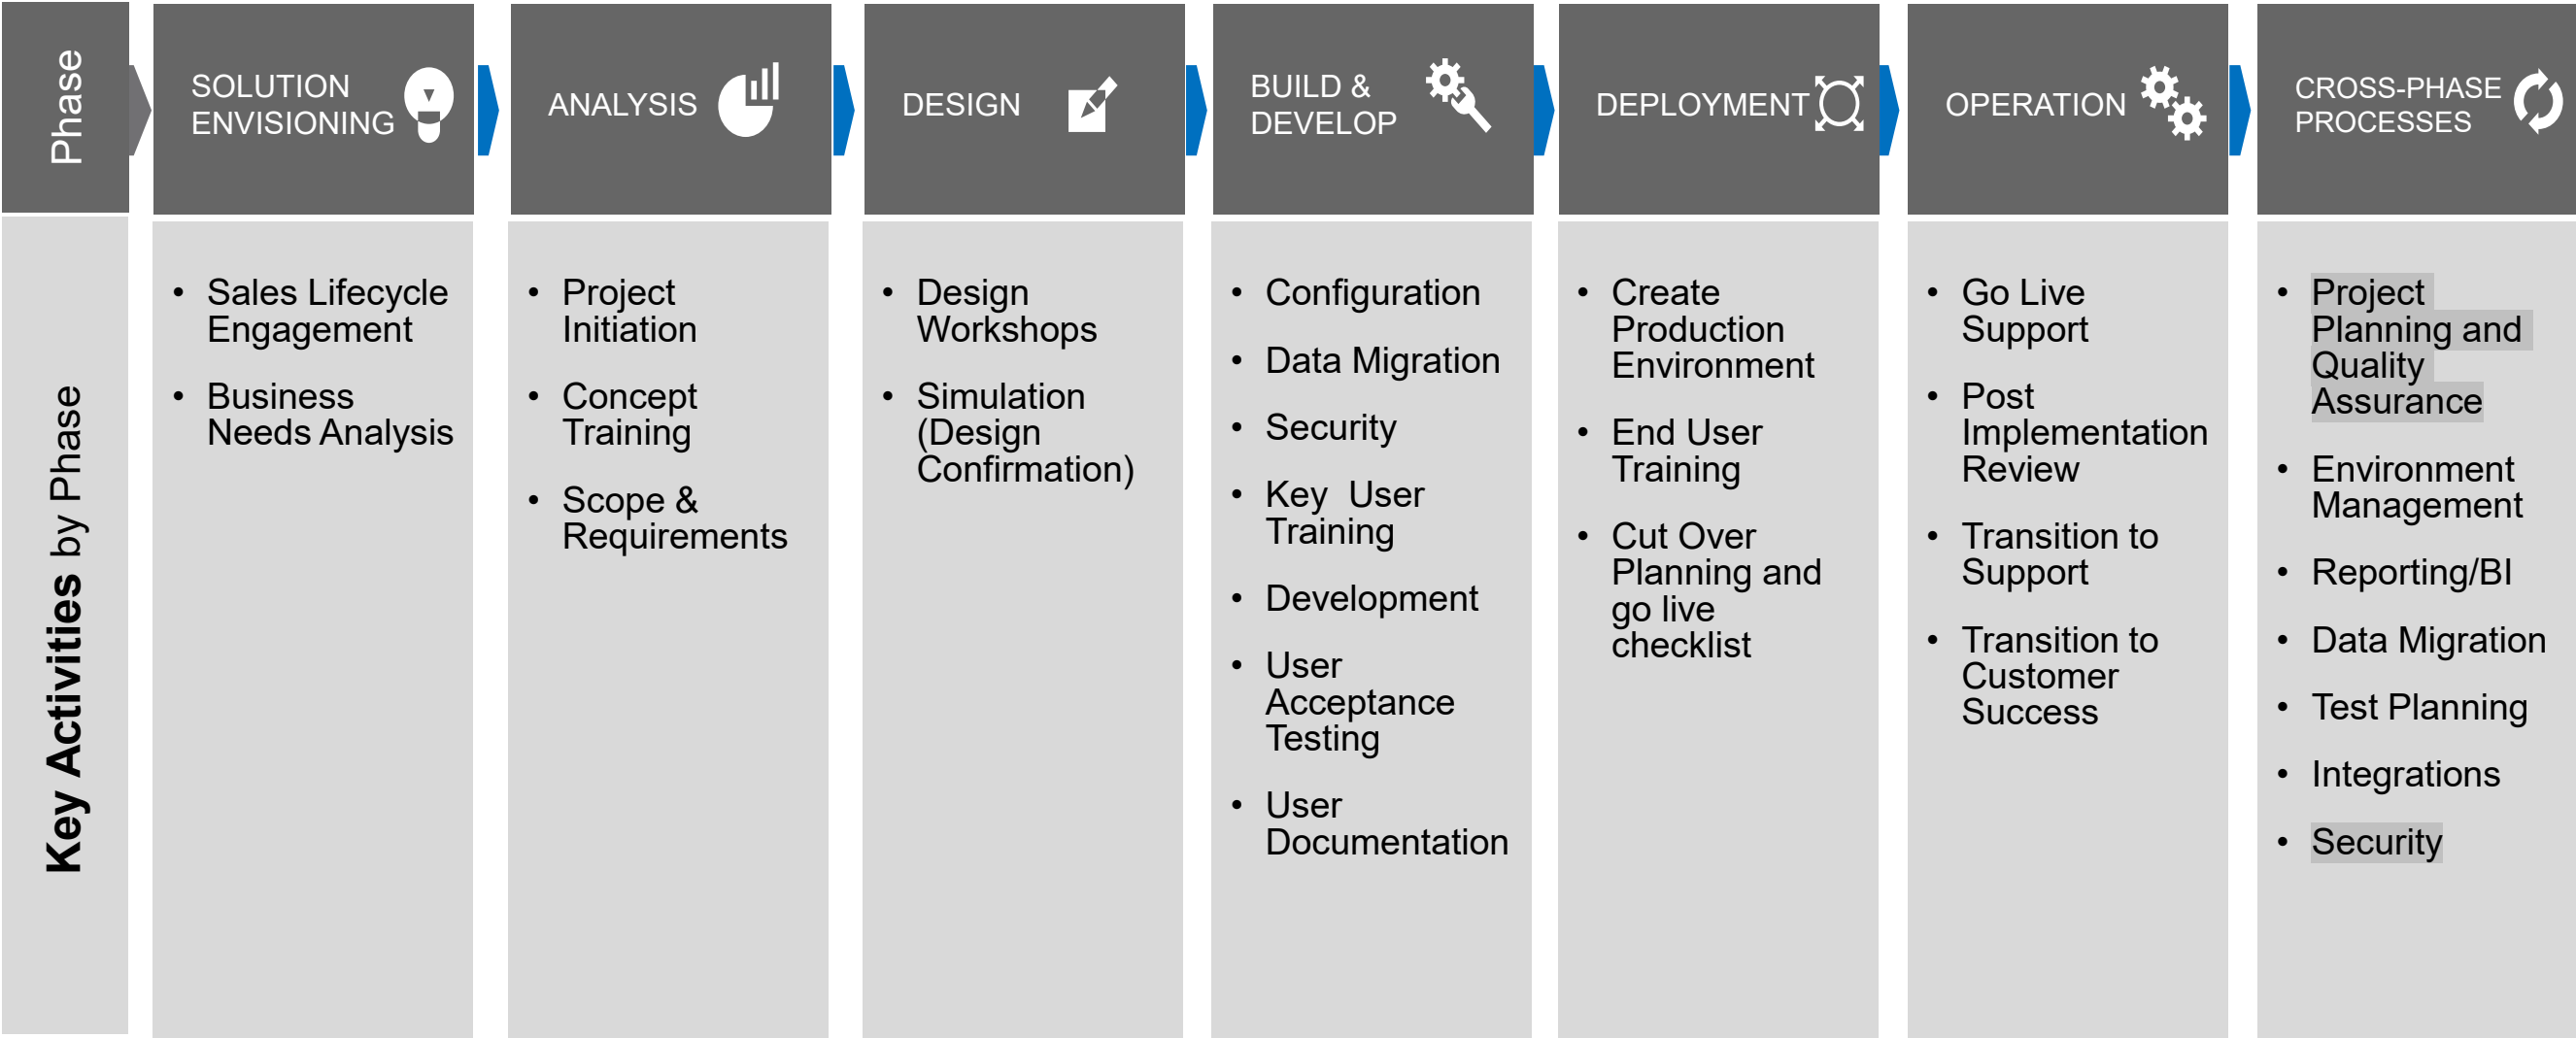

Our proven methodology

Measures, Outcomes & Engagement Phasing

*Key Activities & Deliverables vary by engagement

End-to-end implementation methodology

*Key Activities & Deliverables vary by engagement

Sample deliverables

Plan

- Product backlog
- Sprint backlog
- Sprint plan
- Project management and resource plans

Define & Analyze

- Functional and technical scope
- Functional requirements document
- User stories
- Fit gap analysis
- Payment approach
- Business process maps and workflows
- Test strategy
- Solution architecture
- Training strategy
- Integration and interface requirements
- Data migration strategy

Develop

- Installation and environment installation
- Functional design document
- Technical design document
- System environments
- System configuration and customization
- Integration and interface code
- Data migration scripts
- Test cases and scripts
- Test results
- Production operations guide
- Implementation plan
- Training materials
- Product increment release to production

Release

- End user training
- Product increment released to production
