

DXC Managed Services for Microsoft Azure Increase efficiency and reduce costs by moving to the cloud

Benefits

- Accelerate your application modernization to drive business agility
- Manage costs and mitigate sprawl
- Let DXC develop the cloud architecture that will support your critical workloads, meet your security needs and drive business value
- Leverage DXC's deep relationship with Microsoft and the Azure skills we bring as an Expert MSP
- Access end-to-end Azure services — advisory, cloud migration, managed services and security

DXC in the Microsoft Cloud

- 20,000 Microsoft professionals and 12,000 ITIL certifications
- Microsoft Expert Managed Services Provider (MSP), Azure preferred partner, Microsoft Gold Certified Partner and Cloud Solution Provider (CSP)
- Support for more than 4 million Teams users
- Global Microsoft Licensing Solution Provider
- Microsoft's #1 Office 365 and Enterprise Mobility and Security (EMS) partner

With DXC Technology you can reap the full benefits of Microsoft Azure. We will help you unlock value, productivity and agility from your Azure investments and ensure costs, governance and risks are managed.

As you adopt the public cloud, it is vital to be able to maximize the value and benefits from that investment while mitigating the risks of runaway costs, security, privacy, compliance and control. You need to be able to trust your workloads to the cloud. You might be challenged to realize value from serverless technology, the intelligent cloud, cloud-enabled applications and adopting state-of-the-art new Azure services.

Microsoft Azure is designed to increase productivity, offer hybrid capabilities and provide intelligence, all on a trusted platform. You need a partner that understands enterprise challenges and complexity, who can navigate you towards increasing productivity without increasing costs and risks as you leverage the power and flexibility of Azure.

Full support for Microsoft Azure

DXC Managed Services for Microsoft Azure provides architecture, design, migration, delivery and continuous operational support of your Microsoft Azure cloud, including compute, storage, virtual network (IaaS), Azure PaaS services, security and financial management. We monitor and manage system software, infrastructure configurations and service consumption, using proven processes and tools so that you can entrust your most critical applications to the cloud.

Our financial management capabilities ensure that Azure costs are fully transparent, and we'll continuously work to optimize your Azure spend so that you maximize value from migrating to the Azure cloud and keeping workloads there.

As a Microsoft Expert MSP, DXC partners with you and brings a wealth of Azure and cloud skills to your enterprise, with a focus on driving business value from the adoption of Microsoft's Azure services, while providing proven and dependable operational support. Expert MSP status recognizes DXC's Azure skills and deep knowledge, our operational maturity and our capabilities that we bring to our customers. Our seasoned expert advisors, and our specialized tools and services for risk mitigation, security and regulatory compliance, can help you achieve savings and reduce enterprise risk.

Azure is a consumption-based financial model and that is the way Managed Services for Microsoft Azure is charged. We scale at exactly the same rate as your Azure utilization, and as we optimize your Azure consumption, so your managed services billing is optimized also, seamlessly and instantly, ensuring that your costs and services will continually align to demand.

DXC helps you realize the full financial and operational benefits of Azure through end-to-end services that include Advisory Services to identify workloads suited to migration to the cloud and Transformation and Cloud Migration Services to take the risk out of moving core applications with complex enterprise workloads.

We offer managed service bundles suited to meet your IT and financial objectives. Whether you have critical workloads that demand a full suite of services, or you're just looking for a light-touch service to control costs and show you where to optimize, we scale and align to meet your needs.

Proven success with Azure

Our Managed Services for Microsoft Azure is helping customers easily consume Azure services and benefit from flexible consumption-based IaaS and PaaS Azure services. In addition to optimizing value in Azure, these firms benefit from agile development and deployment of cloud-native applications. Customers include the following:

- A leading global eyewear brand uses DXC's services to migrate and optimize workloads in Azure and provide dependable operational support.
- A large international retailer used DXC's advisory services to assess workloads for migration, control costs and reduce risk exposure.
- A market leader for plant integrity services and solutions in Industry, Marine & Offshore and Construction is using Managed Services for Microsoft Azure to provide operational support and governance as they migrate to Azure.
- Healthcare providers in the UK, USA and Australia are partnering with DXC to bring digital healthcare to millions of citizens using Microsoft's Azure cloud platform.

Multiple service options

Advisory Services — Quickly assess your current state

- Analyze an existing Azure environment to align to security, compliance, flexibility and scalability needs
- Ensure the Azure architecture is optimized for expected workloads
- Custom and packaged business application development, modernization, integration and management to help simplify, modernize and accelerate mission-critical applications that support business agility and growth

Migration Services — End-to-end transformation and migration services, with automated tools, proven methods and fast, reliable delivery

- Workload migration — Discover and assess application readiness, decide which modernization methodology is appropriate, prepare the application for the cloud, and test and validate the application prior to deployment
- SAP migration — Provide a cost-effective, efficient SAP migration with minimal business impact
- Analytics migration factory — Provide an efficient, end-to-end experience to accelerate the migration of data and analytics environments to Microsoft Azure

Silver Service Bundle — Manage your own Azure environment with access to skilled resources and tools

- Azure financial analysis, management and reporting, and financial best practices
- Activity monitoring and regulatory compliance for public cloud
- DXC account services, including governance and collaboration

- Light-touch service management engagement with DXC service management experts on request
- Service cost scales dynamically with Azure consumption

Gold Service Bundle — Get all the features of the Silver bundle, plus full managed services

- Configuration, Governance, Protection, Monitoring and Security Management for IaaS (compute, storage and virtual network) and PaaS Azure services
- Integrated ITSM workflow, automation and governance
- Comprehensive Security Management, including Azure Active Directory, Policies, user, group and resource security, security groups, Azure firewall, endpoint protection and OS patching
- Data protection with Azure backup
- Regular review of cloud resources and opportunities for optimization
- Service cost scales dynamically with Azure consumption

Our service bundles are designed to align to workload needs. For example, a full-scope managed service may not be needed for dev/test workloads. Our services bring best practices and governance to public cloud, so you can be confident in moving the most critical workloads to the cloud, driving the expected value and agility.

Our approach to Azure is as nontraditional as the cloud is itself.

Traditional support siloes for storage, compute, platform, security and networking are replaced with a fully skilled, Azure qualified, end-to-end Cloud Ops delivery capability: Operations at the speed and scope of cloud.

Leading Microsoft partner

DXC Managed Services for Microsoft Azure is built on our 30-year global strategic partnership with Microsoft. DXC is Microsoft's largest IT services partner globally and one of the first MSPs to certify as a Microsoft Expert MSP. We're recognized internationally as a key Microsoft partner, and DXC supports Microsoft's mission to empower every person and organization on the planet to do more and achieve more.

DXC helps customers in all regions and industries unlock value in their IT investments and take full advantage of the digital economy. We're one of the world's few IT services companies that can cost effectively integrate public cloud, private and virtual private cloud and on-premises IT into an effective hybrid capability that meets your changing business needs. Let DXC experts advise you on bringing cost transparency, governance and operational excellence to the public cloud.
