VMware to Azure Stack HCI

2-Week Assessment and Roadmap
Cost: FREE

Unlock the full potential of your IT infrastructure with our complimentary VMware to Azure Stack HCI migration assessment and roadmap. Over a span of two weeks, our expert team will meticulously inventory your existing infrastructure and virtual machines (VMs). This comprehensive assessment will ensure the accurate sizing of a new solution on Azure Stack HCI.

dcg Dynamic Consultants Group®

What We Offer

Detailed Infrastructure Inventory

We will take a thorough inventory of your current infrastructure and VMs to properly size a new solution on Azure Stack HCI.

Performance Metrics Gathering

Our team will gather performance metrics to help in right-sizing the solution, ensuring optimal performance and resource utilization.

Application Dependency Analysis

Clients will be asked to complete an application dependency worksheet to group workloads by application dependencies. This will help us build a precise migration roadmap.

Network Information Gathering

We will collect essential network details, including switch models and configurations, to ensure seamless integration.

Downtime and Timing Assessment

We will gather information on allowable downtime and timing for each application to tailor the migration plan to your specific needs.

dcg Dynamic Consultants Group®

Deliverables

Azure Stack HCI Hardware Proposal: A detailed proposal outlining the recommended Azure Stack HCI hardware tailored to your needs.

Implementation Plan: An implementation plan that outlines steps and responsibilities for the client and the implementer for an implementation of Azure Stack HCI.

Migration Plan: A comprehensive migration plan that includes timelines, milestones, and key deliverables.

Why Choose Azure Stack HCI

Cost Benefits: Azure Stack HCI offers significant cost savings over VMware while providing more modern features such as cloud management, Azure Virtual Desktop, and Azure Kubernetes Service.

High Availability and Resiliency: Benefit from enhanced high availability and resiliency to ensure your critical applications are always up and running.

Impressive Performance: Experience impressive performance improvements with Azure Stack HCI, making it an ideal choice for modern workloads.
