

# Business Central Starter - 1 Day Implementation

Dynamics 365 Business Central is an all-in-one ERP business management solution that helps you connect your financials, sales, service, and operations to streamline business processes, improve customer interactions, and make better decisions.

Some clients require more efforts from their implementation Partner than others based on the modules that are needed to be implemented and the knowledge of the client.

Our Starter Implementation package is perfect for organizations that have some financial acumen and that are interested in handling the implementation on their own. We will get the basic tenant configured for you and hand over the keys for you to do the implementation. Tools like the on-line documentation, wizards and videos will make it a bit easier for you to do this.

Remember that we can always be available for you if needed at an ad-hoc support fee.

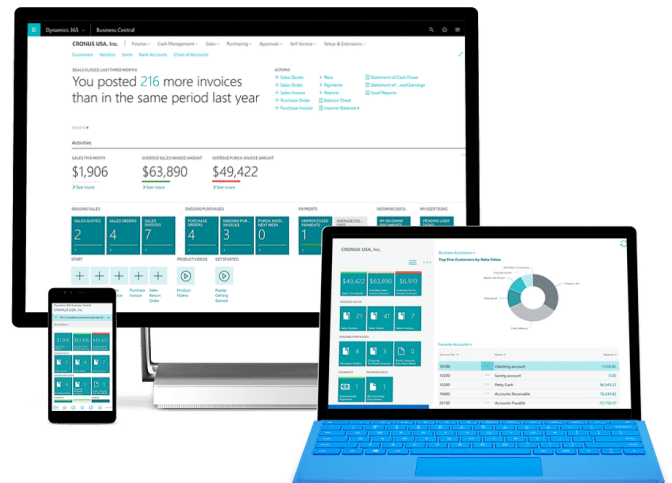

**One Time Fee: \$1,000**

## What do I get?

- Turn on and Provision Dynamics 365 Business Central
- Assign licensing and security roles for up to the first 5 users of Dynamics 365 Business Central
- Set up and configure the Microsoft Dynamics App for Outlook, if applicable, for up to 5 users (limited to one email account per user)
- Enable 1 Production Company database

### Assumptions

- Exchange Online or Exchange Server required for Outlook integration
- Dynamic Consulting must be the digital partner of record and the Cloud Solution Provider with Microsoft for licensing
- Up to 5 users (additional scope required for more users)
- This offer does not include implementation services, including but not limited to system analysis, fit/gap process, system modifications or integrations but are available if requested for additional fees.
