Be Rapid

Description

Be Rapid is a project *track* in which the client and our consultant(s) co-develop a functionality in a 10-day period.

Be Rapid is particularly suited for the development of addon functionality or feature replacements.

Be Rapid could for example be used to:

» Create simple business processes
» Replace a data entry spreadsheet
» Automate repetitive manual work (file-storing)
» Modernize a *dialog*
» Create a *smart form*
» Implement a functionality template

Steps & approximate timing

Planning & preparation

» Who
» Plan
» Prepare

Sprint

» Discovery & Design – 3 days
» Confirm – day 4 start of day + day 4 end of day
» Make – 4 days
» Test (Internal) – concluded day 8 end of day
» Test (Client) – day 9 start of day
» Deployment – day 10
