# EASYAP365

DynamicPoint

ACCOUNTS PAYABLE INVOICE AUTOMATION

DynamicPoint Invoice Automation App, EasyAP365, leverages the power of the Office 365 Platform to deliver one of the most functional and flexible AP invoice processing applications on the market at a fraction of the cost of competitor solutions. The app utilizes SharePoint libraries for invoice receipt, Power Automate for workflow, Power BI for analytics and Power Apps for check request. It brings its own features such as vendor templates for automatic account assignment, OCR for invoice data recognition, PO and non-PO processing, as well as integration with several leading ERP applications.

ABOUT DYNAMICPOINT

Founded in 2010, DynamicPoint develops business automation software within the Microsoft Office 365 ecosystem. Our products harness the functionality and flexibility of the Microsoft Power Platform, including a familiar SharePoint based user interface, Power Automate (previously Flow) workflows, Power BI analytics and Power Apps mobility. Leveraging this ecosystem allows us to deliver products that outperform the competition, in the most cost effective way.
