APPROACH TO APPLICATION MODERNISATION

DVT's Application Modernisation with Azure offering involves assessing your applications, creating a customised modernisation plan, modernising applications using Azure's tools, migrating applications to Azure with minimal disruption, experiencing Azure's benefits, and receiving ongoing support and optimisation, enabling you to unlock the full potential of your applications, enhance performance, increase agility, and drive innovation aligned with your business objectives.

1

ASSESS YOUR CURRENT APPLICATION LANDSCAPE

Our expert team thoroughly analyses your existing applications, infrastructure, and technology stack to identify areas for optimisation and modernisation.

2

DEVELOP A CUSTOMISED MODERNISATION PLAN

Based on the assessment findings, we create a tailored plan that outlines recommended strategies, technologies, and migration paths, aligning with your business objectives and timeline.

3

MODERNISE YOUR APPLICATIONS WITH AZURE

Our skilled developers leverage Azure's tools and services to revamp your applications, making them cloud-native and future-ready using practices like containerisation, microservices architecture, refactoring, or re-platforming.

4

MIGRATE APPLICATIONS TO AZURE

We ensure a seamless transition to the Azure cloud environment, following best practices to minimise downtime and disruptions, prioritising data security.

5

EXPERIENCE THE BENEFITS OF AZURE

Once your applications are running on Azure, you can leverage its scalability, high availability, and enhanced security features. Advanced services like AI, machine learning, and analytics enable you to gain valuable insights and drive innovation.

6

ONGOING SUPPORT AND OPTIMISATION

Our team provides continuous support, monitoring, and optimisation services to ensure your modernised applications perform at their best on Azure.
