

Manage and protect your devices, your apps, and your users

# Endpoint Management with Security Workshop

## Workshop highlights

-  Improve your Microsoft Secure Score with Microsoft Intune
-  Learn how to build management policies that protect your users, company data, and devices
-  Gain insights about your users' endpoints and their compliance with your IT policies
-  Determine the best way to give your users access to the apps they need on the devices of their choosing

**“Modern device management encompasses a wide range of areas including user protection, adding/removing devices, managed applications, end user support, and rolling out new capabilities.”**

—Forrester 2020 Microsoft 365 Enterprise Total Economic Impact Study

How are you managing your mobile devices, laptops, and other user endpoints? Do you know if your user's devices are compliant with your IT policies? Do you know if your user's identity is protected?

## Enable users to be productive and secure, on any device, without compromising IT security

Today's users are looking for more ways to remain productive while working on any device. 95% of organizations allow personal devices in the workspace. All these devices add additional risks, when you consider that 70 million smartphones are lost every year.

With users asking for more ways to work the way that they want, this workshop will show you how to manage and secure both company-owned and user-chosen devices in the cloud.

## Why you should attend

Experience the power of modern device management and security within your own environment.

This workshop will show you how to leverage intelligent security, risk-based controls, zero-touch provisioning, advanced analytics, and deep integration with the Microsoft products you already use. By attending, you can:

**Learn** how to improve your management capabilities with Microsoft Intune.

**Discover and protect** your endpoints by enforcing policies and deploying security tools.

**Secure** your users' identities with multi-factor authentication and conditional access from any device.

**Enable** your users to be productive with the applications they need, on the devices they want.
